

Innotrans 2016, September 20-23, 2016 in Berlin

Rail technology from Siemens: smart solutions for growing mobility requirements

Our world is becoming increasingly digitalized – from our communications with one another, right through to the way in which we develop, produce and consume goods and services. Even rail transportation is not immune to the megatrend that is digitalization. In this context, Siemens' presence at Innotrans 2016 will be themed around the digital transformation of rail transportation.
