

## Siemens is number one in sustainability

- **Dow Jones Sustainability Index ranks Siemens as most sustainable company in its industry group**
- **Company scores 81 out of 100 possible points**
- **Global leader in six categories, including innovation and cybersecurity as well as industry- and product-related environmental protection**

In the Dow Jones Sustainability Index (DJSI), Siemens has taken first place among the 45 companies included in the ranking of its industry group. The DJSI is a globally established sustainability ranking prepared annually by the investment company Standard & Poor's on behalf of index provider Dow Jones. Siemens has been included in this ranking every year since 1999, when the DJSI was first published.

In the current ranking, which was published on November 12, 2021, Siemens received a very positive overall assessment and scored 81 out of 100 possible points. The company also secured a top global position in the areas of social and environmental reporting, innovation, and cybersecurity as well as in product- and industry-related environmental protection. In addition to economic criteria, the DJSI also considers ecological and social aspects.

"For us, sustainability is a business imperative and an integral part of the company strategy," said Judith Wiese, Chief People and Sustainability Officer and member of the Managing Board of Siemens AG. "This recognition, therefore, confirms that our strategy is on the right track. With our new DEGREE framework, we're taking yet another step forward and have once again considerably intensified our efforts for achieving more sustainability."

Siemens presented DEGREE at its Capital Market Day in June 2021. This new strategic framework is the guideline for all Siemens businesses worldwide – with clearly defined priorities and measurable ambitions across the environment, social and governance (ESG) sustainability dimensions. Each letter in DEGREE stands for a dimension in which Siemens intends to put even more effort into driving progress: “D” stands for decarbonization, “E” for ethics, “G” for governance, “R” for resource efficiency, and the double “E” at the end for equity and employability for the people who work for Siemens.

Further information on DEGREE and sustainability at Siemens are available at:

**Siemens AG** (Berlin and Munich) is a technology company focused on industry, infrastructure, transport, and healthcare. From more resource-efficient factories, resilient supply chains, and smarter buildings and grids, to cleaner and more comfortable transportation as well as advanced healthcare, the company creates technology with purpose adding real value for customers. By combining the real and the digital worlds, Siemens empowers its customers to transform their industries and markets, helping them to transform the everyday for billions of people. Siemens also owns a majority stake in the publicly listed company Siemens Healthineers, a globally leading medical technology provider shaping the future of healthcare. In addition, Siemens holds a minority stake in Siemens Energy, a global leader in the transmission and generation of electrical power.

In fiscal 2021, which ended on September 30, 2021, the Siemens Group generated revenue of €62.3 billion and net income of €6.7 billion. As of September 30, 2021, the company had around 303,000 employees worldwide. Further information is available on the Internet at [www.siemens.com](http://www.siemens.com).
