

Siemens Wind Power selects Group FabDelta as supplier of wind turbine hubs in Québec

Oakville, ON, December 19, 2016

Group FabDelta is located in New Richmond, Québec

Hubs will be used in the Mont Sainte-Marguerite wind project

Siemens Wind Power Limited today announced Québec-based Group FabDelta inc. has been selected as the supplier of wind turbine hubs for the Mont Sainte-Marguerite project located in the municipalities of Saint-Sylvestre, Saint-Séverin, and Sacré-Cœur-de-Jésus, Québec.

The selection of Group FabDelta was an integral element in the supply agreement with Pattern Energy Group LP, owner of the Saint Marguerite project.

"Group FabDelta has demonstrated their quality and reliability, and we're confident in working with such a strong supplier," said David Hickey, CEO of Siemens WindPower Limited. "We're committed to supporting local business and jobs in the communities we operate, and our supply chain reflects this wherever possible."

Group FabDelta has been a manufacturing partner to the wind industry in Quebec for almost 15 years, and the company's expertise and capacity make them an ideal supplier for Siemens.

Mr. François Arsenault, president of Group FabDelta inc., underlined the extensive and close support of Siemens Wind Power throughout the realization of this important project and expressed his pride in supporting Siemens Wind Power's success in North America.

The Mont Sainte Marguerite wind project will utilize 46 Siemens innovative 3.2 direct drive wind turbines, generating 147 MW annually and providing clean energy for up to 55,000 homes.

About Siemens Wind Power Limited

Siemens Wind Power is a leader in reliable renewable energy generation in Canada. With more than 2,500 MW installed, Siemens wind turbines generate enough clean electricity to power over 500,000 houses. The more than 500 employees of Siemens Wind Power provide safe and reliable renewable energy solutions across the country. From local manufacturing in Tillsonburg, Ontario to long term service and maintenance, Siemens Wind Power works to meet the needs of our customers and to help create a long term renewable energy solution for all Canadians. Having manufactured over 2,000 blades in our Canadian factory, Siemens is committed to continuing investment in innovation, manufacturing and people right here in Canada.

After 100 years, we are still building a better tomorrow.
