

Jenny Bofinger-Schuster

Jenny Bofinger-Schuster

Senior Vice President for Siemens Sustainability and Operational Excellence

As Senior VP for Sustainability and Operational Excellence, Jenny Bofinger-Schuster leads this Corporate Department, which drives and shapes crucial activities in the new chapter of Siemens AG. Especially in the long term view the two responsibilities of the department will be more and more connected to guarantee a future-proof development of the company.

Her responsibility covers the company's global sustainability program and its implementation. Jenny's professional focus encompasses resource and energy efficiency, sustainability management and Siemens' Business to Society approach, addressing the challenges caused by urbanization, climate change and globalization.

Additionally, since 2021 she drives critical Cross-Business activities with focus on Operational Excellence. This includes Sales Excellence, Service Business Excellence and Product Lifecycle Management. She focuses on the sustainable development of related Siemens processes, tools and approaches to make these functions future ready.

With more than 12 years experience in management consultancy within and outside of Siemens, Jenny Bofinger-Schuster was made a Partner of Siemens Management Consulting. Within that role, Jenny developed trendsetting strategies in areas ranging from mobility to healthcare, around the globe.
