

The Visual Data Backbone for your Digital Mine

A secure, enterprise-grade platform that unifies visual data from across your mine. From pit to plant, Unleash live transforms video into actionable intelligence to enhance safety, reliability, and operational performance.

THE CHALLENGE

The modern mining enterprise operates on a patchwork of legacy and modern systems. Visual data, IoT, and maintenance platforms rarely communicate, creating noise instead of intelligence. This architectural disconnect limits automation, slows decision cycles, and increases the cost of maintaining safe, efficient, and compliant operations.

TESTIMONIAL

"We've looked at almost a dozen different options and Unleash live has come in as the best performer."
Project Director | BHP

WHY IT MATTERS

System Fragmentation

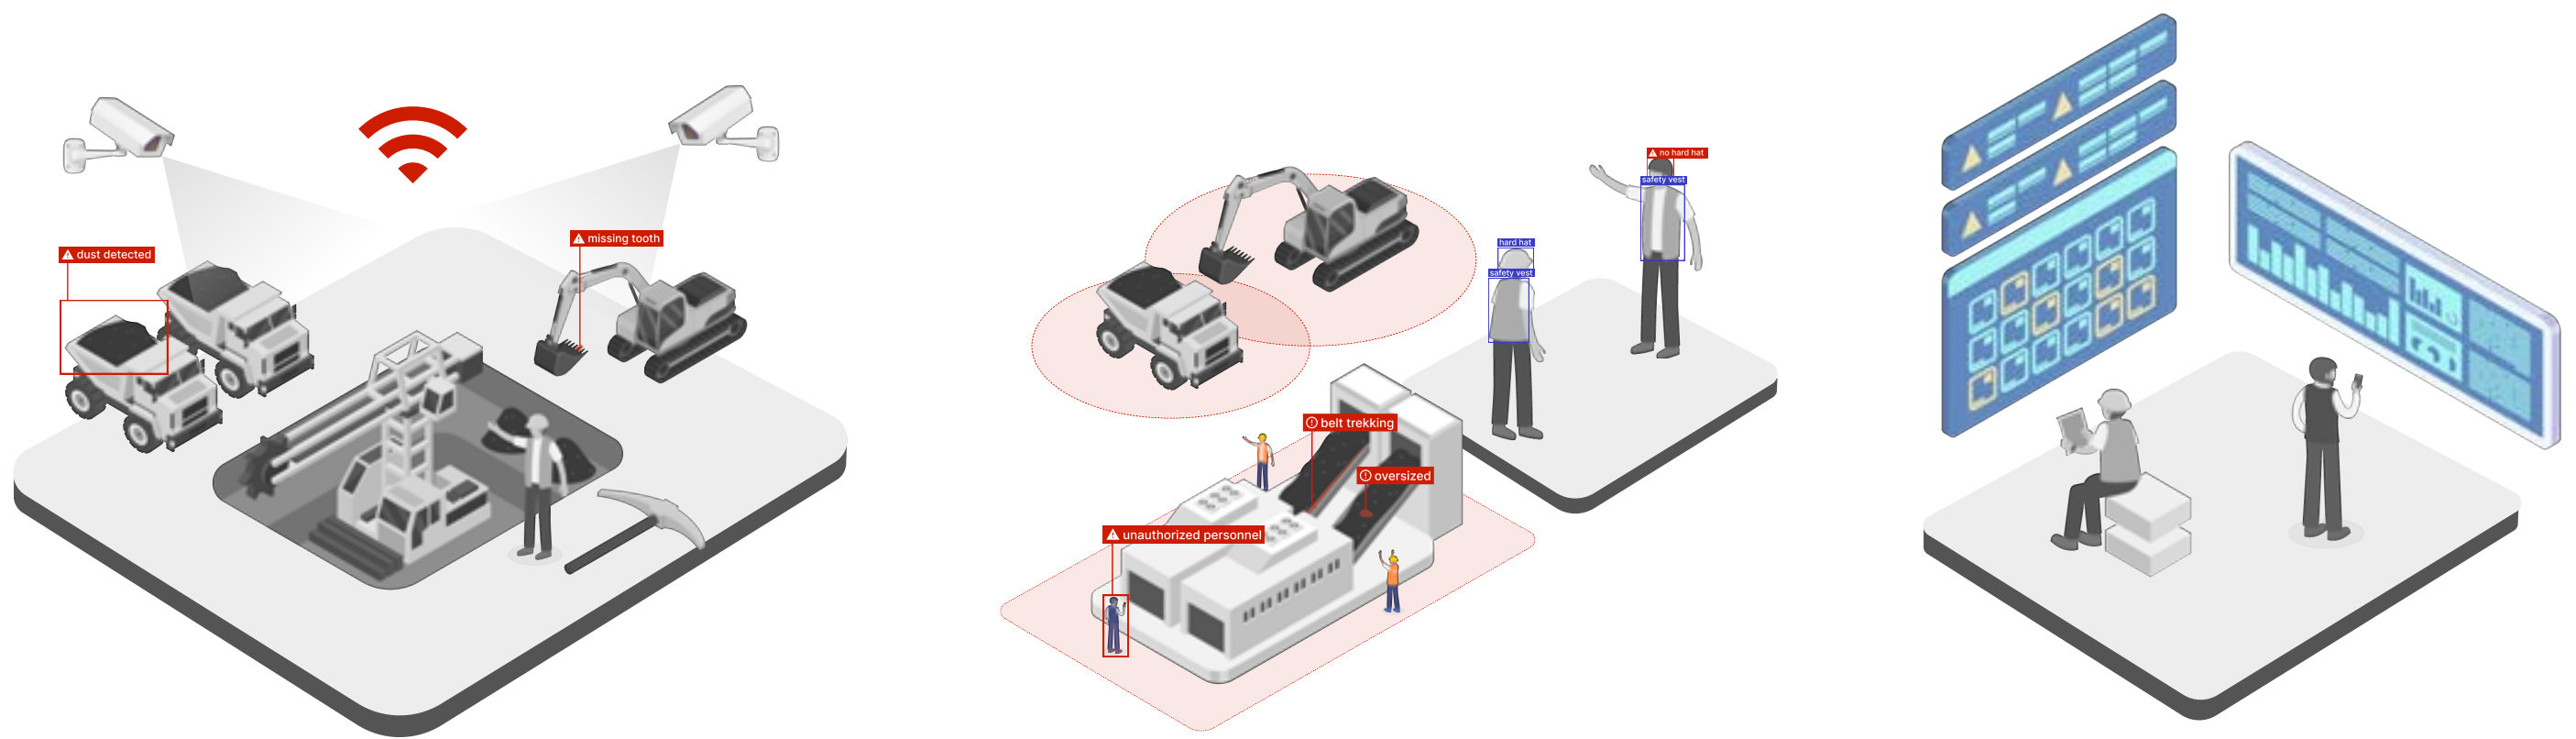

Data Overload

Compliance & Cyber Pressure

THE SOLUTION - UNIFIED VIDEO INTELLIGENCE ARCHITECTURE

Unleash live is a foundational video intelligence layer for enterprise IT, bridging operational systems with cloud, edge, data, and computer vision infrastructure to drive scalable automation and insight. Its modular, cloud-native design integrates with existing systems to securely ingest and process live or recorded video or images from any source, enabling automation, computer vision, and continuous digital evolution.

Livestreaming, Data Collection & Transfer

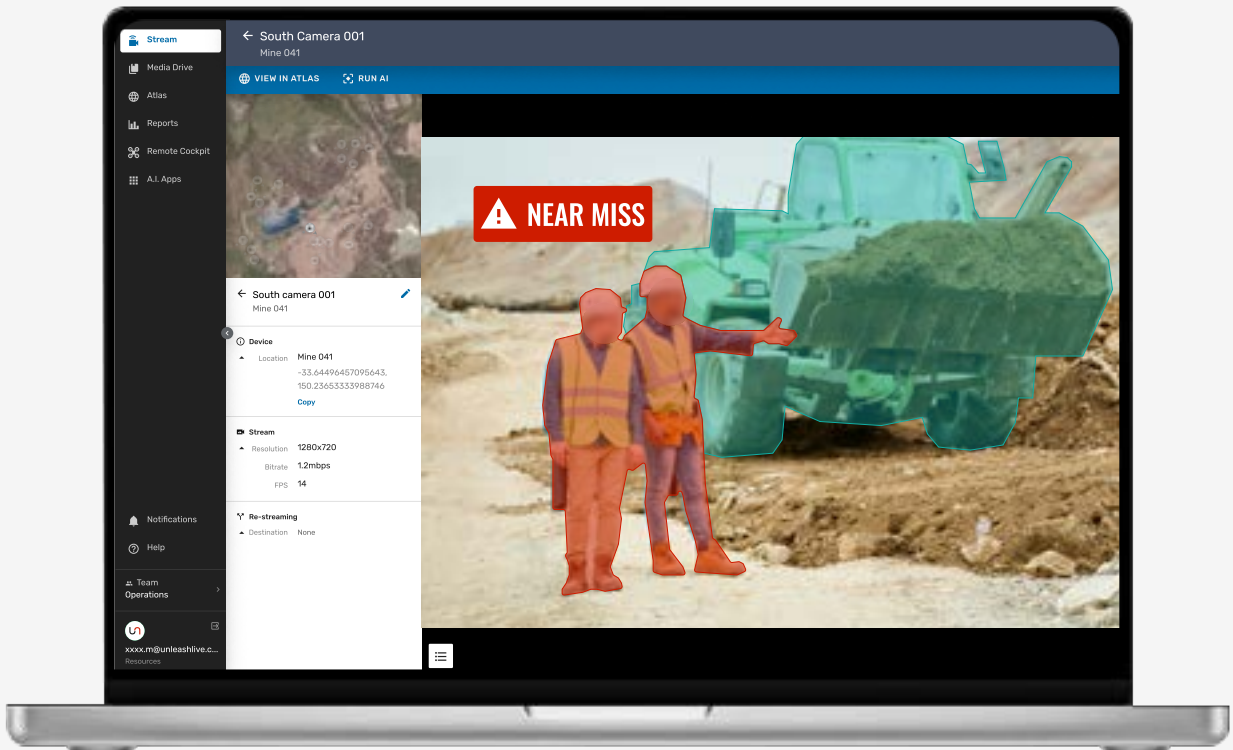

Scaled Deployment of Computer Vision Edge/Cloud Unleash live or BYO Models

Integrated Process Control, Real Time Alerts & Data Workflow

COMPUTER VISION AI ANALYTICS

Built for Industrial Intelligence

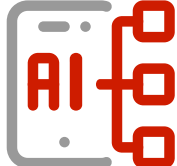

Purpose-built for industrial and resources environments, the platform enables enterprises to build, train, and deploy vision AI models that strengthen safety, compliance, and efficiency. Flexible deployment options and open integration make it the trusted foundation for digital transformation at scale

KEY DIFFERENTIATORS

Data Sovereignty and Control

Continuous Model Evolution

Open, Extensible Architecture

Enterprise Integration & Governance

STANDARD/BESPOKE USE CASE EXAMPLES

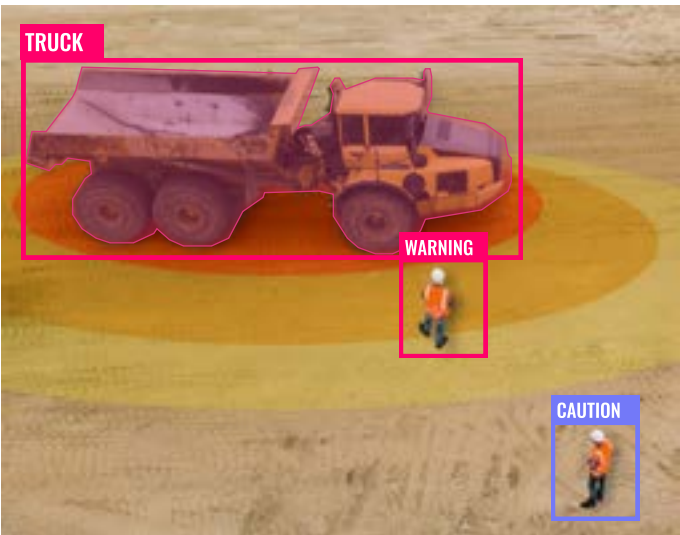

PPE Compliance

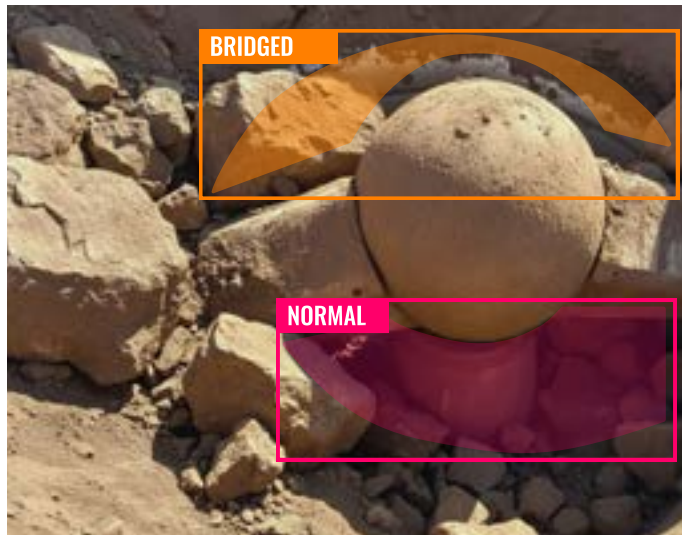

Conveyor Belt Tracking

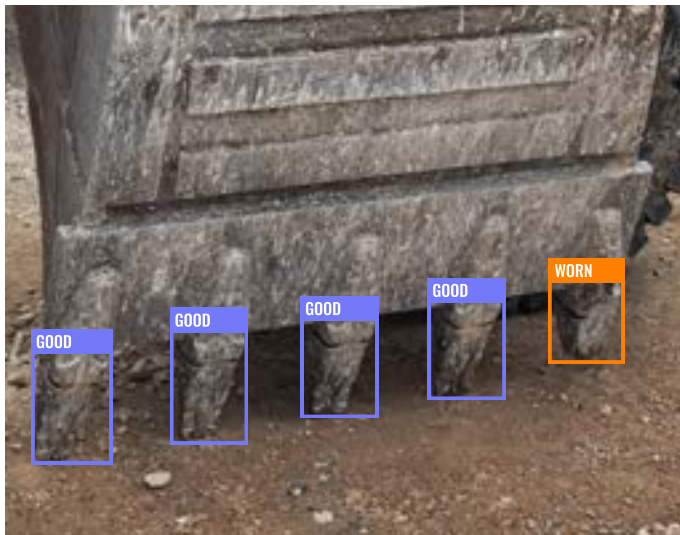

Oversize Detection

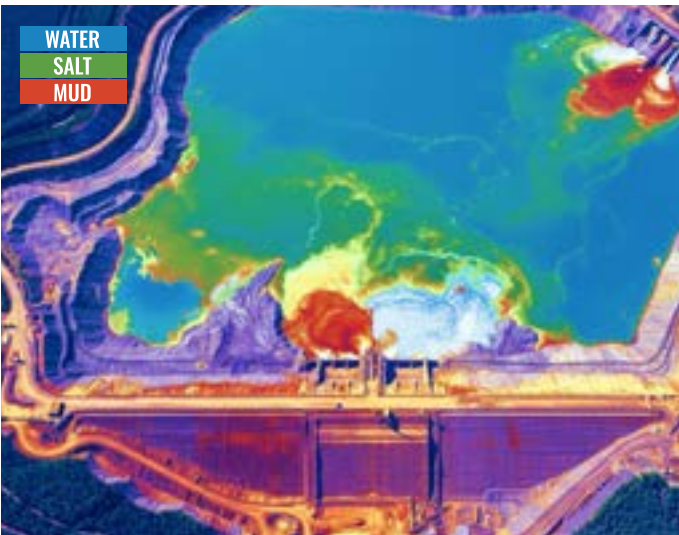

Proximity

Crusher Bridging

Missing GET

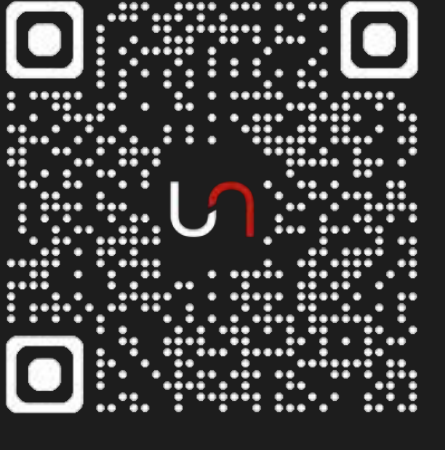

Tailing Dam

Wheel Temperature Gradient

ROI/BENEFITS

With real-time streaming, immediate alerts, and AI-driven insights, Unleash live helps mining operators improve safety, reduce downtime, lower maintenance costs, extend equipment life, and deliver measurable ROI within the first year.

High Performance AI 91% ↑ F1-Score for precision and recall	Equipment Downtime 30% ↓ Reduced conveyor belt downtime	Production Increase 50 hrs ↑ Recovered in crusher downtime	Integration Efficiency 60% ↑ Faster deployment of new analytics	Contact Us SCHEDULE A TECHNICAL DISCUSSION unleashlive.com/contact
