The growing demand for security and traceability increasingly calls for solutions enabling access to machines and systems which can be regulated and documented. Electronic access management consolidates process security while enhancing productivity and efficiency by preventing damage which could be caused by unauthorized access.

With the new SIMATIC RF1060R reader, Siemens provides an RFID-based solution which enables simple and versatile implementation of electronic authorization management. Existing employee ID provides the basis for identification, which increases user friendliness and minimizes costs.

SIMATIC RF1060R allows realization of finely-graded access concepts, documentation of processes or storage of user-specific instructions to be stored according to the customer-specific application. And all with one card.

**Typical application examples**
- Controlled machine access
- Logging of access data
- Traceability of access and changes
- Individual control of access rights
- Definition of any number of user groups with different access rights
- Integration in the company-wide industrial security concept
Security information
In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens’ products and solutions only form one element of such a concept. For more information about industrial security, please visit  
http://www.siemens.com/industrialsecurity

Highlights
- Individual control of access rights using existing employee ID card
- Diagnostics via 3-color LED status display
- Secure and documented access to machines prevents operating errors
- Simple integration into existing hardware (HMI devices and panels)
- Low installation depth thanks to lean design
- Flexible cable design

Technical specifications
- RFID system in the HF range: Frequency 13.56 MHz
- Standards: ISO 14443 A / B (MIFARE), ISO 15693
- USB port
- Integration into SCADA systems (WinCC, PCS7)
- IP65 degree of protection
- Temperature range -25 to +55 °C
