

## Siemens Celebrates 125 Years of Partnership and Innovation in Egypt

- **More than a century of successful collaboration – from the first telegraph line to foundational infrastructure and cutting-edge digitalization initiatives**
- **The Legacy Mega power plants and high-speed rail stand as testament to the strategic partnership in realizing Egypt’s Vision 2030**
- **Siemens employs over 2,000 people in Egypt and drives electrification, automation, digital transformation, mobility and software development**

Siemens celebrates 125 years of shared progress, innovation, and unwavering partnership in Egypt. The company reaffirms its deep commitment to shaping Egypt’s infrastructure and technological landscape. Senior German and Egyptian government representatives, alongside Roland Busch, President and Chief Executive Officer of Siemens AG, attended the celebration, held on February 8, 2026, in Cairo.

“Siemens and Egypt have a long term partnership that spans more than a century, built on trust, innovation, and a shared vision for the future,” said Roland Busch, President and CEO of Siemens AG. “As we celebrate 125 years, we are proud to stand alongside Egypt, delivering technologies that empower communities, strengthen industries, and support the country’s vision for a sustainable, resilient future.”

Since the installation of Egypt’s first telegraph line in 1859, Siemens has played a pivotal role in the nation’s technological evolution. The company has delivered landmark projects that have powered industries, modernized transportation, and consistently integrated new digital capabilities.

Today, Siemens is instrumental in the implementation of Egypt's ambitious Vision 2030. The legacy Mega Power Plants project impressively added 14.4 gigawatts (GW) of capacity in a remarkably short period, significantly enhancing energy security and efficiency. Furthermore, Egypt's first high-speed rail network, a 2,000-kilometer system, will connect major cities and serve nearly 90 percent of the population, embodying smart and sustainable mobility. Beyond these monumental projects, Siemens is enabling smart infrastructure and advanced Industry 4.0 solutions that empower Egyptian businesses with cutting-edge automation, data-driven manufacturing, and sustainable, energy-efficient practices.

Siemens operates in Egypt through three highly specialized companies, each contributing to the nation's digital and sustainable transformation:

- **Siemens Industrial** drives innovation in electrification, automation, and advanced digitalization, supporting industries with technologies that enhance productivity and energy efficiency.
- **Siemens Mobility** focuses on intelligent transportation solutions, including the high-speed rail network and the modernization of existing rail infrastructure, emphasizing efficiency and connectivity.
- **Siemens Digital Industries Software** serves as a global innovation hub in Egypt, providing advanced electronic design automation and digital transformation solutions through its research and development center and the comprehensive Siemens Xcelerator platform.

With a dedicated workforce of over 2,000 employees, predominantly Egyptian nationals, Siemens reaffirms its long-term commitment to Egypt's development. This commitment ensures that Siemens' legacy of innovation continues to create a greener, more resilient, and digitally advanced future for generations to come.

**Siemens AG** (Berlin and Munich) is a leading technology company focused on industry, infrastructure, mobility, and healthcare. The company's purpose is to create technology to transform the everyday, for everyone. By combining the real and the digital worlds, Siemens empowers customers to accelerate their digital and sustainability transformations, making factories more efficient, cities more livable, and transportation more sustainable. A leader in industrial AI, Siemens leverages its deep domain know-how to apply AI – including generative AI – to real-world applications, making AI accessible and impactful for customers across diverse industries. Siemens also owns a majority stake in the publicly listed company Siemens Healthineers, a leading global medical technology provider pioneering breakthroughs in healthcare. For everyone. Everywhere. Sustainably.

In fiscal 2025, which ended on September 30, 2025, the Siemens Group generated revenue of €78.9 billion and net income of €10.4 billion. As of September 30, 2025, the company employed around 318,000 people worldwide on the basis of continuing operations.
