From Goal to Action – The Roadmap to Carbon Neutral Lempäälä 2030

Carbon neutrality by the year 2030 is an ambitious goal which the Municipality of Lempäälä among other Finnish forerunner municipalities have adopted. How does a middle-sized municipality turn that goal into action? Get to know Project LEMENE and other steps towards measurable greenhouse gas emissions reduction.

About Kati:

Experienced Environmental Manager with a long history working in the public sector on environmental issues. Her specializations include Environmental Legislation, Water and Wildlife Conservation, Climate Change and Sustainability. Kati has a degree in Master of Philosophy - MPhil focused on Biological Sciences, Ecology, Hydrobiology and Environmental care from The University of Jyväskylä.

#IEEE@Siemens2021

“It is time to act and contribute to the reduction of greenhouse gases. Even a middle-sized municipality can be a forerunner in technology and leadership to find climate solutions and set an example to others.”
