

Industry Services for Cement Plants

We help achieve increased Productivity, Flexibility and Efficiency

Siemens support cement industry with comprehensive 'Industry Services' throughout the entire life cycle of machines and plants reliably and with a forward looking perspective. With global experience and with functional expertise, Siemens is conversant with Industrial key requirements and industry specific standards. That means with our services we effectively support our customer's hardware, software and network architecture in production & thus maximizing asset availability, energy efficiency, and flexibility over the long term.

Siemens Industry Services offer:

Life Cycle Services

- Technical Support
- Service Contracts
- Field Service
- Spare Parts
- Repair Services
- Retrofit Solutions

Value Services

- Integral Plant Maintenance
- Energy & Environmental Services
- Condition Monitoring & Reliability
- Metallurgical Services
- SITRAIN (Training)

Based on your business goals & thus on your individual requirements, we offer customized service packages that will help improve your company's success for the long term within a win-win partnership

Facts & Figures

Achieve up to **99 percent** plant availability for complete electrical & instrumentation

More than **500+** Service engineers are available on-call, on-site and on-line, all across India

Being closer to customers with training centers in more than **8 cities**

Energy costs can be reduced significantly

Zero Harm Culture

Highlights

- Performance based Integral Plant Maintenance for entire Electrical, Mechanical & Instrumentation.
- Energy Consultancy Audits, Smart reporting for Energy Data Management and implementation of solution leading to better energy efficiency and reduced Specific Energy Consumption
- Monitoring of critical equipments e.g. Cement Mill, Kiln, Crushers etc, and Process Parameters like temperature, lubrication, pressure, current etc. Remotely monitoring and analyzing real time plant data and providing support for diagnosis over secured network.
- Silver, Gold and Platinum contracts for annual maintenance of our equipments; ensures maximum availability at optimum maintenance costs.
- Comprehensive Motor Management Programs to identify critical motors, determine efficiency with analytical methods and provide recommendation / implementation of solutions to increase motor performance & reliability.
- Repair and Replacement services to ensure optimal availability of your plant.
- Retrofit solutions for enhancing your machine & process capabilities.
- Customized trainings - on and off site, available for Industrial Automation, Drives, Motors, Gear boxes, Switchgears, Instrumentation & Mechatronics.
