

Mobility Quality Policy

Siemens Mobility PTY LTD is a global leader in automation and control systems. Siemens Mobility PTY LTD, including the wholly owned subsidiary Siemens Rail Automation PTY LTD, is a leader in systems engineering, design, development, production, supply, installation, testing, commissioning and servicing of systems for the transport industry.

Siemens Mobility PTY LTD's success can only be achieved through the efficient use of its skilled personal in the development, manufacture, and application of quality products that closely match the needs of our transportation customers.

The quality of product and service, as perceived by the customer, is a significant factor in the future prosperity of Siemens Mobility PTY LTD.

Our customers expect high levels of quality and reliability from our products and services, while being affordable. To achieve this, Siemens Mobility PTY LTD is committed to the continual improvement of its Quality Management System while ensuring compliance with the International Standard ISO 9001 and regulatory requirements.

The achievement and assurance of quality in our products is through the systematic application of our processes by our skilled personnel.

The principles in this policy apply to all of Siemens Mobility PTY LTD operations, including those entities over which we exercise management control. The individual locations response to this policy will be dependent upon an assessment of the nature and scale of their risks and impacts.
