

The London Animal Hospital: Hire purchase for veterinary practice in the UK

The London Animal Hospital

- Location: London, UK
- Foundation date: 2017
- Services: General and emergency veterinary care

Challenge

- The London Animal Hospital (TLAH) is a veterinary practice and 24/7 animal hospital with state of the art facilities based in London. The practice offers veterinary support to local residents as well as emergency care. It also provides specialist treatments which enables the practice to accept referrals from other veterinary practices.
- TLAH needed to acquire a large range of best-in-class, high-value equipment. For this reason, flexible finance was an essential investment enabler. TLAH worked with its equipment supplier, PLH Medical to source its equipment.

Solution

- PLH Medical is a Siemens Healthineers' distributor for advanced veterinary CT imaging solutions and they recommended to TLAH a turnkey solution with the Siemens SOMATOM go.Now CT scanner, along with a Zoomax 50kW X-ray.
- Siemens Financial Services (SFS) was able to offer a competitive finance solution. SFS reduced upfront costs for TLAH, enabling them to be the first veterinary practice with this state of the art equipment and allowing expansion of the business.

Benefits

-  As a result of direct support from SFS, and given the competitiveness of the offering, the TLAH team didn't need to spend valuable time researching, talking to and comparing other financiers.
-  SFS worked hard to make sure that the finance was implemented smoothly.

“The SFS team are extremely professional and very approachable. The whole process was very smooth and I would certainly be very happy to work with them again in the future.”

David Cuffe, Director, The London Animal Hospital
