

SIEMENS

Ingenuity for life

The background of the entire page is a nighttime photograph of a city nestled in a valley, with mountains in the distance. The city lights are visible, and there are several digital overlays: a large grid of data points on the left, a bar chart on the right, a line graph with a dollar sign in the center, and a network diagram at the bottom right. Light trails from a road or highway curve through the city.

Learning Cloud

EnergyIP MDM Software
And Applications Training

[siemens.com/learningondemand](https://www.siemens.com/learningondemand)

Siemens Learning Cloud provides online education and training on EnergyIP MDM Software and Applications from any device 24x7.

Learn about EnergyIP MDM Software and Applications topics anytime, anywhere by connecting to the Siemens Learning Cloud.

Whether it's a recorded product introduction video or self-paced product training, you'll find comprehensive, on-demand content to meet your learning needs.

Siemens Learning Cloud allows you to keep current on the latest releases of EnergyIP MDM platform and software applications, providing you with a flexible solution to training and education just-in-time or during down time.

Our on-demand content makes it easy for you to learn anytime, anywhere; connect with Siemens experts worldwide and access engaging e-learning modules and training videos on-demand. Finding and learning the content that is most relevant to you and delivered by subject matter experts has never been easier.

*“I just watched the Data Collection course with Shelly Antony, and I learned a lot. I like the Learning Cloud because I can learn when I have time and I find something new each time I login.
- Learning Cloud Subscriber*

Our learning content is organized in small nuggets allowing you to learn at your own pace.

Learning Cloud content is available in a variety of media formats which allow you to view content from any web browser and even mobile devices. These formats include:

- E-learning (web-based training) - self contained modules featuring audio, video, text, animation, and graphics.
- Video on-demand - streaming video with audio narration.
- Best practice articles—relevant articles on industry trends and topics.
- Product demonstration videos—recordings of grid application products in use.

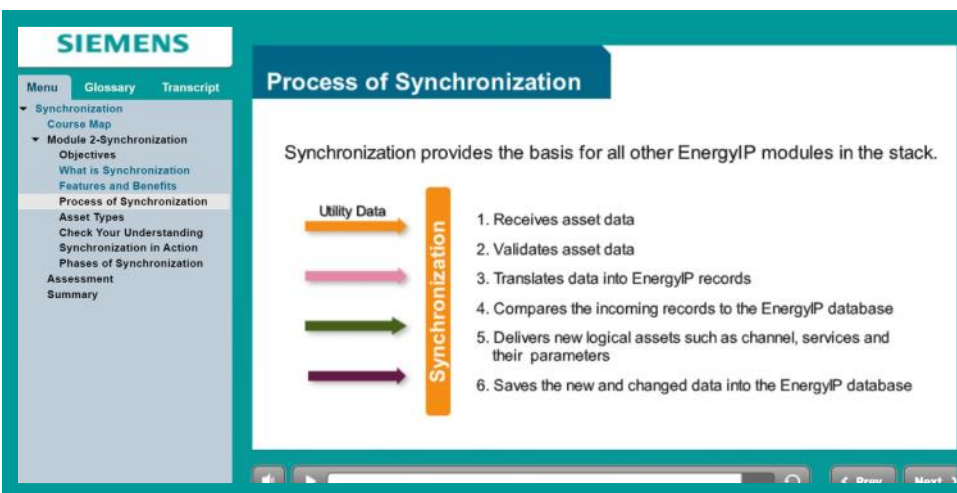

You can access our ever growing collection of content by subscription 24x7, 365 days.

Video On-demand

See our engineers, product managers, and thought leaders discuss various topics on digital applications, solutions, and the market landscape.

Example: What's New in EnergyIP 8.6

Self-Paced Learning

These interactive elearning modules help you learn product information, including features/benefits and use cases for our customers along with product demonstrations and explanations of technical concepts. Many of these modules also include interactive activities and quizzes to help enhance your learning.

Example: EnergyIP Core Concepts - Synchronization

EnergyIP Training

Anytime, Anywhere, Anyplace

Whether you are new to EnergyIP Meter Data Management or a seasoned user looking to implement the latest applications such as Analytics and Outage Event Management, you can find relevant training content in the Learning Cloud.

New and Popular Courses

Learning Cloud courses include these new and popular topics:

1. Introduction to EnergyIP 8.6
2. EnergyIP 8.6 SP4 Knowledge Transfer
3. EnergyIP Implementers Certification Class
4. EnergyIP Billing and VEE Task Tool
5. Revenue Protection Overview
6. Outage Event Management Overview
7. Real Time Framework (RTF) 2.0
