Erlangen City Council gives green light to Siemens Campus

- **Launch of urban development competition between twelve firms of architects**
- **Construction work to begin at the end of 2016**

At its meeting yesterday, Erlangen City Council approved a decision of principle giving the go-ahead for an architectural design competition for the new Siemens Campus in Erlangen. This marked a further milestone for the project, which is important not only to the city but to the entire metropolitan region of Erlangen / Nuremberg.

By 2030, Siemens plans to build a modern, sustainably designed Siemens Campus on the existing Siemens site on the south side of Erlangen that will have an enduring impact on the cityscape for decades to come. Over 320,000 square meters of new office space, at least 100,000 square meters of new residential space, a hotel with business center and serviced apartments, as well as leisure, sports, restaurant and shopping facilities are to be developed on the Campus site over the next few years.

In an initial selection procedure, Siemens, together with the City of Erlangen, has preselected twelve German firms of architects to take part in the architectural design competition which is now being launched. In early 2015, a panel of judges will reach a verdict on the designs. Following the subsequent development planning process, construction is scheduled to begin at the end of 2016.
