About SupplyOn

Since 2012, SupplyOn is Siemens' premium solution partner for supply chain management. Throughout the corporation, Siemens divisions rely on SupplyOn solutions to reap the benefits of a globally digitized purchase-to-pay (P2P) process.

SupplyOn connects all the major players in automotive, aerospace, rail and engineering as well as their key suppliers in a multi-tier ecosystem.

SupplyOn enables you to collaborate with all your Siemens business partners via one single, central platform.

SupplyOn's integrated end-to-end solution suite includes all collaborative processes with your business partners at Siemens and other members of the SupplyOn ecosystem.

Benefits of an integrated supply chain

- Agility & Transparency**
- Reduced Manual Effort**
- Faster Payment**
- Centralized Data**

SupplyOn offers a single, fully integrated end-to-end solution suite to operate/execute/manage time-critical supply chains smoothly and with the highest possible business value.

SupplyOn breaks down silos and enables a unified view of all supply chain relevant data. It thus removes errors, eliminates redundant work, increases transparency and speeds up the process.

SupplyOn's efficient processes allow you to strengthen your position with Siemens. This ensures your competitiveness and successful business relationship.

Furthermore, SupplyOn enables you to increase your process quality – and the quality of your products as a result.

Benefits of the advanced P2P process

The basic P2P process is just the first step. To reach the maximum potential and fully secure the supply for Siemens, it requires further functionalities: This is what the advanced P2P processes via SupplyOn offer.

With SupplyOn you additionally benefit from full P2P-related document management, delivery schedule & response, VMI, ASN, transport order management, invoicing and more.

All in all, this supports you in reaching your business goals through a sustainably efficient supply chain with Siemens.
