

Supporting equity and advancing STEM education and workforce development in America

\$130M invested in the U.S. to advance equitable workforce development and **STEM** education.

More than **\$20M** to close the opportunity gap for underserved and underrepresented workers in **STEM** technical careers.

In response to the COVID-19 crisis, the Foundation invested nearly **\$3M** to extend its support for racial equity and social justice.

More than **\$10M** invested to educate and engage the next generation of **STEM** innovators.

Partnering with a network led by New America to offer **10K** new youth apprenticeships by 2025.

Working with more than **1/3** of **US states**, the National Governors Association Center for Best Practices leveraged more than **\$4M** to scale high-quality work-based learning, better connecting education and the world of work for young people.

Additionally, **21 states** are part of a national network creating an inclusive economic recovery for workers impacted by COVID-19.

Advancing health equity by supporting more than **30 researchers** with PATH fellowships.

Partnering with MxD to create the first comprehensive workforce development strategy for **cybersecurity in manufacturing**.

Reaching **10M+** students with Siemens STEM Days

The Siemens Foundation is closing the opportunity gap for students and young adults in the U.S., particularly those from communities traditionally underserved or underrepresented in STEM-related fields. Opening doors to education and workforce development for these young people puts them on the path to prosperity and contributes to a more diverse and inclusive society.

David Etzwiller, CEO,
Siemens Foundation
