Scope: **Digital Industries (DI)**

- Sale of solutions, systems and services (electrical and automation) for industrial plants, covering design, feasibility analysis, project management, engineering, installation and after-sales for discrete, hybrid and process industries.
- Sale of products (electrical and automation) covering distributors of electrical materials, panel manufacturers, OEM (Original Equipment Manufacturers) and End Customers.

**Smart Infrastructure (SI)**  
Product sales, projects, development, systems, services, software, solutions and repairs, contemplating:

- Products for Detection, Alarm and Fire Fighting Systems and Building Automation Systems.
- Equipment for power distribution in low and medium voltage and devices for activating, protecting, monitoring, and controlling low voltage motors.
- Logistics services for materials, products, and equipment in the segments of pulp & paper, mining, oil & gas, automotive, logistics, machine manufacturer, cargo lifting, food, beverage, sugar & alcohol, chemical, water & wastewater, pharmaceutical, and electrical material distributors, comprising reception of goods; internal and external storage and product movement; product separation, shipping and transportation, customer returns.
- Electrification and Automation
- Solutions in development, implementation, maintenance, and software support for customers in the sector of generation, transmission, and distribution of energy
- Software for automation and energy management; smart metering - Smart Grid applications, Operation and Control Centers.

Proof has been furnished by means of an audit that the requirements of NBR ISO 14001:2015 are met.

Validity: The certificate is valid from 2023-10-13 until 2026-10-12.
