

Engineering Innovation Award

Engineering Innovation. Let us put your name on it.

SIEMENS

Recognizing the Work of the Engineers

The Siemens Engineering Innovation Award recognizes innovative design and problem solving when specifying fire and life safety systems. It is open to all consulting specifying engineering firms.

To qualify, entries need to describe an innovative project that incorporates the use of Siemens fire and life safety technologies in North America. This is your chance to highlight excellence in engineering innovation.

How to Enter

You can nominate a firm online at:
www.usa.siemens.com/eiaward

To enter, you just need to submit a summary of no more than 1,000 words describing one project from within the last year, the name of the project and the name of the firm and engineer where they applied innovation in fire and life safety system designs. Innovation may include use of overall system design or specific fire and life safety technology to:

- Raise the effectiveness of fire and life safety systems to new levels
- Increase the efficiency of fire and life safety systems while maintaining the highest levels of effectiveness
- Meet and overcome new challenges in ensuring the safety of building occupants
- Address existing challenges in a new way that increases the safety of occupants
- Address recurring life safety and/or business mission costs

Judging Criteria

The 2022 Siemens Engineering Innovation Award winner will be selected by our blue-ribbon panel of judges from across the fire and life safety industry. The nominated project must be a building located in North America. Criteria will be based upon:

- The level of innovation used in the project
- The role Siemens technologies played in helping to achieve innovation; the project must utilize one or more of the following Siemens technologies:
 - Fire Alarm
 - Voice Evacuation
 - Mass Notification
 - Detection
 - Suppression

The Award

The winning firm will be proud to display the Siemens Engineering Innovation Award in its lobby. Handcrafted by Waterford Crystal, the award is a replica of a traditional fire alarm pull box rendered in opulent crystal. The winning firm's name will be engraved in a plaque on the front.

Entries must be received no later than May 1, 2022
Winners will be notified in June, 2022 and the award given at our engineering event at the NFPA conference.
