## PROCESS INSTRUMENTATION

# When you need instruments **You need them now!**

Same-day shipping because in your process every second counts!

[usa.siemens.com/pi](http://usa.siemens.com/pi)

Siemens Process Instrumentation brings you innovative measurement solutions to increase plant efficiency and enhance product quality, including flow, temperature, pressure, level, weighing and valve positioning. And we understand that in the process industry, every second counts – which is why we offer world-class engineering, testing and production directly from our 183,000 sq. ft. state-of-the-art manufacturing facility in North America. Your production doesn't stop, so why would we? Siemens delivers the instruments you need and the reliability you depend on, with same-day shipping 24 hours a day, 365 days a year.

**SIEMENS**

# Popular products **available immediately!**

## Keep your operation running smoothly

You can't afford any downtime, whether it's from unforeseen damage to your facility or an unexpected mechanical failure, your process needs to operate on a continuous cycle which means that the measurement data used to control or monitor your process is critical and must be available at all times.

## Keep your projects on schedule

Having equipment quickly available is a key success factor for Project Managers during project execution; the scope can change, which spurs an immediate need for fast delivery of a product which is essential to keeping your schedule on track and your costs down.

## Configured to your specifications

Pressure transmitters are on the shelf and ready to go! With the SITRANS P320 measuring gauge or differential pressure (including every measuring range), there's a transmitter ready immediately for your application.

Even with on-the-shelf availability, you're not stuck with off-the-shelf configurations. We are able to parameterize, tag, and even calibrate your transmitter to meet your specific requirements - all with the availability of same-day shipment!

## It's a simple process

Contact your local sales representative for more information on specific configurations available.

Technology	Select Models from the following Products <sup>1</sup>	Ship Days
Pressure	Absolute, gauge, differential	1-3
Level	Ultrasonic, mechanical point Radar	1-3 3-5
Valve	Smart positioners	1-3
Flow	Magnetic Clamp-on ultrasonic	1-3 5-10
Weighing	Dynamic, process protection	1-5
