ON-DEMAND E-LEARNING

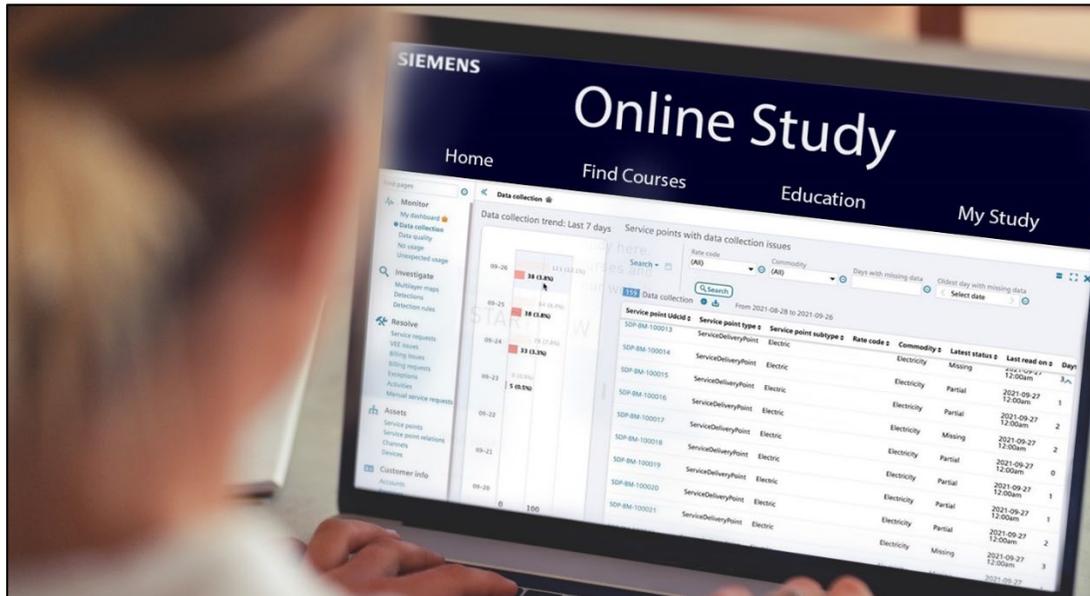

Learning Cloud Benefits

Whether you are a new user wanting to learn the basics of using Gridscale X Meter Data Management (MDM) software or a seasoned user looking to utilize Business Monitoring and Reports in the new Mosaic user interface, you can find relevant on-demand training content in the Learning Cloud. Our online training platform offers timely video updates on the new brand name Gridscale X Meter Data Management, starting with release 9.1, training on prior releases, and courses on our MDM platform including System Administration, Revenue Protection and Outage Event Management. Best of all, the Learning Cloud is available at no additional charge to all Gridscale X Meter Data Management customers with active Maintenance and Support (M&S) contracts. (see last page for details).

Remote training via standard web browsers

Siemens Learning Cloud allows you to keep current on the latest releases of Gridscale X Meter Data Management platform and software applications, providing you with a flexible solution to training and education just-in-time or during down time from the convenience of your laptop or desktop device.

Whether you are seeking a Gridscale X Meter Data Management product introduction video or self-paced technical training, or training on an older version, you'll find relevant course content to meet your learning needs. The ability to access training on-demand makes it easy learn MDM topics with a click of the mouse anytime, anywhere.

Training Designed for Today's Learners

Learning Cloud content is available in a variety of media formats which allow you to get training from any web browser, even from mobile devices like tablets and smartphones. These learning formats include:

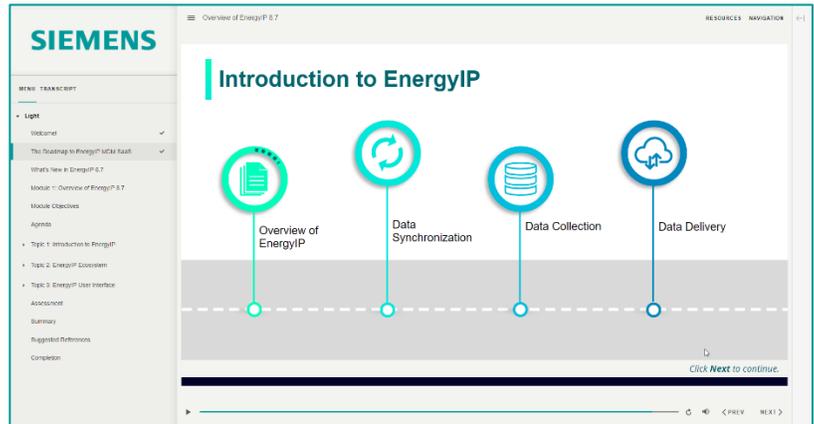

Video On-demand

See our engineers, product managers, and thought leaders discuss various topics from the latest MDM version and earlier versions of EnergyIP MDM Knowledge Transfer Series (software release updates), plus product overviews and video tutorials on using the new Mosaic User Interface, installation procedures and configuration.

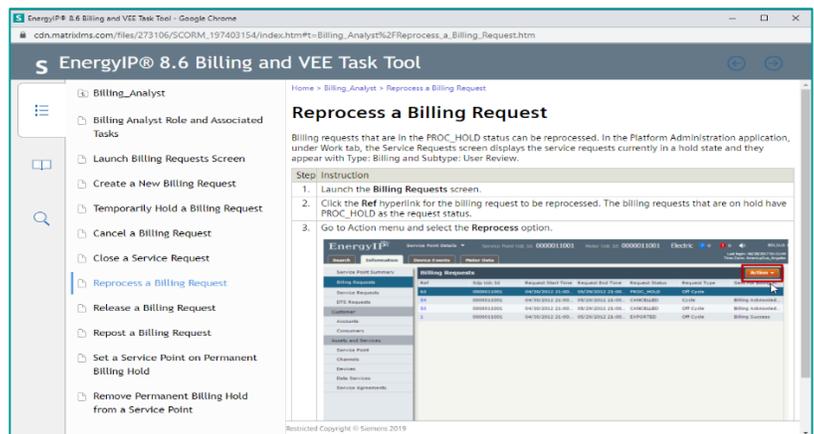

Web-based Training Courses

These interactive e-learning courses help you learn MDM product information, including features/benefits and customer use cases along with product demonstrations and explanations of technical concepts. Many of these course modules also include interactive activities and quizzes to help enhance your learning.

Task Tools

Task Tools open in a second browser window and allow MDM users to find tips and steps to perform a variety of operational tasks for billing, VEE, and system administration.

Using the Learning Cloud

Learning Cloud Home Page

Start your journey to learning Meter Data Management by browsing through the **Learning Cloud Collections** page.

Each Collection is organized by related Meter Data Management topics. Whether you are searching for the latest information on new releases, product overviews on MDM and optional applications, or want in-depth technical overviews on core technologies, the Collections page is the first place to start searching for learning content.

The screenshot shows the Siemens Learning Cloud interface. The left sidebar contains navigation options: Home, Collections (highlighted with a red circle), Titles, Paths, Groups, and Users. Below these are sections for 'My Titles' (listing EnergyIP Billing, EnergyIP Meter D, EnergyIP System, Introduction to En, and Introduction to SA), 'My Paths' (listing Technical Learnin), and 'My Groups' (listing Implementers For). The main content area is titled 'Collections' and features a welcome message: 'Welcome to the Siemens Learning Cloud where you can acquire knowledge on Gridscale X Meter Data Management (formerly EnergyIP MDM) software and applications. Choose from a variety of learning formats including videos, web based training courses, and documents that will enable you to build your MDM software expertise. Click on one of the Collections below to begin.' Three collection cards are displayed: 'Getting Started' with a 'New? START HERE' banner, 'Gridscale X Meter Data Management', and 'Meter Data Management'. A search filter panel on the right allows filtering by Phrase, Category, Style, Language, and All.

Learning Paths

New users can enroll in various Learning Paths located in the Getting Started collection. Learning Paths are a group of preselected training titles related to a major topic, for example EnergyIP 9.0 for New Users. Enrolling in this Learning Path enables access to all courses listed in the path, saving you time while guiding your learning towards a particular subject area.

The screenshot shows the 'Learning Path: EnergyIP 9.0 for New Users' page. The header includes the path name and a user profile for Chris Dant. Below the header, there is a section titled 'About' and 'Goals'. The 'Goals' section lists three goals:

- 1. Introduction to EnergyIP 9.0**: This course will provide you with a basic understanding of the core fundamentals and technologies of EnergyIP and is designed for anyone new to the EnergyIP 9 x Platform. There are four parts to th...
- 2. Quick Start Guide to the Mosaic New User Interface in EnergyIP 9 (updated for SP6)**: These short videos will help you get familiar with using the new UI in EnergyIP 9 (optionally available in EnergyIP 8.7). Use the information, videos and job aids in this course to get a feel for t...
- 3. EnergyIP 9.0 Knowledge Transfer Series**: Edited recordings from the EnergyIP 9.0 Knowledge Transfer sessions delivered December 2021. Session 1 topics include EnergyIP 9.0 overview, new platform features, EDAM update, and UI changes. Sess...

Quick Start to Learning Cloud Collections

Finding Your Training Content

Training content is organized by Collections which are a series of courses and videos related to a main topic. New Users can select Getting Started. Alternatively dive into Gridscale X Meter Data Management, or for previous releases see Meter Data Management for information about EnergyIP and previous releases.

Collections

Titles

Welcome to the Siemens Learning Cloud where you can acquire knowledge on Gridscale X Meter Data Management (formerly EnergyIP MDM) software and applications. Choose from a variety of learning formats including videos, web based training courses, and documents that will enable you to build your MDM software expertise. Click on one of the Collections below to begin.

Getting Started

This Collection includes selected courses for anyone new to MDM, EnergyIP, or the utility industry. We recommend enrollment into the Learning Path: MDM for New Users as it contains an overview course that will introduce you to the EnergyIP MDM platform, data model, and user interface. Also included are recordings of our latest

Gridscale X Meter Data Management

Learn about Gridscale X Meter Data Management and EnergyIP product solutions and platform features. You will find general product overviews as well as technical courses and videos that dive into data model, architecture, installation and configuration of MDM. Content can be found in the Gridscale X MDM Collection and

Meter Data Management

This collection contains courses designed to provide you with new knowledge or enhance your existing skills on the current version of Meter Data Management. Topics include product overviews, knowledge transfer recordings for release updates, and demos of the new Mosaic user interface. Some topics can still be found under

MDM & Smart Grid Applications

General and technical topics for these applications: Advanced Device Management (ADM), Energy Engage, SAP Adapter, Outage Event Management (OEM), EnergyIP Prepay, and App Installation. There is a sub-category for Analytics applications.

Clicking on the Collection tile displays the actual course content titles. From here you can browse and choose the content you want to learn more about.

Note: the video and web-based courses typically include audio narration, graphics, and animation. Make sure your audio device/speakers are turned on and the volume adjusted for comfortable listening levels.

Access to the Learning Cloud included with Siemens Meter Data Management Software

There is no charge to access all the Learning Cloud content for Siemens' Meter Data Management customers with software and support contracts (M&S). You (or someone in your organization) must already have access to the Support Portal to request user accounts for the Learning Cloud.

How to Request Access

Meter Data Management customers (and authorized partners) can request individual user accounts through the Support Portal at <https://support.emeter.com/support/login>

(Note: you must already have a registered user account to access the Support Portal. If you don't have a user account, anyone with access to the support portal within your organization can request a new user account on your behalf.)

Once logged in to the Support Portal you should submit a new ticket with the following options selected in addition to providing your name and selected your company from the menu:
