

**Manufacturer's or Supplier's Certification for Capacitors
- Electric Double Layer (EDLC) or Asymmetric -
with an energy storage capacity greater than 0.3 Wh
also in a module and/or installed in equipment (see UN 3499 or UN 3508)¹
according to the dangerous goods regulations of the different transport modes²**

Capacitor product name:	
The capacitor is <input type="checkbox"/> an EDLC (not asymmetric, see UN 3499) <input type="checkbox"/> an asymmetric capacitor (see UN 3508)	
Energy Storage capacity of the single capacitor: _____ Wh	
<input type="checkbox"/> The capacitor contains no electrolyte to be classified as dangerous goods.	
<input type="checkbox"/> The capacitor contains an electrolyte to be classified as dangerous good and is - designed to withstand a 95 kPa pressure differential - capable of withstanding a 1.2 m drop test unpackaged on an unyielding (rigid, non-resilient, flat and horizontal) surface without loss of contents in the case of a) an EDLC with an energy storage capacity of 10 Wh or less or b) an asymmetric capacitor with an energy storage capacity of 20 Wh or less.	
<input type="checkbox"/> Each capacitor is - marked with its energy storage capacity in Wh - designed and constructed to safely relieve pressure that may build up in use, through a vent or a weak point in the capacitor casing. Any liquid which is released upon venting will be contained by <input type="checkbox"/> the packaging <input type="checkbox"/> the equipment in which the capacitor is installed.	
<input type="checkbox"/> Capacitors as described are contained in a module (module name): _____	
For the module: <input type="checkbox"/> Additional dangerous goods are contained in the module as given per attachment. <input type="checkbox"/> No additional dangerous goods component is contained in the module.	
<input type="checkbox"/> The module/s as given above is/are installed in the following equipment: _____ (name of the equipment)	
For equipment: <input type="checkbox"/> Additional dangerous goods are contained in the equipment as given per attachment <input type="checkbox"/> No additional dangerous goods component is contained in the equipment.	
Name and address of manufacturer or supplier:	
Place:	Date:
Responsible Person:	
Signature:	

¹ Please tick and fill as applicable. If additional dangerous goods are contained in a module, e.g. gas cylinders as part of a fire extinguishing system, or as applicable in the equipment with installed capacitors please declare the details in an attachment as given below.

² For example ADR, RID, IMDG Code, ICAO-TI/IATA-DGR, 49 CFR
