Siemens Industry Mall

Beograd 03.11.2020.

Industry Mall

SIEMENS
Ingenuity for life

The Siemens Industry Mall is the platform on which you can access the entire Siemens Industry product portfolio. From product selection to placing an order and delivery tracking, Industry Mall covers the entire purchasing process – directly, and irrespective of time and place.

Advantages

- Communication with increasingly shorter response times
- Efficient planning and development and design processes
- Transparent cost and order management (availability checks, delivery status regardless of ordering channel, order overview, order confirmation and delivery note display)

Functions

- Product information, technical data, application examples
- Product and system configurators
- Software and document downloads
- Display of customer-specific prices in the shopping cart
- Availability check
- Order processing
- Order tracking
- OCI interface with SAP for catalog data
- Planned connection to ERP system

Requirements

- Internet access
- Current browser version (Explorer or Firefox)
- Registration at

https://mall.industry.siemens.com/

Benefits

- Near real-time data
- Significant time saving in the offer and planning phase: Items already calculated or configured online can be transferred directly to the shopping cart.

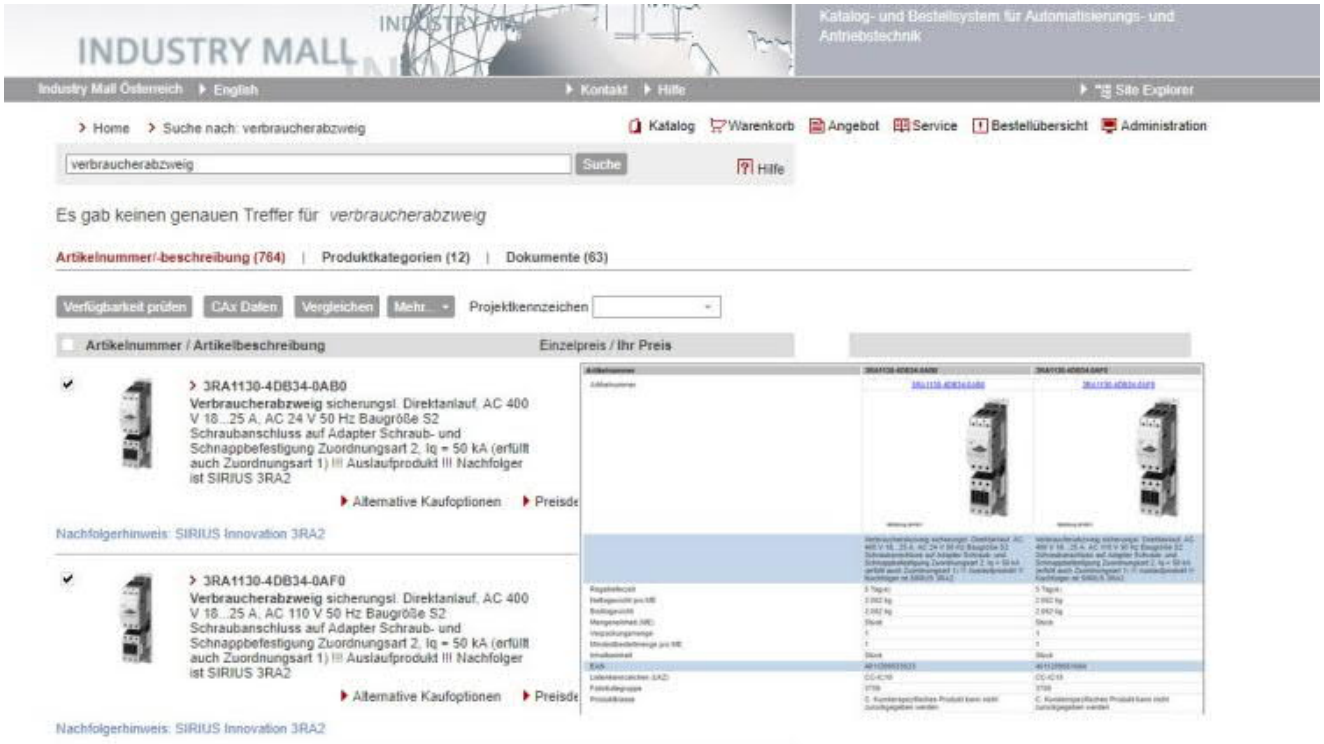
Industry Mall
Product details and product comparison

SIEMENS
Ingenuity for life



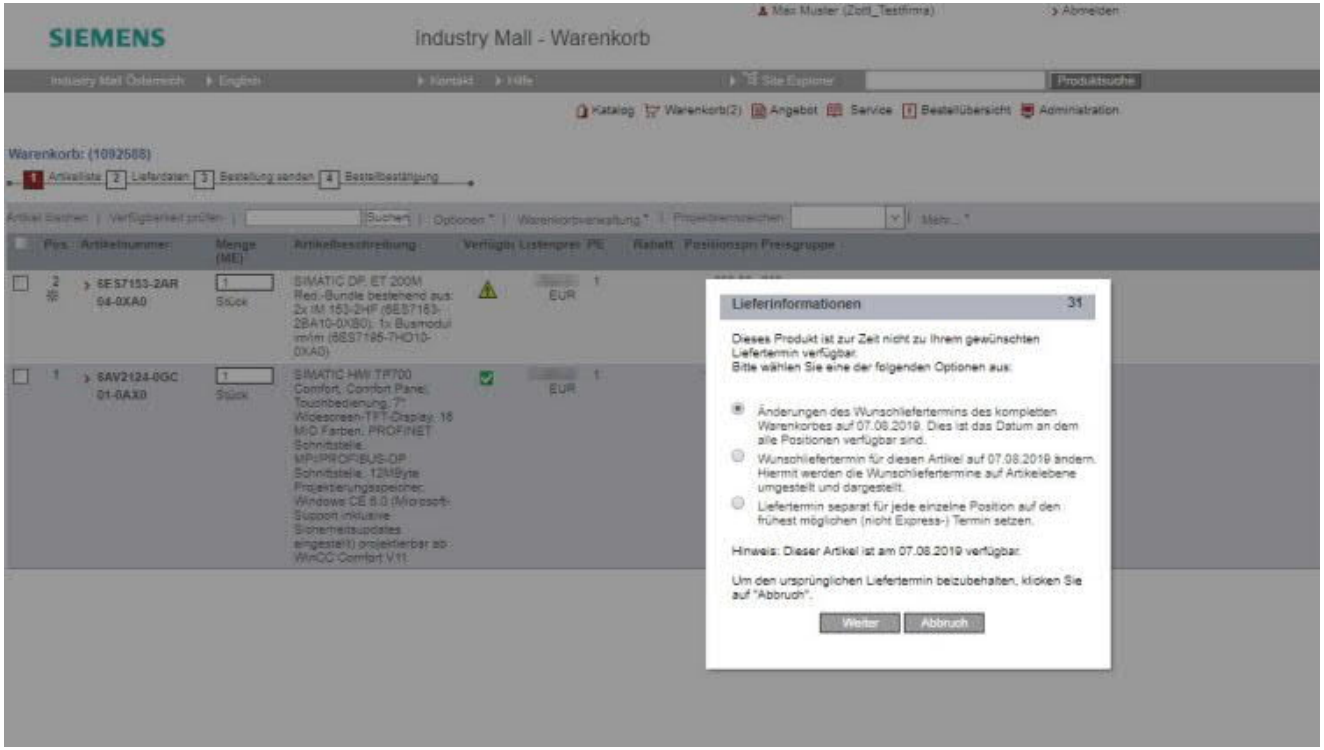
By using the search function, products in the catalogue can be compared easily with each other. Under "Product details", you will find all important and useful information on the item selected, including:

- Commodity codes
- Discount details
- Weight
- Product's country of origin
- Product classification

Unrestricted © Siemens AG 2020

Industry Mall
Availability check

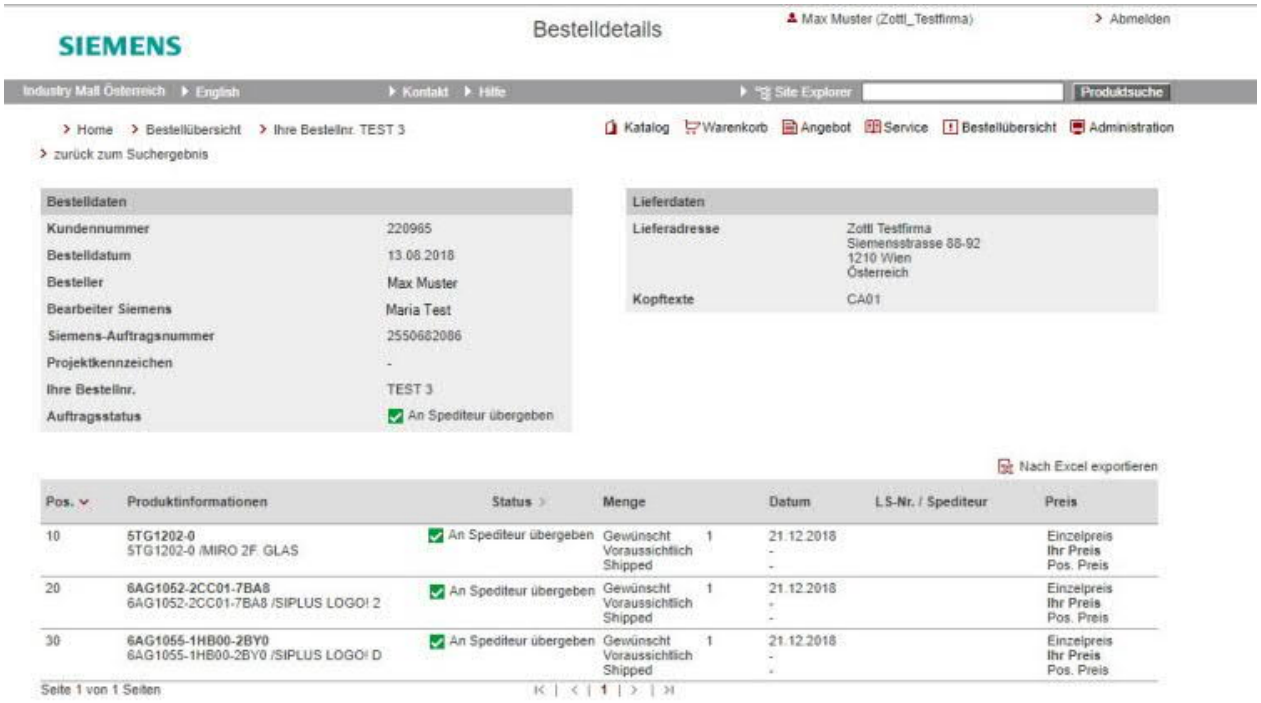
SIEMENS
Ingenuity for life



- The availability check enables you to confirm whether the required item is available before you transfer it to your shopping cart.

Unrestricted © Siemens AG 2020

Industry Mall
Order and delivery tracking



- In the orders overview, you will find all the orders that have been received by Siemens – including those not sent through Industry Mall. This allows you to track your orders at any time. By clicking on the order, the delivery note can be opened, saved, or printed.

- Under "Forwarding agent," you can go directly to the supplier's page and track the precise delivery status of the order.

Industry Mall
Master data query

SIEMENS
Ingenuity for life

- Would you like to be able to search for master product data for a particular product range quickly and easily? That's what the master data query does. The relevant output formats can be selected and downloaded based on different standards. By selecting the available fields, you can define the contents of master data queries individually.

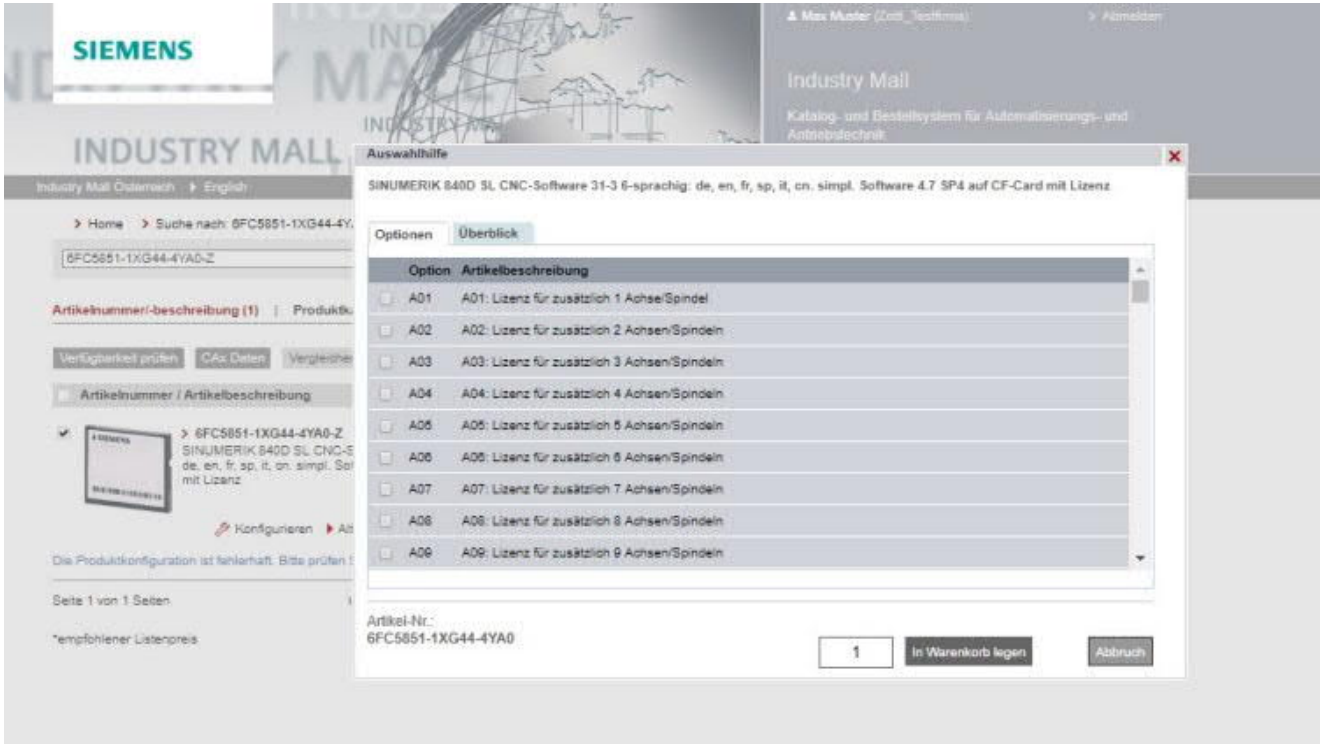
Industry Mall
Configurators

SIEMENS
Ingenuity for life



The configurators allow you to select systems and products step-by-step and tailor them to your own individual solutions. During selection, entries are automatically checked for plausibility. Some configurators even offer a schematic showing how the components connect in an ideal scenario.

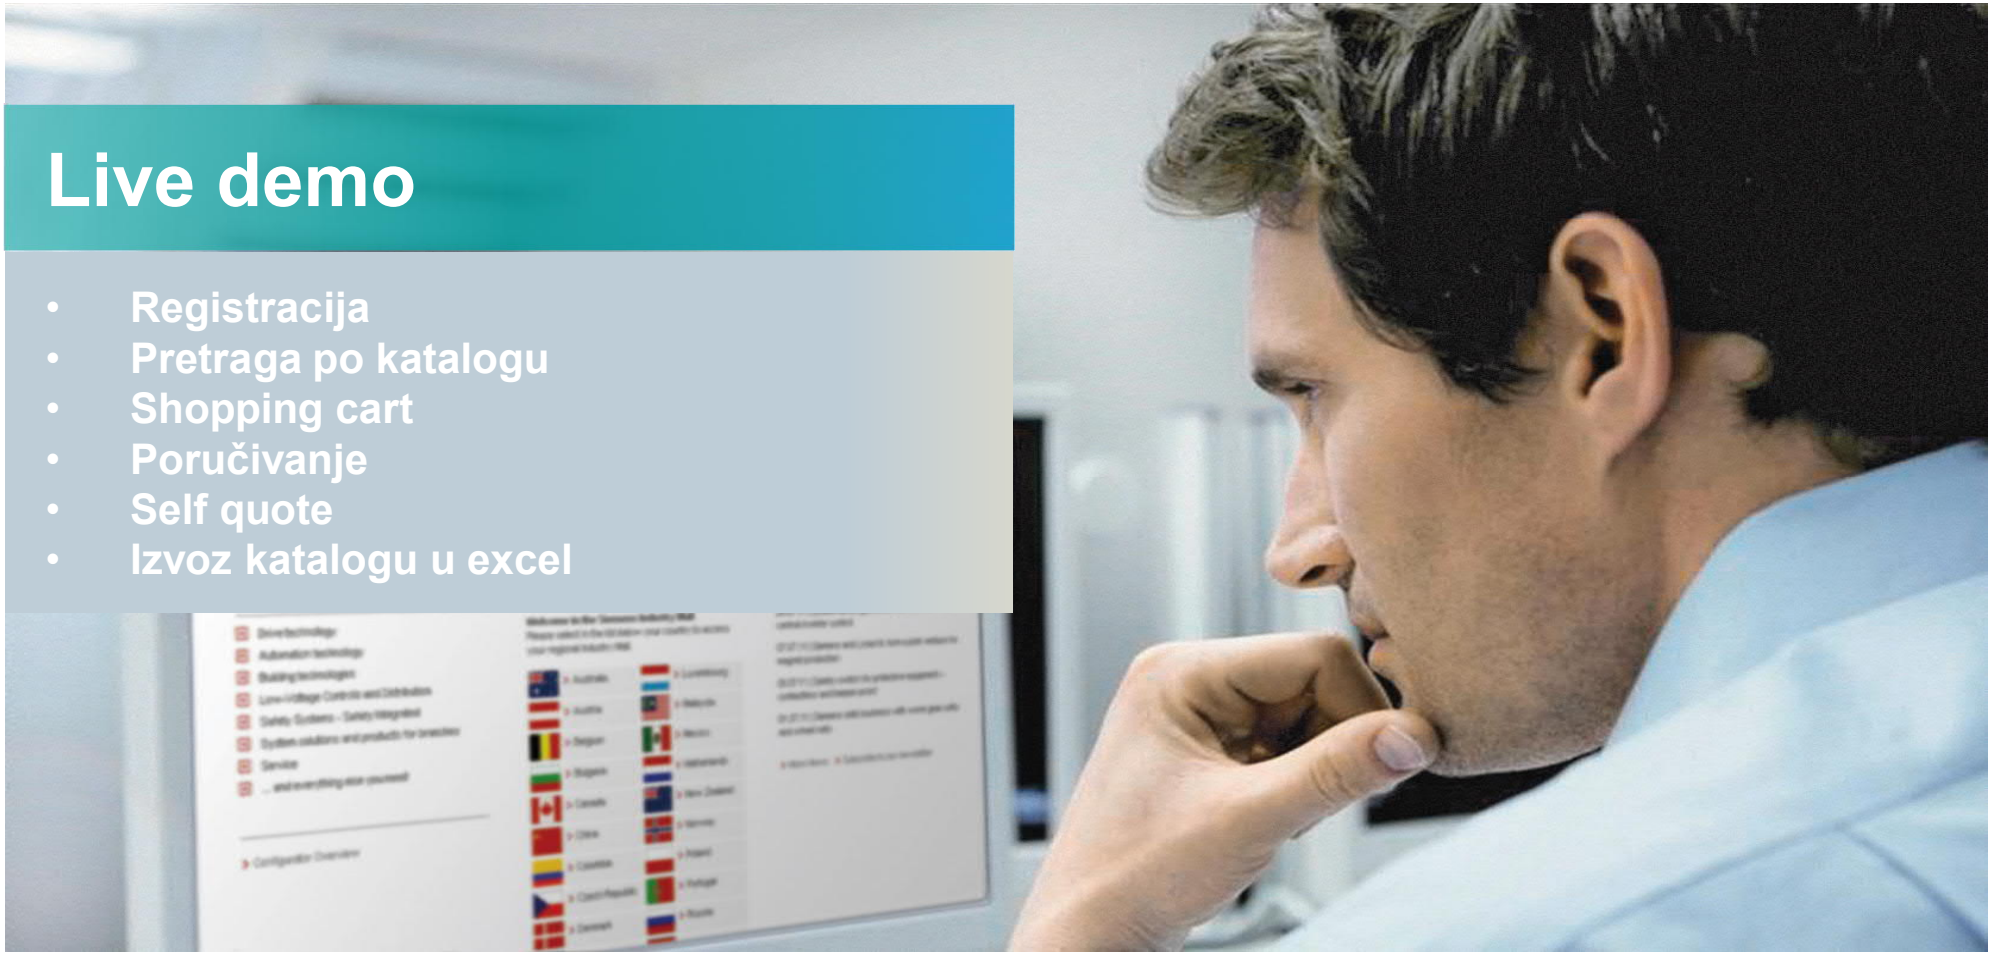
Orders and enquiries

- List prices
- Current customer prices
- Availability check
- Successor versions
- Delivery tracking, including forwarding agent details
- Order confirmation
- Data exchange with ERP systems

Unrestricted © Siemens AG 2020

Industry Mall

SIEMENS
Ingenuity for life



Live demo

- Registracija
- Pretraga po katalogu
- Shopping cart
- Poručivanje
- Self quote
- Izvoz katalogu u excel

Online Software Delivery (OSD)

Unrestricted © Siemens 2020

siemens.com/tia-online-software-delivery

SIEMENS
Ingenuity for life

Advantages of OSD

- At the push of a button access to the installer of the software package!
- Faster than any delivery method, i.e. get started immediately after purchasing the software!
- As safe as the classic delivery of software - reliable as usual, but considerably faster!
- More ecofriendly, because there is no additional burden from waste, delivery routes and distribution logistics!

And this is how it works

- Order the download of the software, the software update service and the corresponding licenses via the Industry Mall or your sales partner.
- Select the article number of the download version of your desired product. Please note the corresponding marking.
- You will then receive your access data by e-mail to download the license, certificate and software.

OSD
Software update service

SIEMENS
Ingenuity for life

The Software Update Service (SUS) is the fastest, easiest way to keep your software up to date anytime – automatically and at a cost that can fit your budget.

When you order the Software Update Service for your product, you'll get every upgrade and service pack of your software product, delivered at no charge right to your workplace for a whole year. All you need is a valid software license for the latest available version.

Fast and up to date
Upgrades and Service Packs are available immediately after they're released

Proactive
You'll get the SIMATIC software product delivered at no charge right to your workplace or be notified automatically about updates via e-mail

Transparent
You can check and manage all SUS contracts via the SUS Manager

Manageable cost
An economical flat annual fee for software maintenance
