

Reducing energy use

Scenario
Wasted energy
In mixed use buildings, residents often lack visibility into their energy use, resulting in wasted energy and high utility bills

Significance
Cost structures
Building owners can optimize their cost structures by encouraging tenants and residents to modify their behavior to reduce energy use

Partner
Copper Labs
Wireless energy monitoring delivers real-time data from utility meters to give residents and tenants insights into how they're using energy

Integration
Copper + Desigo CC
Copper integrates with Desigo CC to capture real-time data using existing meters, helping customers shape their demand curve and manage energy loads

Benefits
Achieving efficiency
With actionable information at their fingertips, customers can maintain energy efficient strategies without sacrificing comfort
