

SIMATIC PCS 7 Modernization

Sales Slides

Modernize your SIMATIC PCS 7 System with SIMATIC PCS 7 Modernization

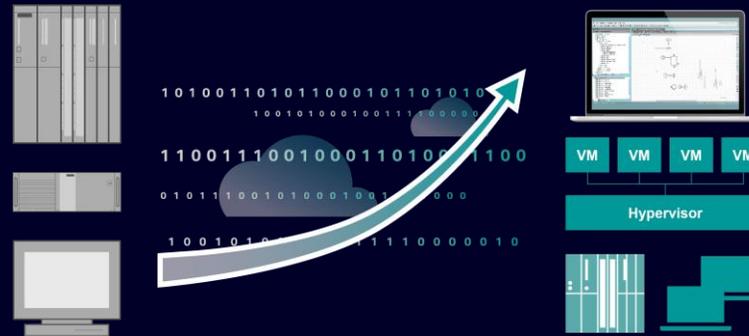

DCS Modernization Services provide holistic and tailored support for the modernization of DCS systems and the preparation for upgrading to SIMATIC PCS neo.

To ensure continued operational excellence and leverage the latest technological advancements, SIMATIC PCS 7 Modernization is a crucial step for future-proofing your industrial processes.

Solution and Service

According to the customer priorities, different solutions are possible for our DCS Modernization Service:

- Project execution at HQ with experienced lead engineer
- Conversion to the current state with additional options
- Minimal risk (extensive HQ FAT in advance, simulation)
- Cost-effective conversion (without new functions)
- Partial services

Your value

High quality of the upgrade and thus short stop times

Clear responsibilities and many years of modernization expertise

Benefit from greater future-proofing by preparing for future systems

Challenge

Are the SIMATIC PCS 7 hardware and operating systems outdated?

How can we effectively address the challenges of **ensuring continuous and safe operation for a modernized SIMATIC PCS 7 system** over its full operational lifespan?

How can we overcome the challenges of **ensuring ongoing serviceability and technical support for SIMATIC PCS 7 systems** after a modernization?

How can **current cybersecurity standards be effectively integrated and continuously maintained** during and after a modernization of SIMATIC PCS 7?

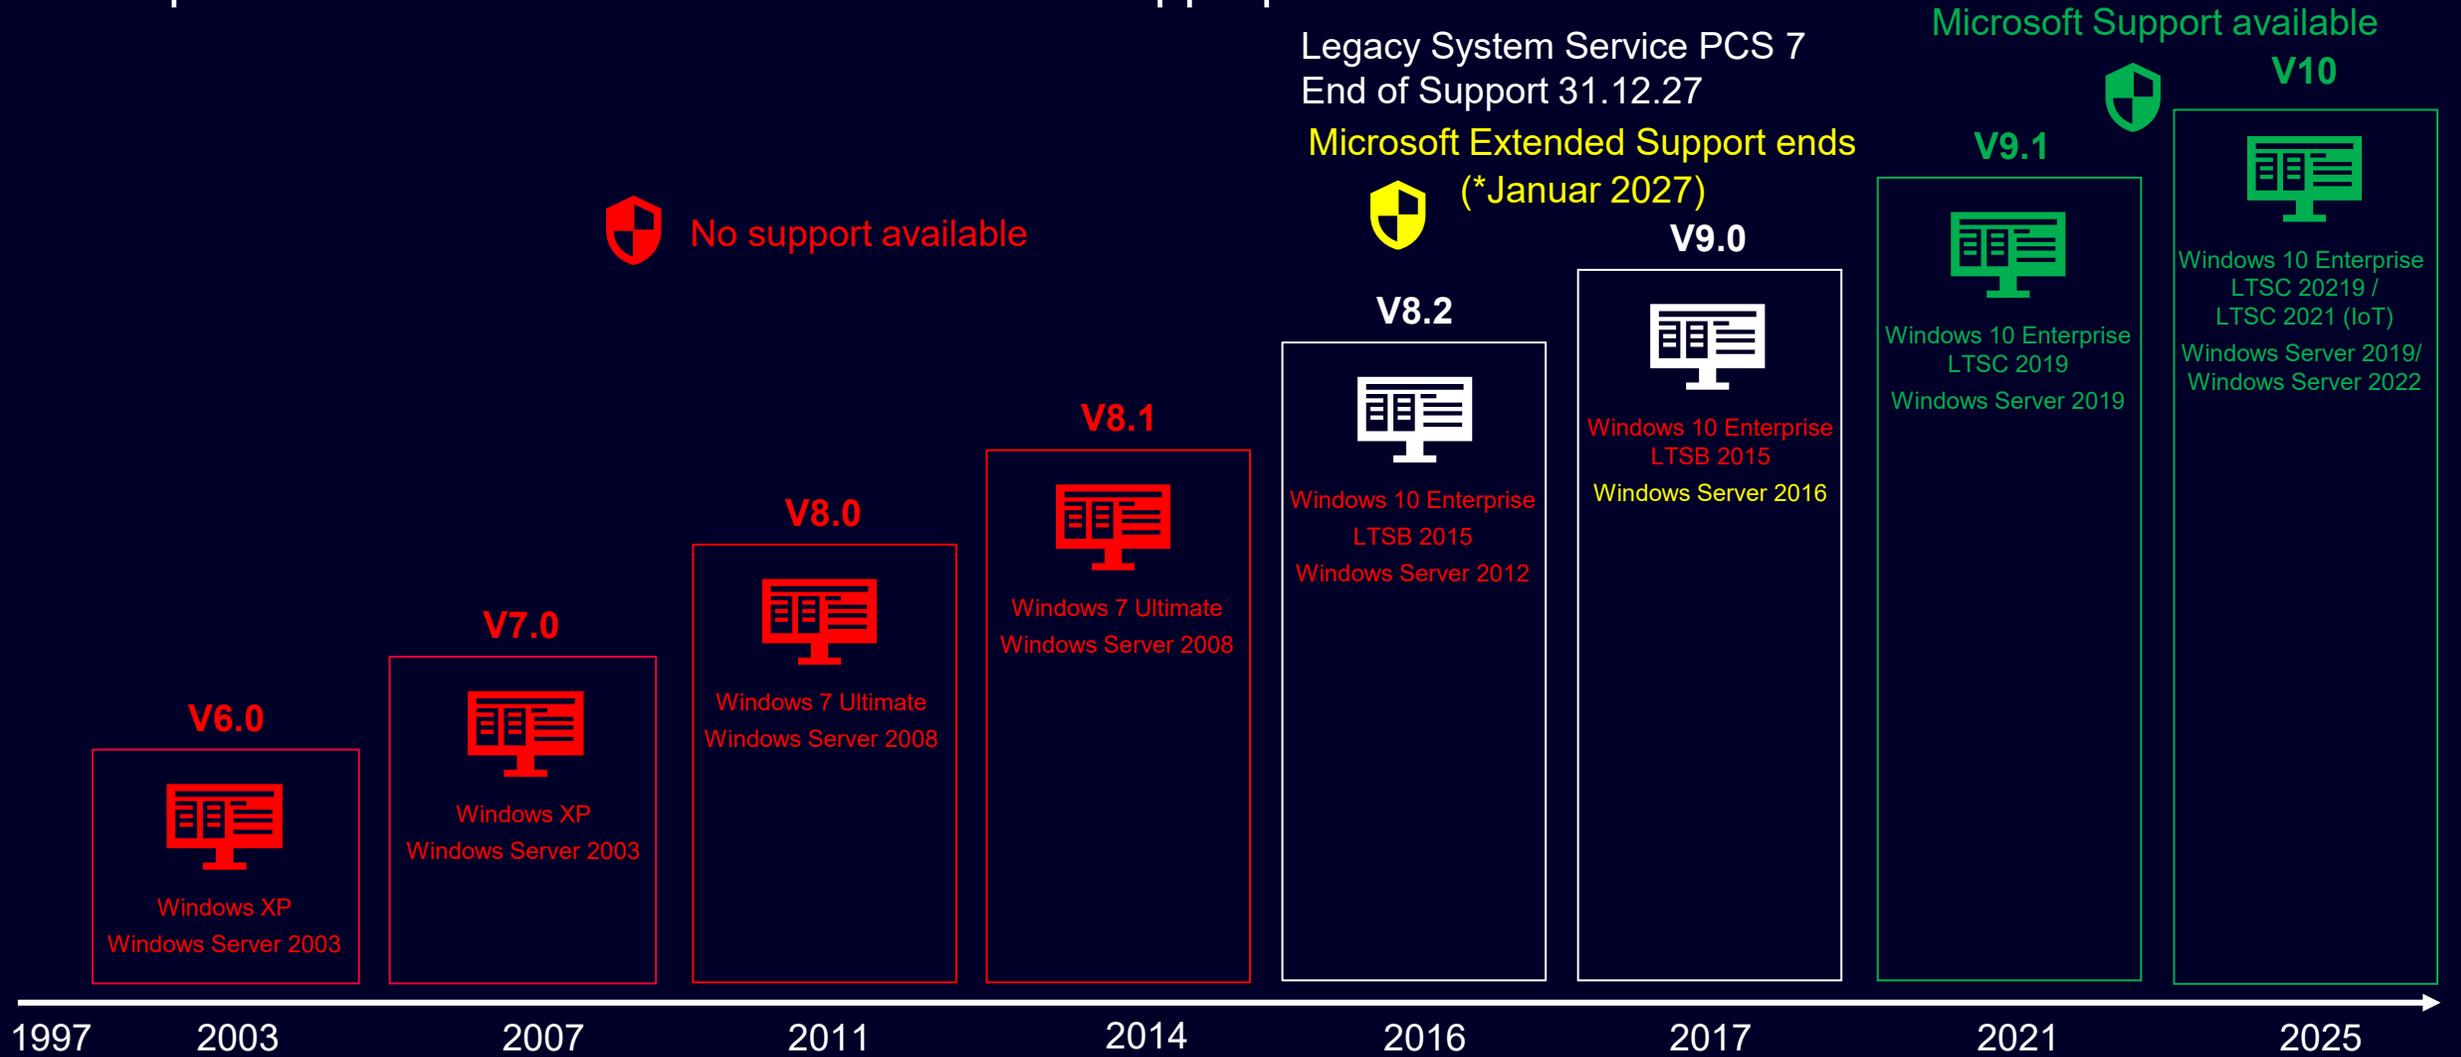

How can **long-term investment protection and future-proofing** for a SIMATIC PCS 7 modernization project be secured?

More than 20 years of Microsoft Windows

Modernization of SIMATIC PCS 7 Systems

SIMATIC PCS 7 Modernization

The modernization will be carried out jointly with Siemens Region

Possible work packages:

- Project analysis
- Installation and setup of the new HW (IPC or virtual)
- Project upgrade SIMATIC PCS 7 to current status
- Library exchange to APL (Ready for SIMATIC PCS neo)
- Standardization (preparation for lifecycle service contract)
- HQ-FAT¹ at own test installation also remotely
- Commissioning support

Options:

- Image adaptations for widescreen monitors with new resolution – SIMATIC PCS 7 OS PDL's
- Conversion to new curve design – SIMATIC PCS 7 OS / Trends
- Conversion and standardization of CFC structures to CM/ CMT² – SIMATIC PCS 7 Engineering
- SIMATIC Process Historian / Information Sever upgrade

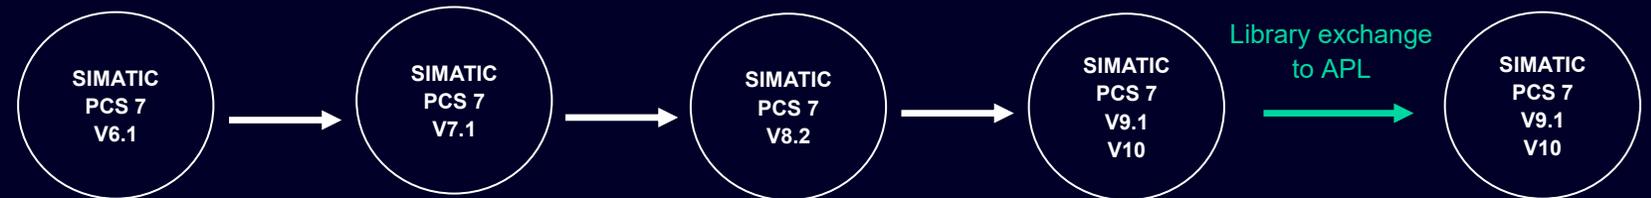

¹ Head Quarter Factory Acceptance Test; ² Control Modul/ Control Module Type

Modernization of SIMATIC PCS 7 Systems

SIMATIC PCS 7 Modernization offer...

- Upgrades of older SIMATIC PCS 7 versions to the current version
- Optional preparation for future conversion to SIMATIC PCS neo
- Preparation of the system for a lifecycle service contract
- Support for the modernization of TELEPERM M systems

Possible priorities

- Conversion to the current status with all available options.
- Cost-effective conversion (without new functions)
- Minimal technical risk (extensive testing in advance)
- Short or no downtimes

One-stop Service

Additional services

- Library exchange to APL¹
- Virtualization with SIVaaS²
- Process Historian upgrades with SIDS³
- Advanced project processing with HQ- FAT⁴

According to the customer priorities different solutions are possible

- Project execution at HQ with experienced lead engineer
- Conversion to the current state with additional options
- Minimal risk (extensive FAT in advance, simulation)
- Cost-effective conversion (without new functions)
- Partial services possible

1 Advanced Process Library; 2 SIMATIC Virtualization as a Service;
3 SIMATIC DCS/SCADA Infrastructure; 4 Head Quarter Factory Acceptance Test

SIMATIC PCS 7 Modernization

DCS Application und DCS Modernization Services

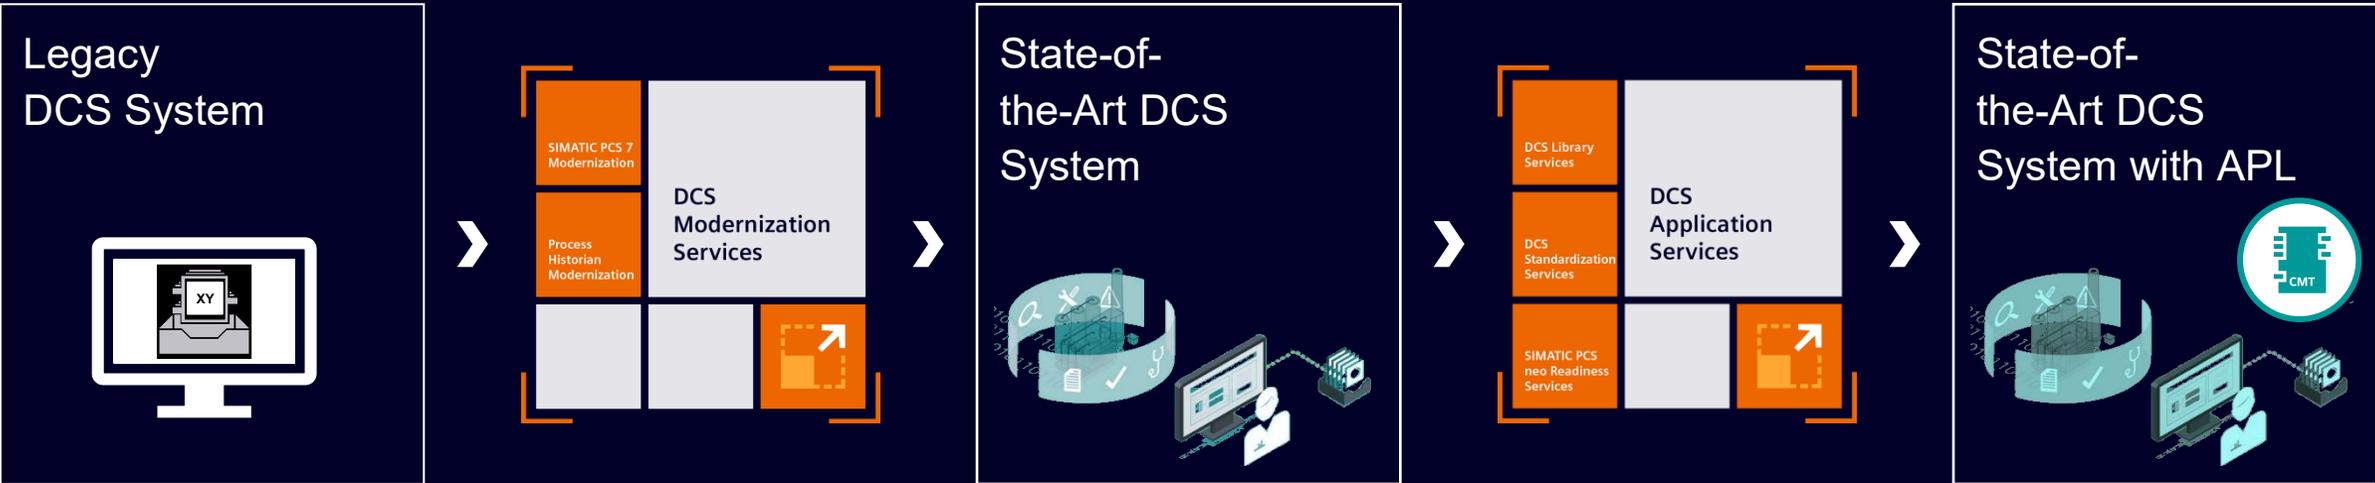

Modernization

Software Upgrade

e.g. SIMATIC PCS 7 V6/7 → SIMATIC PCS 7 V10,
Process Historian (PH) Data Services

Application Modernization

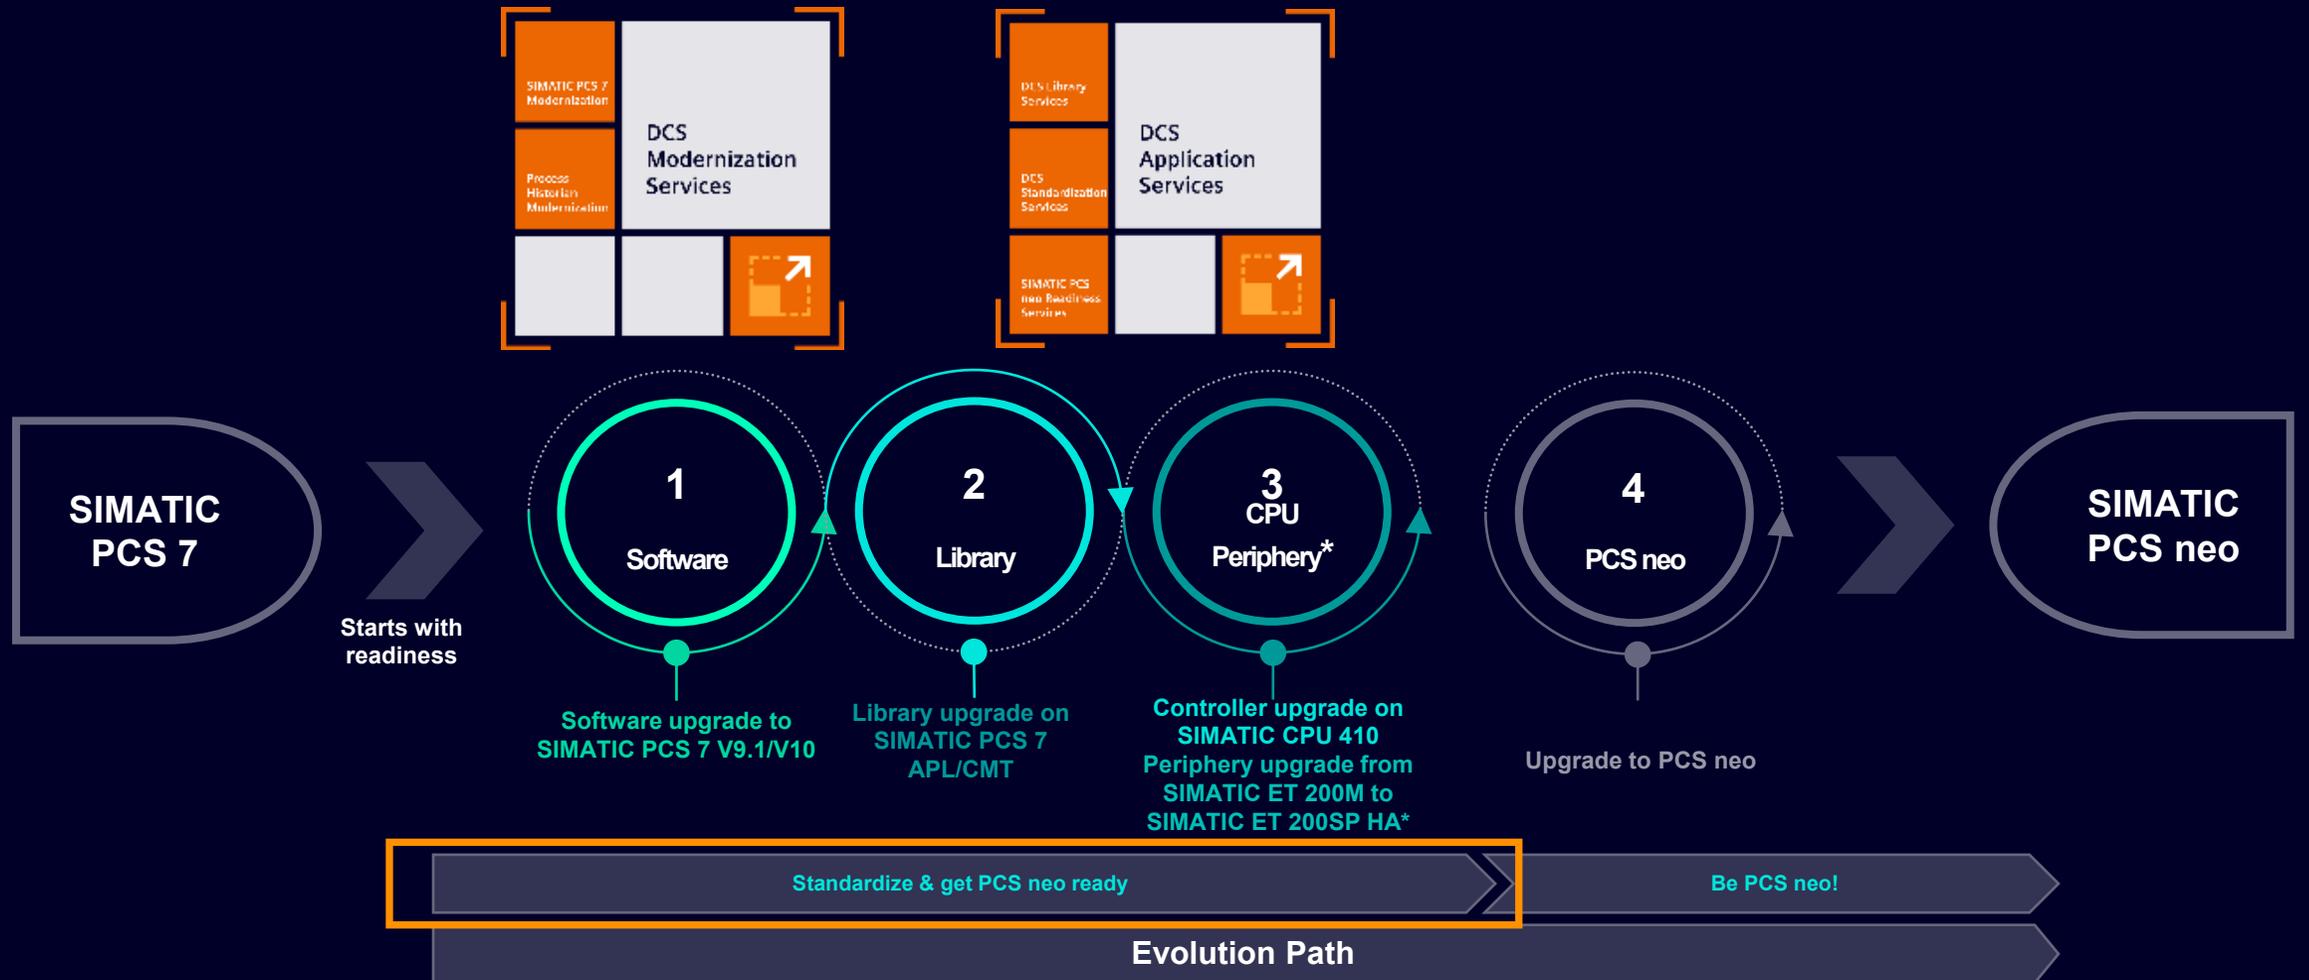

e.g. SIMATIC PCS 7 Library → APL¹

¹ APL: Advanced Process Library

DCS Application & Modernization Services

Modular Modernization approach – Evolution path from PCS 7 to PCS neo

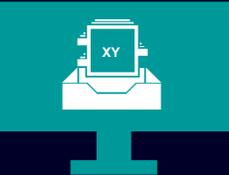

*While this step is not critical for the overall evolution, it is recommended to ensure a long-term plant lifecycle.

SIMATIC PCS 7 Modernization

Positioning within the modernization portfolio

Legacy System

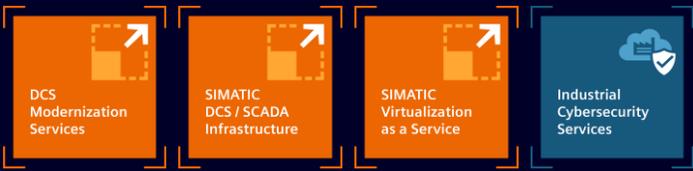

Standardized Modernization Portfolio Elements

Application Upgrade

System Upgrade (z.B. SIMATIC PCS 7 Version X → SIMATIC PCS 7 Version Y)

Zusatzpakete

State-of-the-Art System

Service Contracts

Why should you choose SIMATIC PCS 7 Modernization?

Proven Services from one single source

Benefit from a comprehensive modernization expertise for clear responsibilities and minimized downtimes of your plant.

Automated Workflows

Ensuring high quality, driven by the innovative use of current and future DCS technologies.

Secured long-term investment protection

By reducing time and costs associated with future system upgrades.

Highlight from DI CS PA regarding DCS Modernization Services

Petrochemical Company

This consortium (formed by three companies) is a pioneer in industrial development within a key region, focused on fostering private investment in the petrochemical sector.

Customer objectives

- Reduce maintenance costs for equipment - the current SIMATIC PCS 7 hardware is outdated and the MFL library is no longer supported.
- Initiation of cybersecurity measures, as the current SIMATIC PCS 7 system does not include cybersecurity measures.

Solution and Service

- Siemens local DI CS SA team cooperate with Siemens DI CS HQ team
- DI CS Upgrade Factory portfolios were used throughout the project:
 - AS/OS Analysis for details of the project
 - Library exchange from MFL to APL using DCS Library Services (DCS Application Services)
 - Changeover to SIMATIC Virtualization as a Service (SIVaaS) system
 - DI CS HQ/ SA technical experts to perform the entire SIMATIC PCS 7 Upgrade using DCS Modernization Services from HQ with Factory Acceptance Test on original customer Hardware in Karlsruhe, Germany with handover to SIEMENS SA

Customer benefits

- Saving energy and maintenance costs with the new SIVaaS system
- Prevention of maintenance costs for legacy systems
- Increased reliability and stability of the system
- Achieving a certain level of cybersecurity and flexibility to expand after the upgrade

Highlight from DI CS PA regarding DCS Modernization Services

Utility and Energy Company

This publicly listed, European-headquartered company is a leader in essential utility and environmental solutions, including water, waste, energy, and transport. It employs approximately 171,000 people globally.

Customer objectives

- The Company wanted to migrate the plant to SIMATIC PCS 7 to ensure plant operation and to modernize the software and hardware.
- Later, upgrading to the current version and replacing the library was important to regain serviceability and remain innovative.

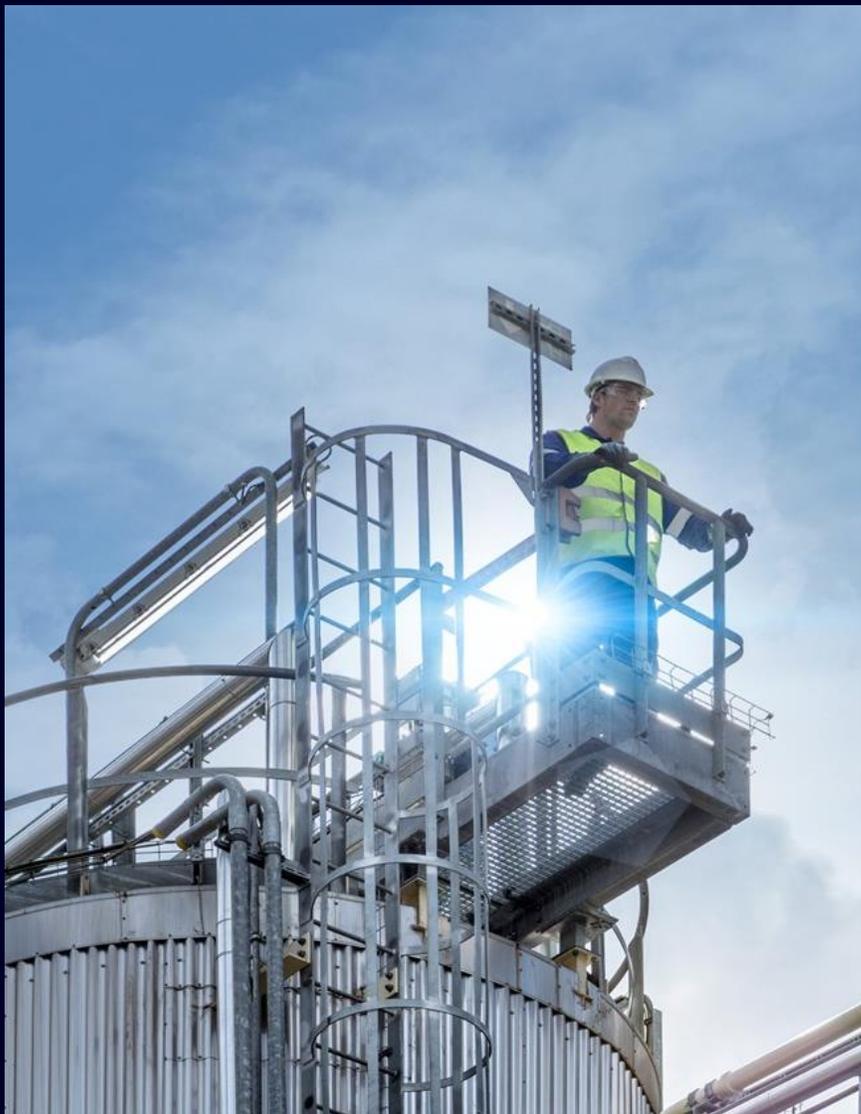

Solution and Service

- 2008: Modernization of Teleperm to SIMATIC PCS 7 V7.0
- 2020: Phase 1: Upgrade SIMATIC PCS 7 V7.0 > V9.0 SP2 DCS Modernization Services, SiVaaS, SIDS (Backup & Restore, PH)
- 2021: Phase 2: Library replacement to APL (DCS Library Services)
- 202x: Phase 3: Replacement of coupled S5 with SIMATIC PCS 7 integrated solution (in bidding phase)

Customer benefits

- High quality of the upgrade and thus short stop times due to standardized procedure for the upgrade and structured and documented test work.
- By using APL and current SIMATIC PCS 7 version, the plant is serviceable again.
