SIRIUS 3SK
Safety Relays
What is safety?
Safety defines a state in which the risk of damage is reduced to a tolerable level, or which can be regarded as risk-free. Functional safety refers to the protection of people, machinery, and the environment.

Safety function:
A safety function describes the reaction of a machine/plant when a specific event occurs (e.g. opening of a protective door). Execution of the safety function is performed by a safety-related control system, which usually consists of three subsystems:

- Monitoring the safety functions of the sensors
- Monitoring the sensor leads
- Monitoring correct functioning of safety relays
- Monitoring the actuators in the switch-off circuit
- Safety-oriented disconnection when hazards arise

Machine manufacturers are obliged to perform a risk assessment to identify all the hazards associated with their machinery, to assess and evaluate the risks, and to design and construct their machinery taking such hazards into account. For most safety functions, the risk assessment requires safety level SIL 2 or SIL 3* or PL d or PL e**.

Save costs by avoiding damage
Possible cost traps:
- Production loss/machine downtimes during repair
- Replacement/repair of damaged machines
- Higher insurance premiums caused by accidents
- Fines/lawsuits after accidents/sickness

Clear added benefit
- Legal certainty
- Increased export opportunities: fulfilling the requirements of the Machinery Directive is a prerequisite in many markets
- Increased productivity due to high machine availability
- Fewer industrial accidents and associated cost savings

SIRIUS 3SK1 safety relays comply to the most stringent requirements of IEC 61508 or IEC 62061 (SIL 3) as well as EN ISO 13849-1 (PL e) and therefore fulfill the latest safety standards. So move to the new generation of safety relays now.

* according to IEC 62061 or IEC 61508 ** according to ISO 13849
Which sensors can be connected?

Mechanical and electronic sensors:

- SIRIUS 3SE5 position/safety switches
- SIRIUS 3SE6 non-contact safety switches
- SIRIUS ACT EMERGENCY STOP 3SU18 command devices
- SIRIUS ACT 3SU1 two-hand operation consoles
- SIRIUS 3SE29/39 foot switches
- SIRIUS 3SE7 cable-operated switches
- Pressure-sensitive mats, laser scanners and more

How can you perform quick, flexible evaluation?

Whereas regular 3SK1 safety applications can be quickly and simply expanded with inputs and outputs using innovative device connectors, demanding safety functions are now also easy to implement on the new 3SK2 devices with simple drag-and-drop parameterization.

SIRIUS 3SK1 Hardware benefits at a glance

- Reduced product variety by bundling functions – with cost savings due to reduced stocks
- Slimline design and innovative award-winning enclosure concept – for more space in the control cabinet
- Screw-type and spring-loaded (push-in) connections available at the same price – for less wiring work
- Flexible expansion with modular product concept – for simple adaptation to new circumstances
Which actuators can be connected?

SIRIUS 3RT contactors

SIRIUS 3RA6 compact starters

SIRIUS 3RM1 motor starters

**SIRIUS 3SK2**

Software benefits at a glance

- Easy setup of complex safety applications with drag-and-drop
- Efficient commissioning using test mode, forcing and extensive diagnostics
- Faster preparation of documentation
- Seamless engineering thanks to integration into the TIA Portal

**Engineering with SIRIUS Safety ES TIA**

#### Standard basic units

**With relay outputs**
- 0.05 to 3 s: 24 V DC, 3, 1
- 0.5 to 30 s: 24 V DC, 2/2 tv
- 5 – 300 s: 24 V DC, 2/2 tv

**With semiconductor outputs**
- 0.05 to 3 s: 24 V DC, 3, 1
- 0.5 to 30 s: 24 V DC, 2/2 tv
- 5 – 300 s: 24 V DC, 2/2 tv

**Input expansion module 17.5 mm**
- 24 V DC

**Output expansion module 22.5 mm**
- 24 V DC

Security information
In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens’ products and solutions constitute one element of such a concept. For additional information on industrial security measures that may be implemented, please visit
siemens.com/industrialsecurity
