T-Systems and Siemens partner to drive the digitalization of German industry

T-Systems and Siemens today announced a partnership to offer new end-to-end solutions that combine their respective capabilities in Information Technology (IT), Telecommunications (TC) and Operational Technology (OT). The joint solutions will cover enterprise business applications like Enterprise Resource Planning (ERP), Customer Relationship Management (CRM), Supply Chain Management (SCM) and Manufacturing Engineering Systems (MES), with TC solutions helping to enable real-time interaction and collaboration and OT solutions covering shop floor-based driving engineering, production or operation processes. The new solutions can help companies leverage a full range of technologies, which have the potential to reinvent German industry, including Cloud, 5G and Edge Computing.

“We partner to drive and shape the digitalization of the German Industry. The new solutions comprising technologies such as 5G, cloud and edge computing will enhance Industrial operations and processes.” said T-Systems CEO Adel Al-Saleh.

“T-Systems and Siemens cooperate to enable German businesses to drive industrial digitalization and accelerate the development and deployment of Industrial IoT solutions,” said Jan Mrosik, Chief Operating Officer of Siemens Digital Industries.

T-Systems will engage with its leading connectivity solutions from NB-IoT via Campus Networks to 5G, its end-to-end system integration and data analytics expertise. Siemens is engaged with MindSphere®, its cloud-based, open IoT-operating system, along with shop floor automation offerings and deep expertise in vertical industrial digitalization.
Both partners have defined a dedicated team of IoT experts in order to jointly drive customers from consulting on enterprise architecture design to implementation. The first specific use cases have been identified as Machine Health, Predictive Analytics as well as Fleet Management solutions.

Further information on the solutions and use cases will be presented at DigitalX in Cologne and at SPS Nuremberg from 26 to 28 November 2019.

Siemens Digital Industries (DI) is an innovation leader in automation and digitalization. Closely collaborating with partners and customers, DI drives the digital transformation in the process and discrete industries. With its Digital Enterprise portfolio, DI provides companies of all sizes with an end-to-end set of products, solutions and services to integrate and digitalize the entire value chain. Optimized for the specific needs of each industry, DI’s unique portfolio supports customers to achieve greater productivity and flexibility. DI is constantly adding innovations to its portfolio to integrate cutting-edge future technologies. Siemens Digital Industries has its global headquarters in Nuremberg, Germany, and has around 75,000 employees internationally.
Siemens AG (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 170 years. The company is active around the globe, focusing on the areas of electrification, automation and digitalization. One of the largest producers of energy-efficient, resource-saving technologies, Siemens is a leading supplier of efficient power generation and power transmission solutions and a pioneer in infrastructure solutions as well as automation, drive and software solutions for industry. With its publicly listed subsidiary Siemens Healthineers AG, the company is also a leading provider of medical imaging equipment – such as computed tomography and magnetic resonance imaging systems – and a leader in laboratory diagnostics as well as clinical IT. In fiscal 2018, which ended on September 30, 2018, Siemens generated revenue of €83.0 billion and net income of €6.1 billion. At the end of September 2018, the company had around 379,000 employees worldwide. Further information is available on the Internet at www.siemens.com.
