## Mrosik appointed CEO of Digital Factory Division

- **Digital Factory CEO Anton Huber retiring**
- **Ralf Christian to be sole CEO of Energy Management Division**

Jan Mrosik (51), currently CEO of the Energy Management Division, has been appointed CEO of the Digital Factory Division, effective June 1, 2016. Anton Huber (65), Digital Factory's current CEO, is retiring on October 1, 2016. He will continue to serve the company in a consulting capacity until that date. Ralf Christian (52) will be the sole CEO of the Energy Management Division, effective June 1, 2016. Christian is currently the Division's co-CEO with Mrosik.

"We'd like to thank Anton Huber for his extraordinarily successful work in over 35 years at Siemens. At an early stage, he leveraged the opportunities of digitalization and laid the basis for today's Digital Factory Division by integrating industry software into our automation business. With its combination of hardware and software for industrial production, the Division is uniquely positioned worldwide for the future", said Joe Kaeser, President and CEO of Siemens AG. "Jan Mrosik's long years of experience in automation and smart grids have provided him with the optimal prerequisites for continuing Digital Factory's success story. The Energy Management Division has mastered the major challenges of the past few years and is delivering growth and solid progress in profitability. With his strong team, Ralf Christian will successfully master the challenges that still lie ahead of us and realize the business's enormous potential."

Jan Mrosik, who holds a doctorate in electrical and industrial engineering, has served Siemens in a variety of capacities over the last 20 years. Previously CEO of the company's smart grid business, he is currently co-CEO with Ralf Christian of the

Energy Management Division. Christian began his Siemens career in 1989 and held a variety of positions at the company until 1998. After a stint in the capital goods industry, the university-trained industrial engineer returned to Siemens in 2004. Before joining Mrosik as co-CEO of Energy Management, he headed Siemens' low- and medium-voltage business.

**Siemens AG** (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 165 years. The company is active in more than 200 countries, focusing on the areas of electrification, automation and digitalization. One of the world's largest producers of energy-efficient, resource-saving technologies, Siemens is No. 1 in offshore wind turbine construction, a leading supplier of gas and steam turbines for power generation, a major provider of power transmission solutions and a pioneer in infrastructure solutions as well as automation, drive and software solutions for industry. The company is also a leading provider of medical imaging equipment – such as computed tomography and magnetic resonance imaging systems – and a leader in laboratory diagnostics as well as clinical IT. In fiscal 2015, which ended on September 30, 2015, Siemens generated revenue of €75.6 billion and net income of €7.4 billion. At the end of September 2015, the company had around 348,000 employees worldwide. Further information is available on the Internet at [www.siemens.com](http://www.siemens.com).

This document contains statements related to our future business and financial performance and future events or developments involving Siemens that may constitute forward-looking statements. These statements may be identified by words such as “expect,” “look forward to,” “anticipate” “intend,” “plan,” “believe,” “seek,” “estimate,” “will,” “project” or words of similar meaning. We may also make forward-looking statements in other reports, in presentations, in material delivered to shareholders and in press releases. In addition, our representatives may from time to time make oral forward-looking statements. Such statements are based on the current expectations and certain assumptions of Siemens' management, of which many are beyond Siemens' control. These are subject to a number of risks, uncertainties and factors, including, but not limited to those described in disclosures, in particular in the chapter Risks in the Annual Report. Should one or more of these risks or uncertainties materialize, or should underlying expectations not occur or assumptions prove incorrect, actual results, performance or achievements of Siemens may (negatively or positively) vary materially from those described explicitly or implicitly in the relevant forward-looking statement. Siemens neither intends, nor assumes any obligation, to update or revise these forward-looking statements in light of developments which differ from those anticipated.
