SIEMENS MOBILITY

New York: America’s High-Speed Rail Production Center

usa.siemens.com/mobility

Siemens Mobility is establishing a new high-speed rail production center in Horseheads, New York to produce the American Pioneer 220 – America's first true high-speed trainset. The new facility will employ 300 people in New York State. The highly-skilled workforce will produce high-speed trains including state-of-the-art components with the latest in rail manufacturing technology.

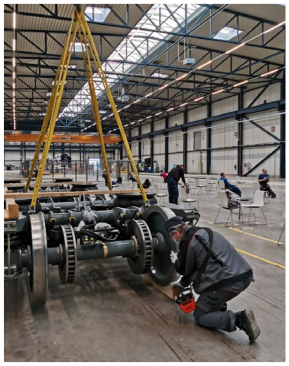

The facility will feature full-scale high-speed rail production, from components to final assembly and functional testing.

A Commitment to the Empire State

Home to more than 2,500 Siemens employees, including our Mobility North America headquarters, New York State is part of the backbone of Siemens presence in America. Siemens Financial Services has $1.85 billion of active investment supporting more than 200 New York private and public sector customers – from small business loans to equity investments in sustainability-focused infrastructure projects. With 1,300 suppliers throughout the state, the new high-speed rail facility will continue to grow our presence and investment in New York.

When fully operational, the new production center will span nearly 300,000 square feet. Our new team of more than 300 employees, will include electro-mechanical assemblers, logistics experts, industrial engineers, rail vehicle testers, project management professionals, and procurement team members. Skilled in the latest manufacturing techniques to build these state-of-the-art trains, the team will use expert technology know-how to run operations in the most efficient manner.

"Being a part of bringing high-speed rail to America is a once-in-a-life time experience to make an impact on the way Americans travel. As a native Western New Yorker, the fact that these trains will be built near my hometown, brings not only a sense of pride, but also excitement for all that is to come for the region and the country!"

– A Siemens Mobility Employee and Native Western New Yorker
