

Activity

SHORT DESCRIPTION

Activity is a leading provider of LoRaWAN®-based IoT connectivity infrastructure and geolocation solutions. Partnering together with **Siemens**, we provide a complete end-to-end solution.

JOINT VALUE PROPOSITION

+

Siemens as integrator & full solution provider

Siemens acts as a full service provider integrating Activity's state of the art connectivity infrastructure and hardware (gateways).

All data is centralised on one platform and makes smart buildings/factories real.

+

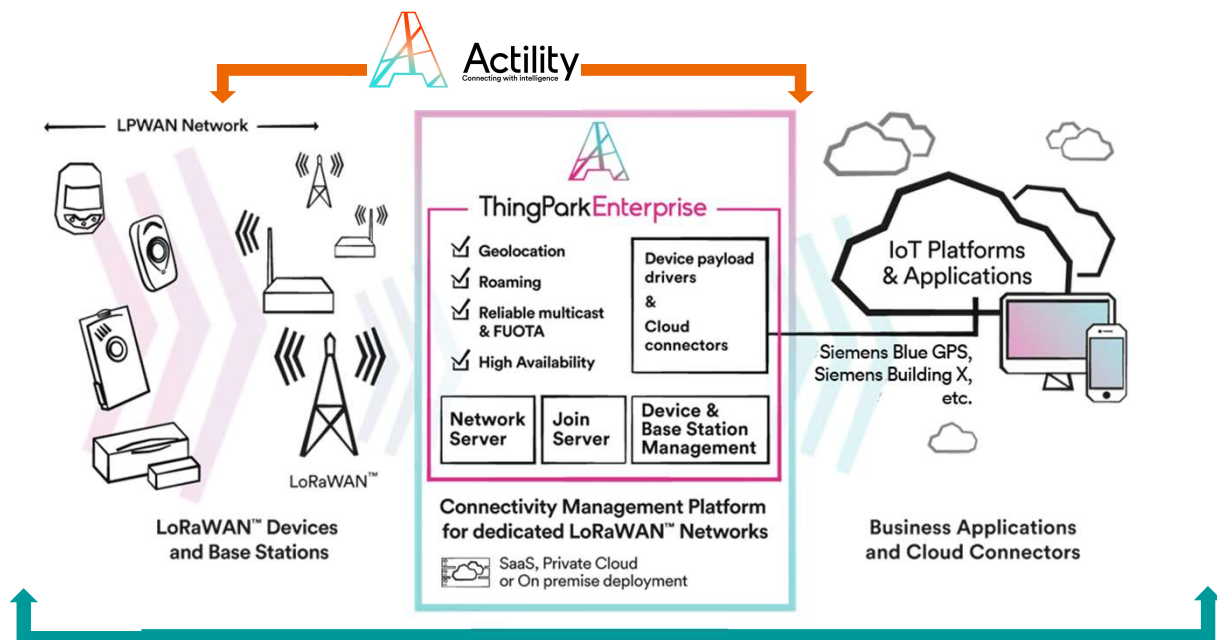

Activity as expert on IoT connectivity

Activity, a co-inventor of LoRaWAN® technology, is the leader in LPWAN connectivity and IoT tracking solutions, operating on a global scale.

+

Abeeway as hardware provider for geolocation solutions

Activity's subsidiary Abeeway, provides hardware for tracking use cases as well as LoRaWAN® infrastructure which is completed by the Siemens BlueGPS business application.

SIEMENS

“Our partnership with Siemens marks a powerful synergy in the IoT landscape. By combining Siemens' full-service integration capabilities with Activity's leading LoRaWAN®-based connectivity and geolocation expertise, we are delivering a truly end-to-end solution that empowers industries to achieve new heights in efficiency and innovation.”

Olivier Hersent CEO, Activity
