

Maikel van Verseveld is CEO of OMNETRIC Group and leads a growing team of experts dedicated to developing and delivering integrated smart grid solutions for the digital energy system.

Maikel has collaborated with utilities throughout the world on large-scale, complex technology deployments and has brought to OMNETRIC Group knowledge of both the information and operational systems that enable the effective distribution of energy today.

In recent years, he has been involved in the European regulatory dialogue on both the growing role for communications and the convergence of information and operations technologies. He was recently the sponsor and primary contributor to the research, Power to the People: Community energy as a major driver of change in the global energy system, which has generated numerous interviews and articles.

Previously managing director for Accenture Smart Grid Services in Europe, Africa and Latin America, he is an industry expert with nearly 20 years' experience consulting to utilities. He has worked across all facets of the utility industry, from AMI/smart metering to asset management and field service operations, as well as customer care and billing.

Maikel lives in Amsterdam with his family.
