

Ingenuity for life – Driving the Digital Enterprise

Klaus Helmrich, Member of the Managing Board of Siemens AG

Electrification, automation, digitalization – Siemens offers solutions along the entire value chain

SIEMENS

Digital Enterprise is our portfolio of solutions for the digital transformation – in both discrete industry and process industry

Full consistency between virtual and real production worlds – From a digital model to real production

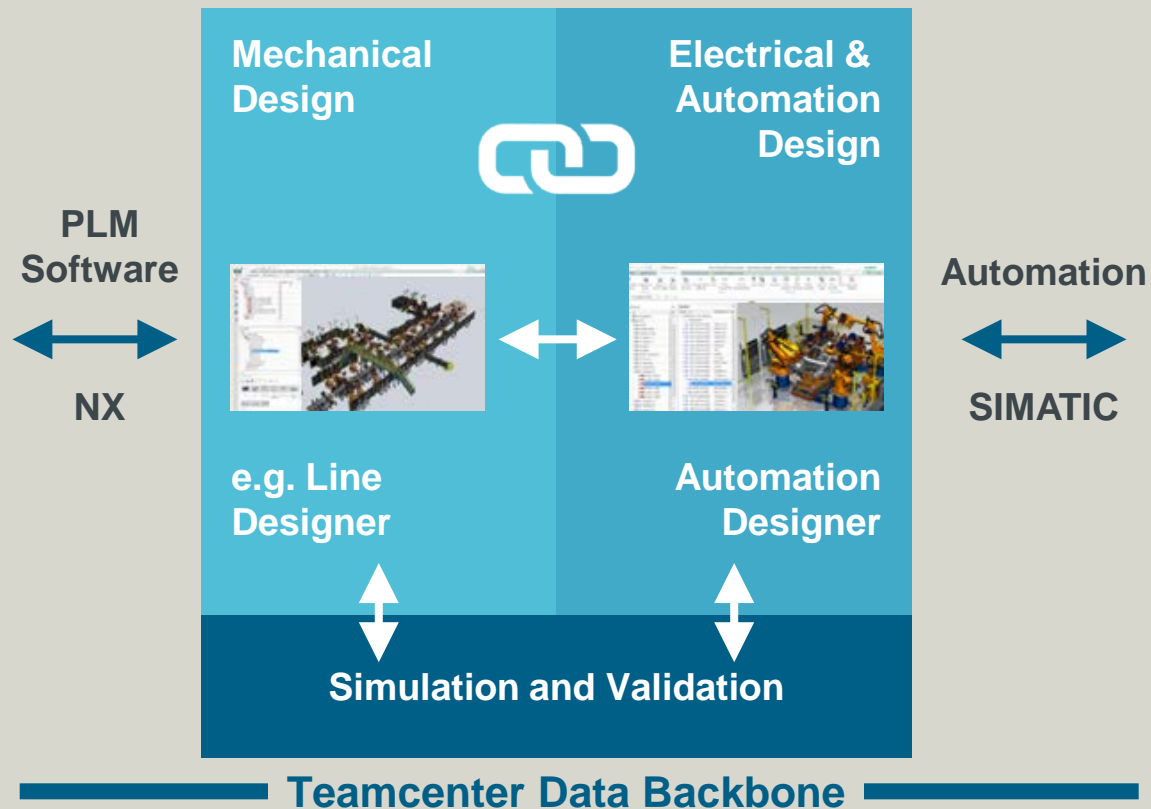

SIEMENS

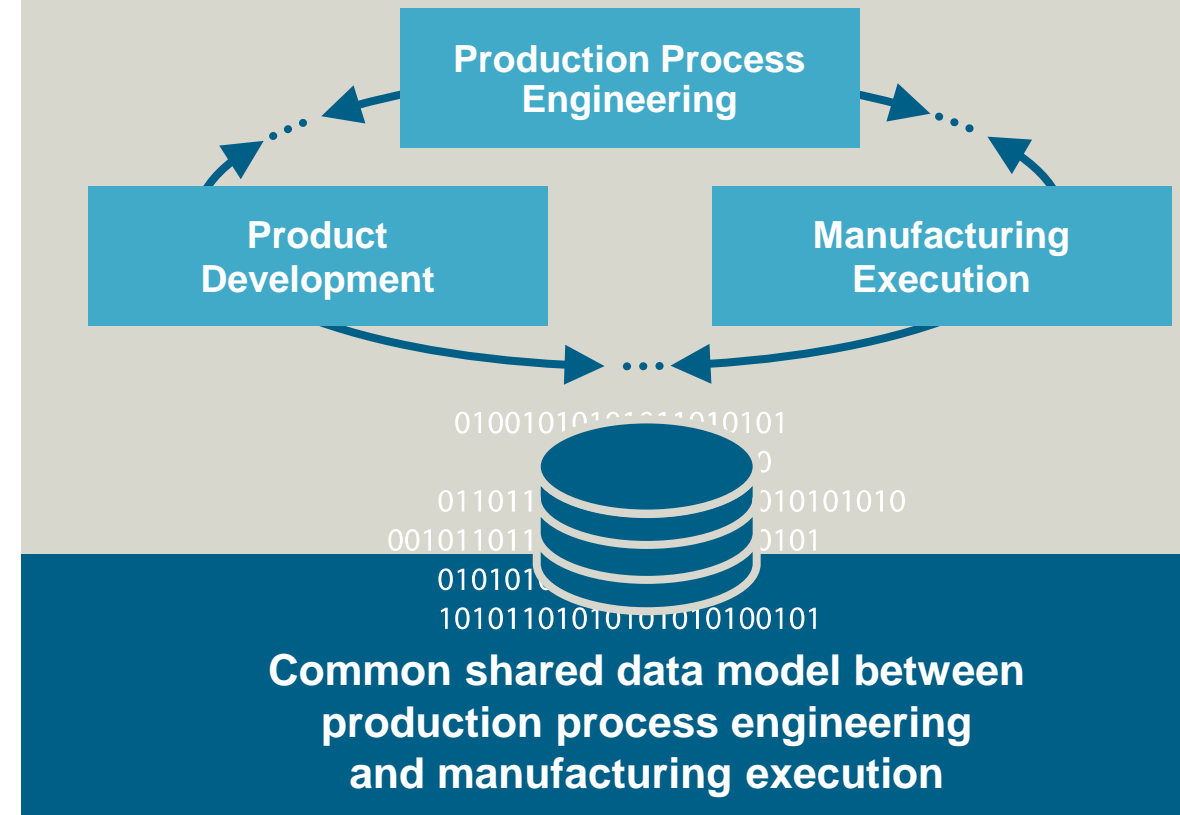

Full consistency between virtual and real production worlds – through software integration and comprehensive networking

SIEMENS

Integrated Mechatronics Engineering for Automation

Closed Loop Manufacturing

Investing in Industrie 4.0 today with Digital Enterprise – Our solutions along the entire value chain

SIEMENS

1 Industrial software and automation portfolio

Specifically for discrete or process industry

2 Industrial communication

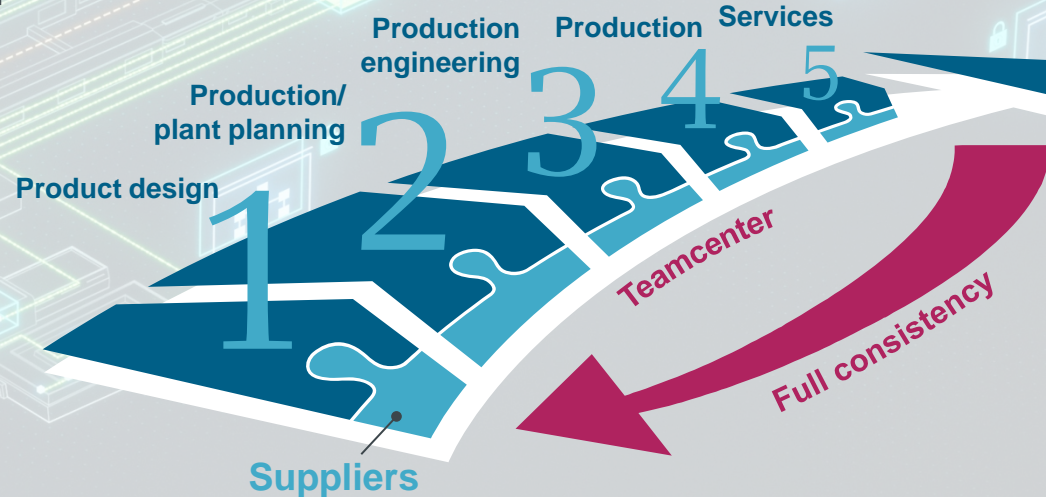

3 Industrial security

4 Industrial services

Joint platforms for discrete and process industry

Virtual world

Real world

**We are rigorously refining the Digital Enterprise –
Our innovations for discrete industry at the Hannover Messe trade show**

SIEMENS

Industrial software and automation portfolio

NEW: CD-adapco for flow simulation, new functions in the TIA Portal V14, integration of additive manufacturing with NX

Industrial services

NEW: MindSphere – Siemens Cloud for Industry

Industrial security

NEW: Holistic Security Concept

Industrial communication

NEW: Expanded portfolio for industrial communication, OPC UA

Industrial software – Systematic expansion of our portfolio for design, simulation and testing

SIEMENS

CAD system (NX), PLM software (Teamcenter)

- Shared environment for optimizing the product development process
- Multidisciplinary CAE environment
- Uniform data management for all stages of the value chain

Year of acquisition: 2007

Simulation and testing (LMS Virtual.Lab, Imagine.Lab, Test.Lab)

- Behavioral simulation:
1D comprehensive simulations
- 3D mechanical simulation,
e.g. stiffness, noise and vibration
- Testing: Solutions for prototype testing
(stationary and mobile)

Year of acquisition: 2012

Flow simulation (STAR-CCM+ and others)

- Computational Fluid Dynamics (CFD)
for flow analysis
- Heat transfer simulation
- Wide range of optimization possibilities:
3D simulation and automated feedback
to CAD/CAE

Year of acquisition¹: 2016

¹ Closing expected for H2/2016

Industrial software – CD-adapco acquisition – High-performance simulation solutions for design and engineering

SIEMENS

Employees

approx. 900

Revenue

approx. \$200 million

Industry sectors

- Automotive and transportation
- Process industry
- Energy
- Aviation and aerospace
- Marine

Simulation software for fluid dynamics (CFD), solid mechanics (CSM), heat transfer, etc.

Simulation shortens time to market by up to 35%

Industrial software – Seamless integration and simulation of additive manufacturing processes (3D printing) with NX

SIEMENS

Development (CAD)

- Design rules and conditions
- Design of lightweight structures (grilles/ honeycombs)
- Support structures
- Multi-material support

Computation (CAE)

- Thermal and structural analysis
- Layer-based heat and strength computations
- Laser power control
- Topology optimization

Manufacturing (CAM)

- Additive multi-axis solution
- Multi-laser solution
- Model slicing
- Layer patterns
- Orientation of parts in the installation space

Data management and line integration

Siemens production software and MES systems

Industrial software and automation – Consistency also in the automation world with TIA Portal V14

SIEMENS

TIA Portal V14 – New functions

Cloud connection

Cloud Connector

Simulation of process control system

PLCSIM Advanced

Flexible, open communication

OPC UA

Multi-user environment

Multiusers

Energy analysis & management

Energy Suite

Integration of motion control

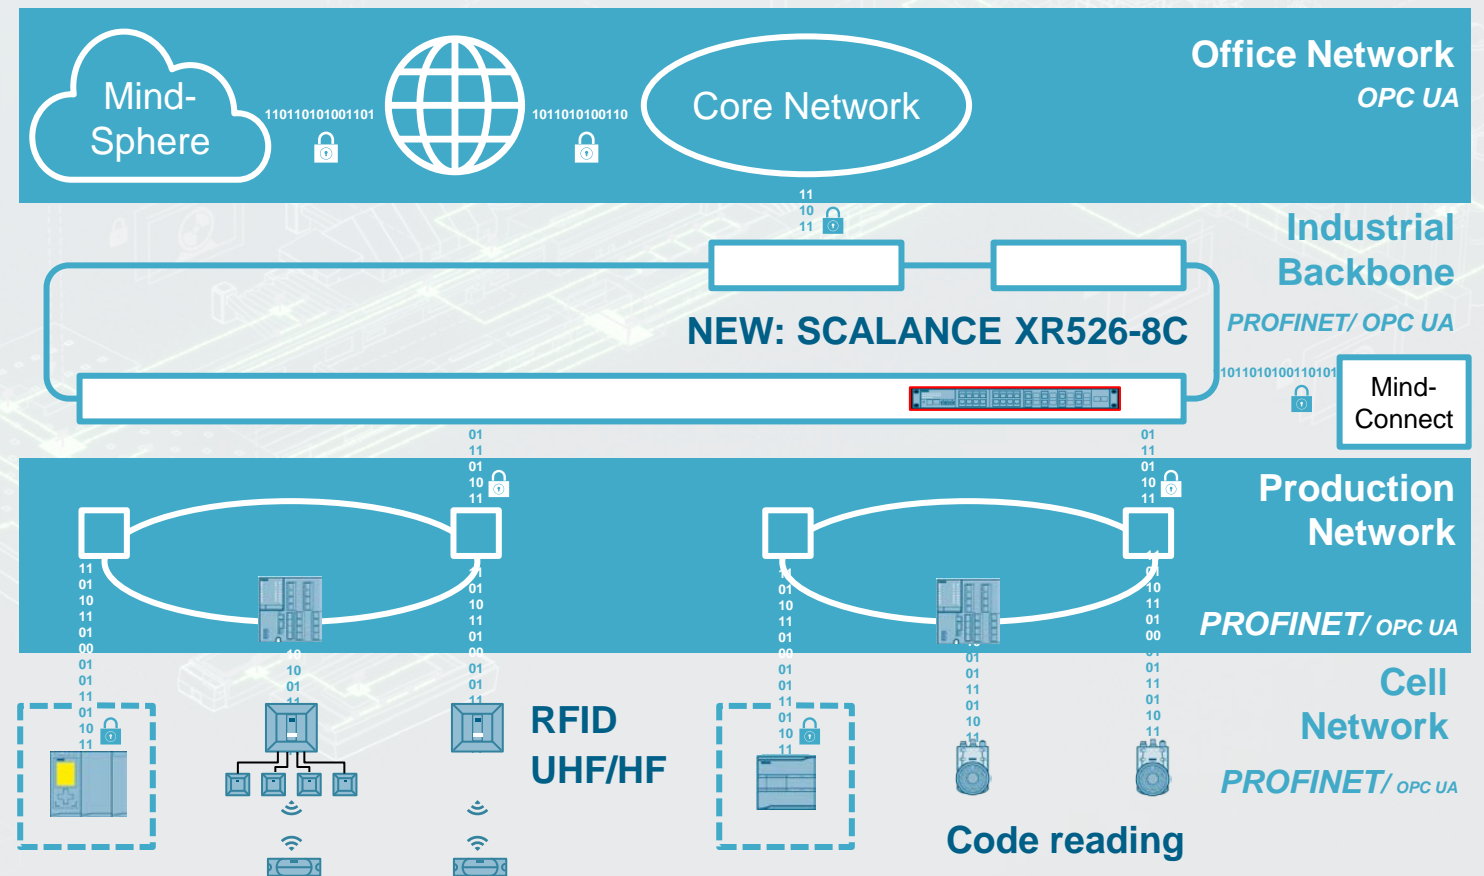

S7-1500T
SINAMICS V90PN

Industrial communication – Consistent, secured communication from the field level to the cloud

SIEMENS

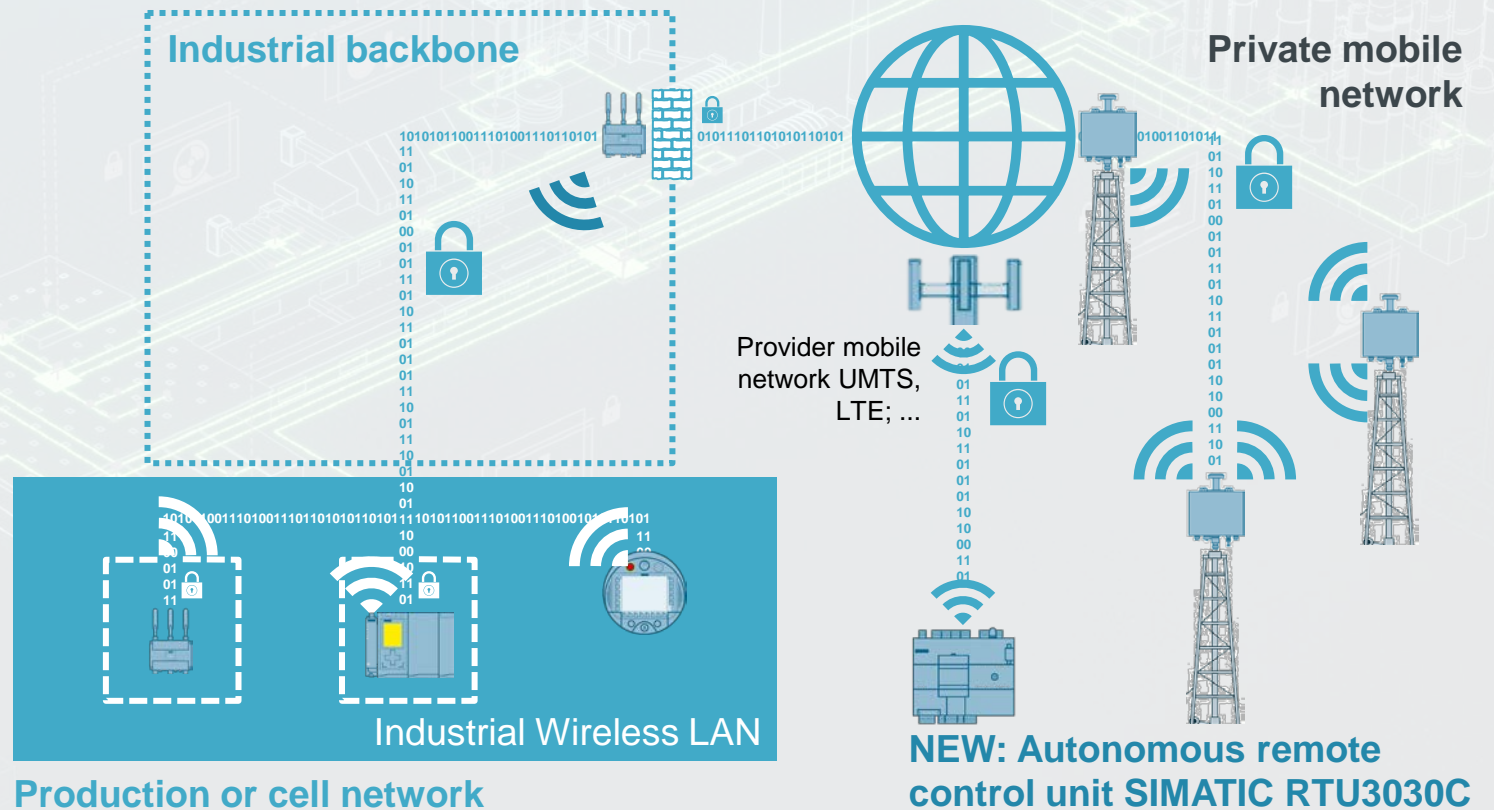

Industrial communication and identification

Industrial communication – Consistency and security also in wireless communication

SIEMENS

🔒 From the field level to the world

MindSphere – Siemens Cloud for Industry offers our customers a solid foundation for new, data-based business models

SIEMENS

MindSphere – Siemens Cloud for Industry

MindApps*

Siemens is leading the way with industrial security concepts –
for comprehensive security on the production and process levels

SIEMENS

Holistic Security Concept

5 levers

- Plant security features
- Improved security processes
- Incident management
- Security awareness
- IT infrastructure

New level of energy efficiency through cloud-based services – Example pharmaceuticals company Alcon

SIEMENS

The background of the slide features a close-up, shallow depth-of-field photograph of a laboratory setting. In the foreground, several clear glass test tubes are arranged in rows, slightly out of focus. In the background, a glass dropper or pipette is visible, with a single drop of liquid hanging from its tip. The overall color palette is dominated by cool blues and teals, creating a professional and scientific atmosphere.

Alcon

12% less energy consumption with Energy Analytics Service

- Worldwide access to dashboards for situational analysis of production equipment
- Data from > 400 measurement points
- Access to global network of experts via the cloud

Solutions across the entire value chain – Example automotive industry

SIEMENS

Integration and optimization of the entire product and production lifecycle

- Close interlinking of previously separate processes
- Increased flexibility
- Shorter time to market

Digital Enterprise also meets the requirements of the process industry – From integrated engineering to integrated operation

SIEMENS

Services

From integrated engineering ...

... to integrated operation

**We are rigorously refining the Digital Enterprise –
Our innovations for process industry at the Hannover Messe trade show**

SIEMENS

Industrial software and automation portfolio

NEW: COMOS V10.2 and SIMATIC PCS 7 V8.2 for integrated, efficient engineering, SIMIT Simulation V9.0 for virtual commissioning of systems and processes

Industrial services

NEW: MindSphere – Siemens Cloud for Industry, smart services for the process industry

Industrial security

NEW: Holistic Security Concept

Industrial communication

NEW: Expanded portfolio for industrial communication, OPC UA

From integrated engineering to integrated operation – With our solutions portfolio for industries

SIEMENS

Pharmaceuticals
industry

Chemical
industry

Oil & Gas

Food &
Beverage

Industry-specific process know-how and solutions expertise

From integrated engineering to integrated operation – Example fiber industry

SIEMENS

Integration across all process steps

- Seamless data flow with COMOS platform
- Integration of engineering all the way to service
- Drive systems embedded within the process control system
- Up to >10% shorter time to market

Example brewery – We guarantee the 500 year-old quality promise of the German Purity Law also in industrial production

SIEMENS

Optimization of batch and discrete processes through simulation with Tecnomatix

- Constantly high product quality
- Faster batch-changing times

Greater flexibility with the fully automatic process control system BRAUMAT

- Higher efficiency in plant operation

Solutions for reliable, efficient, and decentralized energy supply – Example Energy for Industry

SIEMENS

Flexible, Integrated energy systems for variable production capacity utilization and energy consumption

- Energy-optimized buildings
- Energy-efficient production
- Energy recovery and storage
- Distributed power generation

Customer benefits of the Digital Enterprise – Also in our own Siemens factories

SIEMENS

Time to market

- Shorter innovation cycles
- More complex products
- Larger data volumes

Flexibility

- Individualized mass production
- Volatile markets
- High productivity

Quality

- Closed-loop quality processes
- Traceability and integrated genealogy

Efficiency

- Energy and resource efficiency as decisive competition factors
- Availability of machinery and systems

Example of the Amberg Electronics Factory

Production of more than 120 variants per day, based on 75% automation

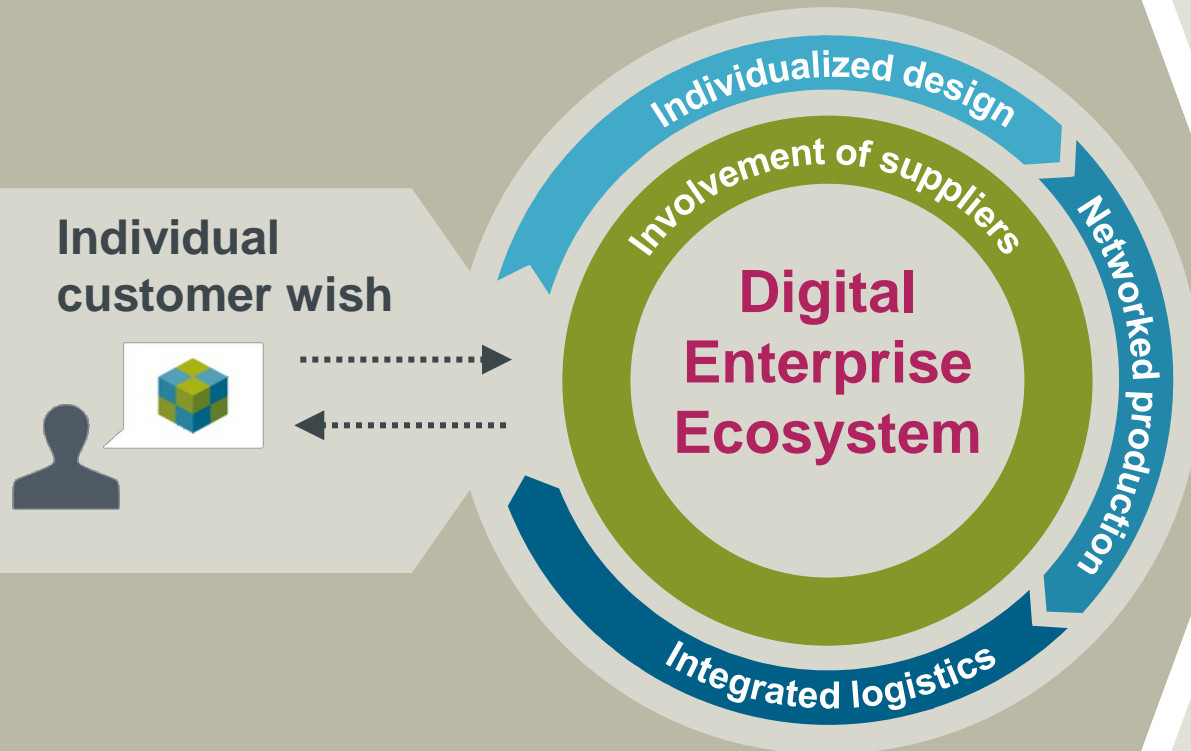

~350 change-overs per day to ensure 24-hour delivery reliability

Less than 11 defects per million (dpm) equal a quality rate of 99,9988%

More than 75% capacity utilization (20% greater flexibility)

Digital Enterprise – An ecosystem for individualized customer wishes

Digital Enterprise for the discrete and the process industry

**Siemens is offering solutions for the digital transformation of industry –
Investing in Industrie 4.0 with Digital Enterprise today**

SIEMENS

**We have refined our portfolio of solutions for Industrie 4.0, the Digital Enterprise –
With numerous innovations at Hannover Messe trade show**

**We're combining the virtual and real production worlds to create an ecosystem –
for shorter time to market and higher flexibility, quality and efficiency**

Digital Enterprise offers solutions to meet customers' requirements in the discrete and process industries

- Specific industrial software and automation portfolio
- Joint platforms for communication, security, and new data-based service business models

**With our scalable solutions, enterprises of all sizes can invest
in Industrie 4.0 today**

Siemens at the Hannover Messe 2016 – Our Highlight Cubes allow visitors to experience the digital transformation firsthand

SIEMENS

Visit us in Hall 9.
**We look forward to
seeing you there!**
