

Munich, Germany, January 27, 2009

9,500 shareholders attended the Siemens Annual Shareholders' Meeting

Interest in the Annual Shareholders' Meeting of Siemens AG continues unabated in 2009. Some 24,000 shareholders have ordered tickets for the event in Munich's Olympiahalle. About 11,000 shareholders ordered tickets online via the Internet. Some 63,000 registered to receive meeting documents electronically. By way of comparison: in 2008, roughly 26,000 shareholders ordered tickets and over 12,000 came to the Olympiahalle. The 9,500 shareholders attending represented more than 45 percent of Siemens AG's capital stock.

To speed admission, visitors were identified by radio frequency identification technology in the ticket. The computer center calculated attendance figures and vote results in real time. The Olympiahalle in Munich was too small to hold all the visitors. Additional tents – including a two-story tent of 2,500 square meters – were linked to the main hall to form a carpeted complex with a total surface area of 7,000 square meters. These measures ensured that everyone had a seat and – via video screens – a clear view of the central podium. For the public address system with its 60,000-Watt loudspeakers and the lighting system, a total of 25 kilometers of cables had specially been laid.

A total of 430 service personnel (340 catering staff, 40 kitchen staff and 50 cooks) were on hand to meet visitors' gastronomic needs with, for example, 12,000 liters of soft drinks, 80,000 cups, 25,000 helpings of cream and fresh coffee brewed from 210 kilos of beans. About 34,000 sugar stick sachets, 20,000 pastries and, last but not least, a total of some 2.5 tons of assorted meat and sausage products were also provided.

In the foyer, Siemens showcased its Environmental Portfolio comprising products and solutions for high-efficiency power generation and ecofriendly energy consumption. Visitors could also look at Siemens' latest computed tomography system – the Somatom Definition Flash, which produces razor-sharp images of the beating heart in only a fraction of the time and with only a fraction of the radiation required by conventional CT scanners.

Siemens AG (Berlin and Munich) is a global powerhouse in electronics and electrical engineering, operating in the industry, energy and healthcare sectors. The company has around 430,000 employees (in continuing operations) working to develop and manufacture products, design and install complex systems and projects, and tailor a wide range of solutions for individual requirements. For over 160 years, Siemens has stood for technical achievements, innovation, quality, reliability and internationality. In fiscal 2008, Siemens had revenue of €77.3 billion and a net income of €5.9 billion (IFRS). Further information is available on the Internet at: www.siemens.com.
