IDENTIFY3D®

Identify3D enables companies to secure their intellectual property, ensure that products are produced according to defined engineering requirements, and provide full traceability of manufactured parts.

Identify3D, Inc.
Siemens Product Partner
for SINUMERIK Systems and PLM

✓ **Data Confidentiality**

✓ **Manufacturing Repeatability**

Distribution Phase

✓ **IP Protection**

✓ **Part Traceability**

Engineering Phase

Manufacturing Phase

The promise of a **Secured Digital Factory** cannot materialize if IP protection, data confidentiality, manufacturing repeatability, and part traceability are not addressed.
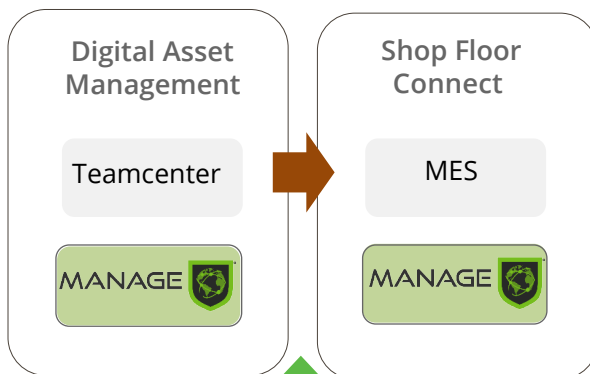

The Secured Digital Factory

Design encryption and secure digital distribution

Assign **rules and parameters** within designs to ensure that parts are printed to specifications

Report all **transactions** associated with the digital asset from inception through production

Seamless **integration of data** along the digital supply chain

Certified **authentication** of users and machines

TRACE

Identify3D is a leader in software for digital manufacturing ensuring the security and integrity of intellectual property along the digital thread. Identify3D provides consistency and repeatability throughout the digital supply chain delivering quality assurance from design to finished product. Ultimately, Identify3D helps engineers make better decisions using in-depth analytics and reporting to enable innovation, optimization, and scalability across disparate digital production platforms.
