PROCESS INSTRUMENTATION

Is your SITRANS F M MAG meter performing at its best?

The SITRANS F M Vericator Service Program is the most cost-efficient way to perform reliable on-site verification

usa.siemens.com/water

There are many reasons to verify the performance of your SITRANS F M electromagnetic flow meter. Whether you need to ensure that the meter's accuracy complies with local agency requirements, provide a customer with a certificate of verification for billing purposes, or simply perform some troubleshooting, the SITRANS F M Vericator Service Program from Siemens is your most cost-efficient solution.

The Verificator Service Program saves money by allowing you to rent a SITRANS F M Verificator for a predetermined amount of time rather than purchasing one outright. This reliable and easy-to-use on-site verification system performs a variety of fully automated tests to check:

- Insulation of the entire flow meter system, including cables
- Magnetic properties of the sensor
- Signal converter gain, linearity and zero point
- Signal converter digital and analog output

And once testing is complete, the Verificator can provide you with printed reports certifying all results.

How it works

To participate in the Verificator Service Program, simply submit a purchase order for your rental period of choice through the normal channels. Your rental will include a Verificator unit, all required software, a step-by-step guide, a checklist and free return shipping.

Wide range of products

The following SITRANS F M electromagnetic sensors can be verified when combined with a MAG 5000 or 6000 transmitter (polyamid and rack mount configuration only):

- MAG 1100
- MAG 1100 F
- MAG 3100
- MAG 3100 HT
- MAG 3100 P
- MAG 5100 W

Saves valuable time

If you don't have the time to print your own reports, no problem! Siemens will be happy to download your test certificates and mail them to you within 48 hours.

Expert on-site assistance

To make the Verificator Service Program even more convenient, a Siemens flow measurement expert can conduct all testing on your behalf. A detailed report will be provided upon conclusion. This option is separate from the equipment rental and will incur an additional expense, so please be sure to ask for it specifically if required.

24/7 technical support

Siemens is always available to walk you through the flow meter troubleshooting process once your Verificator arrives. Just call Siemens Technical Support at 1-800-333-7421 or submit an on-line request at <https://support.automation.siemens.com/us>

For more information about the SITRANS F M Verificator Service Program, please contact Siemens Customer Care at 1-800-365-8766 x4519 or piabusales.industry@siemens.com.
