# Fast Bus Busbar Adapter System

## Overview

### Busbar adapter systems

Busbar adapter systems  
with busbar centerline spacing of 60 mm

#### 60 mm busbar system

for sharp-edged copper busbars to DIN 46 433,  
width 20 mm to 30 mm,  
thickness 5 mm and 10 mm

# Fast Bus Busbar Adapter System

## Introduction

### General

The Fast Bus Multi-Motor Control system is a 3-phase insulated busbar system and is ideal for space saving in panel designs. The system saves considerable line side wiring and space for multi-motor panels. It is also ideal for panels where several feeder breakers are used and will save significant wiring space and wiring labor. The system is also ideal for future expansion planning, when building control panels. SIRIUS 3RV/3RT starter combinations and Siemens circuit breakers are all adaptable to Fast Bus for convenient mounting and faster replacement times.

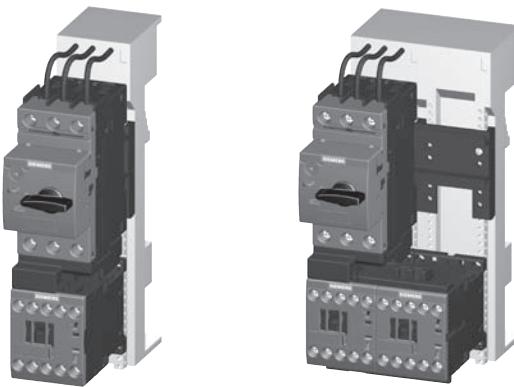

Fast Bus is ideal for industrial applications where system availability is important.

### Features

- Simple economical installation
- Compact design
- Requires fewer mounting holes
- Domestic and International approvals
- Touch safe
- Modular design
- Provision for system expansion
- Clip-on shoes provide mechanical and electrical connections to panel mounted busbars
- Main and Feeder breakers mount to busbars

### Benefits

- Saves installation time
- Reduces space requirements
- Minimizes layout time
- Allows flexibility for domestic and export business
- Protection for maintenance personnel
- Improves equipment mounting density
- Reduces time and costs associated with system expansion
- Reduces mounting and wiring time and provides trouble free connections
- Allows for quick retrofitting of breakers

### How to Select Fast Bus

- 1) Determine the required load.
- 2) Select method to power Fastbus.
  - Main lug up to 800A using a single set of lugs or up to 1400A using a double set of lugs.
  - Circuit breakers, 15A to 500A
 If load exceeds 500A, the CB must be separately panel mounted and fed to a main lug infeed module.
- 3) Select 3RV MSP & 3RT contactor components and appropriate adapter shoe or select preassembled 3RA starters. See section 4.
- 4) Select appropriate length busbar, busbar holders, insulation covers and any other required components.

### General Ratings of Fastbus System

	IEC	Domestic
Rated operating voltage	690V	600V
Rated insulation voltage, IEC VDE	AC 1000V	N/A
Temperature stability	Up to 105 degrees C	N/A
Busbar support and adapter shoe material	Glass-reinforced polyamide	Same
Color	RAL 7035, light gray	Same

Rated operating voltage	690V	600V
Rated insulation voltage, IEC VDE	AC 1000V	N/A
Temperature stability	Up to 105 degrees C	N/A
Busbar support and adapter shoe material	Glass-reinforced polyamide	Same
Color	RAL 7035, light gray	Same

### Ampacity

#### Busbar thickness and width

5 x 20 mm	3/16" x 3/4"	362A
5 x 25 mm	3/16" x 1"	432A
5 x 30 mm	3/16" x 1 1/8"	500A
10 x 20 mm	3/8" x 3/4"	564A
10 x 25 mm	3/8" x 1"	660A
10 x 30 mm	3/8" x 1 1/8"	756A
720mm <sup>2</sup>	---	1400A

For technical information on E and F frame circuit breakers used as main and feeder breakers, see section 17

*Thermal busbar currents, E-Cu, bare, at 35 °C ambient temperature in accordance with DIN 436711*

Busbar dimensions mm	System mm	Thermal current at 65 °C Busbar temperature		
		A	85 °C A	105 °C A
20 x 5	60	274	362	430

30 x 10	60	573	756	900

# Fast Bus Busbar Adapter System

## Introduction

### Fast Bus set-up

The Fast Bus system is designed to be easy to use and to save set up time.

#### 8US Busbar holders

The 8US busbar holders are designed to accommodate ampacities up to 1400A. In some cases, the busbar holder will accept busbars in either 5mm or 10mm widths. Refer to page 5/6 for selection details.

#### High quality material

Busbar supports and fuse bases are manufactured from glass-fiber reinforced, thermoplastic polyester with the color RAL 7035, light gray. The material ensures excellent mechanical, chemical and electrical properties. Furthermore, the material has an extremely low flammability and meets the requirements of UL 94 V0.

#### 8WC Busbar and busbar systems

The most common size busbar for applications in the US is the 8WC5053 (20 mm x 5 mm), however there are other styles available depending on your application.

Busbar systems with 60 mm busbar center-to-center clearance have now become firmly established in the US market.

The permissible busbar temperature is a decisive factor when dimensioning the busbars. The busbar temperature is dependent on the current, the current distribution, the busbar cross-section, the busbar surface, the position of the busbar, the convection and the ambient temperature. The values stated in the table on page 5/3 can only be considered as reference values because the conditions vary with each location. The values are based on constant current over the whole busbar length.

The trend toward busbars proves most advantageous when the incoming supply is centrally located and the load is distributed symmetrically on both sides.

For the assemblies of a busbar system in the feeder circuit the UL directives specify components with large clearance in air and creepage distances (see the table below). Components of the 8US1 busbar system which meet this requirement can be found in this chapter.

#### Note:

*The design of an 8US1 busbar system for use in the feeder circuit always presumes the use of the UL base plate (8US19 22-2UA01) so that the clearance in air and creepage distance requirements are met.*

### Feeder/branch circuit according to UL 508A

The feeder circuit is that part of a circuit which comes in front of the last short circuit protection device (SCPD). The branch circuit is that part of the circuit which follows after the last short circuit protection device. When the 8US1 busbar system is used in a switchgear which must comply with UL directives, it is important to establish whether it is to be used in the feeder circuit or the branch circuit. Components used in the feeder circuit require larger clearance in air and creepage distances than in the branch circuit.

#### Simple Fast Bus system

The two illustrations above show the very basic items needed when setting up a Fastbus system.

- ① 8US1 Busbar holder (5/6)
- ② 8US1 Ground busbar support (shown attached however can be mounted separately 5/6)
- ③ Ground busbar available in 5 x 20 mm to 10 x 30 mm
- ④ 8WC Busbar (8WC5053 shown) FBB36 Busbar (5/6)

### Short-circuit strength

The short-circuit strength of the busbar system is dependent on the spacing of the busbar holders and on the busbar cross-section.

The short-circuit strength of the whole system is dependent on the short-circuit strength of the busbar system and the components that are mounted to the system.

### Applications

The 8US Fast Bus distribution system is ideal for control panel builders with multiple motor applications. These applications are most common in the material handling, automotive, food processing, pharmaceutical and paper processing industries.

	Clearance in air	Creepage distance
Between live parts	25.4 mm (1 inch)	50.8 mm (2 inch)
Between live parts and grounded, non-insulated metal parts	25.4 mm (1 inch)	25.4 mm (1 inch)

# Fast Bus Busbar Adapter System

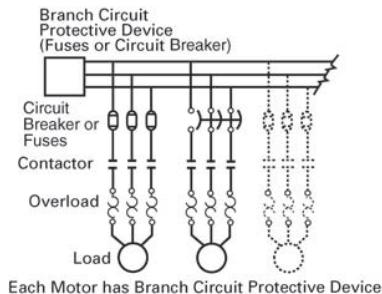

## Introduction

### Fast Bus combination starters and group installation assemblies

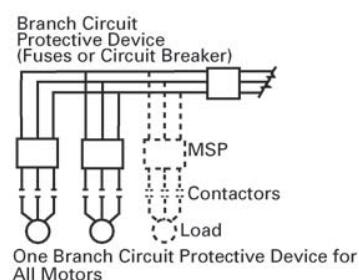

#### Ratings for Group Installations per NEC 430-53

Group Installation is an approach to building multiple motor control systems in accordance with Section 430-53 of the National Electrical Code. In Group installation, multiple motor starters can be grouped under one short circuit protective device. The 3RV MSPs have been UL listed for use in Group Installations both with and without 3RT contactors when mounted on the Fast Bus system. A 3RT contactor is added when remote operation of the motor is required.

#### Standard Installation, NEC 430-52

#### Group Installation, NEC 430-53

MSP Type	FLA Amp Range	FLA Amp Range	Maximum rating of Group Branch Circuit Protective Device		Short Circuit		
			Fuse	Circuit Breaker	Current Ratings <sup>1,2)</sup>	240V	480V
3RV201	S00	0.11-12.5				65kA	—
3RV201	S00	0.11-16				65kA	65kA
3RV202	S0	3.5-12.5				65kA	—
3RV202	S0	3.5-25				65kA	65kA
3RV202	S0	28-32				65kA	50kA
3RV202	S0	36-40				65kA	12kA
3RV203	S2	11-50				65kA	65kA
3RV204	S3	28-100				65kA	30kA

#### The selection of components for Group Installation is a simple process of the following three steps:

1. Selection of the Branch Circuit Protective Device, fuse or circuit breaker.
2. Selection of the 3RA Motor Starter based on the motor Full Load Amps.

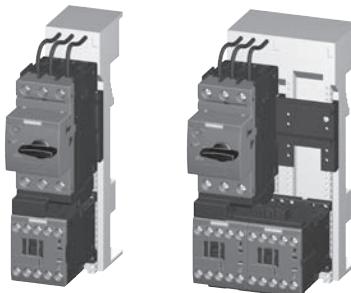

#### Circuit Breaker Selection

Select a circuit breaker (CB) between:  
Minimum CB size (per NEC430-110):  
Sum of all motor FLC (per NEC table 430-150) x115%.  
Maximum CB size (per NEC430-53c):  
250% x FLC of the largest motor + FLC of all other motors.

#### Fuse Selection

Calculate the maximum fuse size per NEC430-53c.  
Max Fuse Size =  $175\% \times \text{FLC}$  of largest motor + FLC of all other motors (FLC's from NEC table 430-150).

Assembled Starter Type	Starter Frame Size	FLA Amp Range	Short Circuit Current Ratings (Type E) <sup>1)</sup>		
			240V	480Y/277V	600Y/347V
3RA201	S00	0.11-12.5	—	—	30kA
3RA201	S00	0.11-16	65kA	65kA	—
3RA202	S0	0.45-12.5	—	—	30kA
3RA202	S0	0.45-25	65kA	65kA	—
3RA202	S0	28-32	50kA	50kA	—
3RA203	S2	11-50	65kA	65kA	25kA
3RA204	S3	28-75	—	—	30kA
3RA204	S3	28-100	65kA	65kA	—

<sup>1)</sup> Branch Circuit Protective Device for 480V-Ratings: The appropriate BCPD need to be determined in accordance with the National Electrical Code, Article 430-53 and the application. The following devices are permitted:

Fuses: Classes RK1, RK5, J, G, T, CC or Circuit breakers: Listed Siemens type, with a marked short-circuit rating equal or larger than the available short-circuit current rating. These devices were tested for group installation use at the above levels without any upstream branch circuit device.

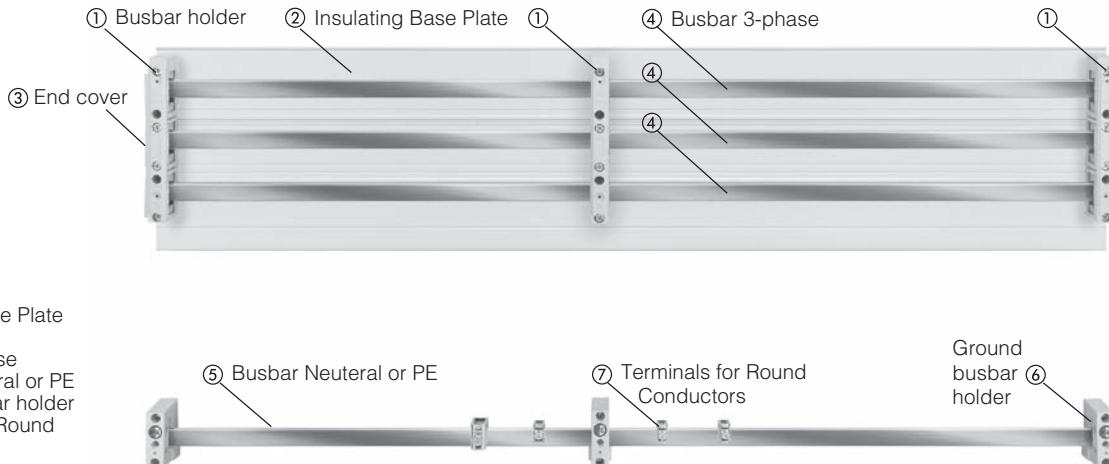

<sup>2)</sup> 3RA2 used as Manual Motor Controller; Branch Circuit Protective Device for 600V-Ratings: Max. Class J 50A

<sup>3)</sup> Starter sizes S00,S0 and S3 require additional type E line side terminal adaptors on the MSP for type F applications. See section 1 accessories

1) UL 508A labeled panels require the use of components that meet the creepage and air distances of 1" air clearance and 2" creepage distance. N/A = not applicable for given item.

2) Current rating dependent on size of busbar used. Refer to busbar selection data.

# Fast Bus Busbar Adapter System

## 60 mm system – Circuit breaker assemblies and kits

### Selection and ordering data

#### Description

##### FBCB Fast Bus circuit breakers

Offer a full range of feeder circuit breakers from 15A to 250A. All kits 125A and under are pre-assembled on 60 mm Fast Bus adaptor shoes and ready to place on the busbar. Circuit breakers

150A and higher are pre-packaged kits for fast user assembly and must be torqued down to the busbar prior to assembly. For VL breakers, adaptors are available for up to 500A breakers

(both main and feeder orientation). See page 5/8.

<sup>1)</sup> UL508A labeled panels require the use of components that meet the creepage and air distances of 1" air clearance and 2" creepage distance.

N/A = not applicable for given item.

<sup>2)</sup> Terminals must be manually spaced on the busbar to comply with UL508A distances of 1" air clearance and 2" creepage distance.

<sup>3)</sup> Cannot be used on Twin T (TT) profile up to 1400 A.

# SIRIUS 3RA Motor Starters

## General data

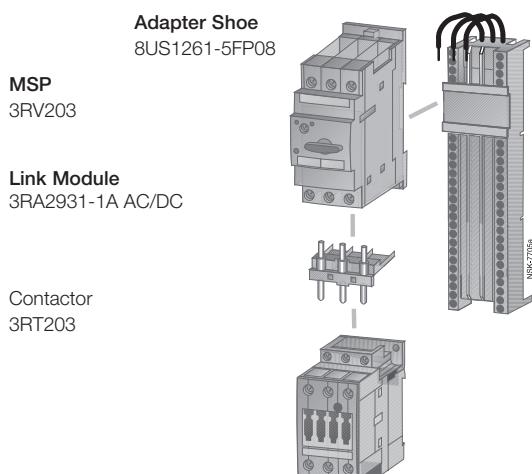

### Direct-on-line starting • For 60 mm busbar systems • Sizes S00 and S0

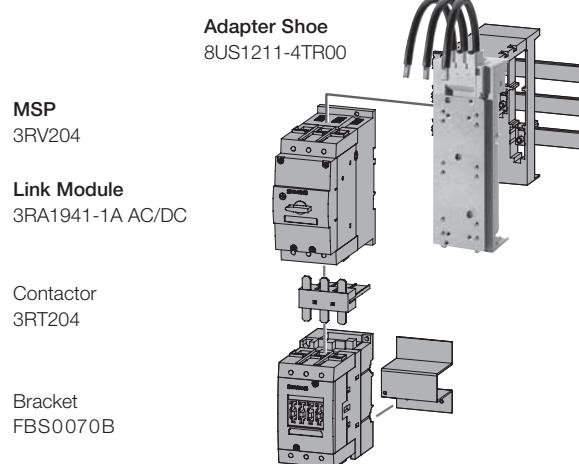

Left: 3RA21 motor starter for direct-on-line starting with busbar adapters with screw connection

Right: 3RA21 motor starter for direct-on-line starting with busbar adapters with spring-type connection

### 3RV203 with 3RT203

### 3RV204 with 3RT204

# SIRIUS 3RA Fast Bus Combination Starters and Group Installation Assemblies

## Selection

**Reversing duty • For 60 mm busbar systems • Sizes S00 and S0**

### RS assembly kit for reversing duty and busbar mounting

Screw connection:

- 3RA29 13-1DB1 for S00
- 3RA29 23-1DB1 for S0

For spring-type connection:

- 3RA29 13-1DB2 for S00
- 3RA29 23-1DB2 for S0<sup>1)</sup>

Comprising:

- 1 wiring kit
- 1 busbar adapter
- 1 device holder
- 2 connecting wedges

<sup>1)</sup>Also includes 3RA29 11-1CA00 spacer  
for height compensation on AC contactors  
size S0 with spring-type terminals.

### Motor starter protector

Size S00/S0

Screw terminals/  
spring-type terminals

### Link module

For screw terminals:

- 3RA19 21-1DA00 for S00

- 3RA29 21-1AA00 for S0, AC contactor

- 3RA29 21-1BA00 for S0, DC contactor

For spring-type terminals:

- 3RA29 11-2AA00 for S00

- 3RA29 21-2AA00 for S0<sup>2)</sup>

### 60 mm busbar adapter

For screw terminals:

- 8US12 51-5DS10 for S00

- 8US12 51-5NT10 for S0

For spring-type terminals:

- 8US12 51-5DT11 for S00

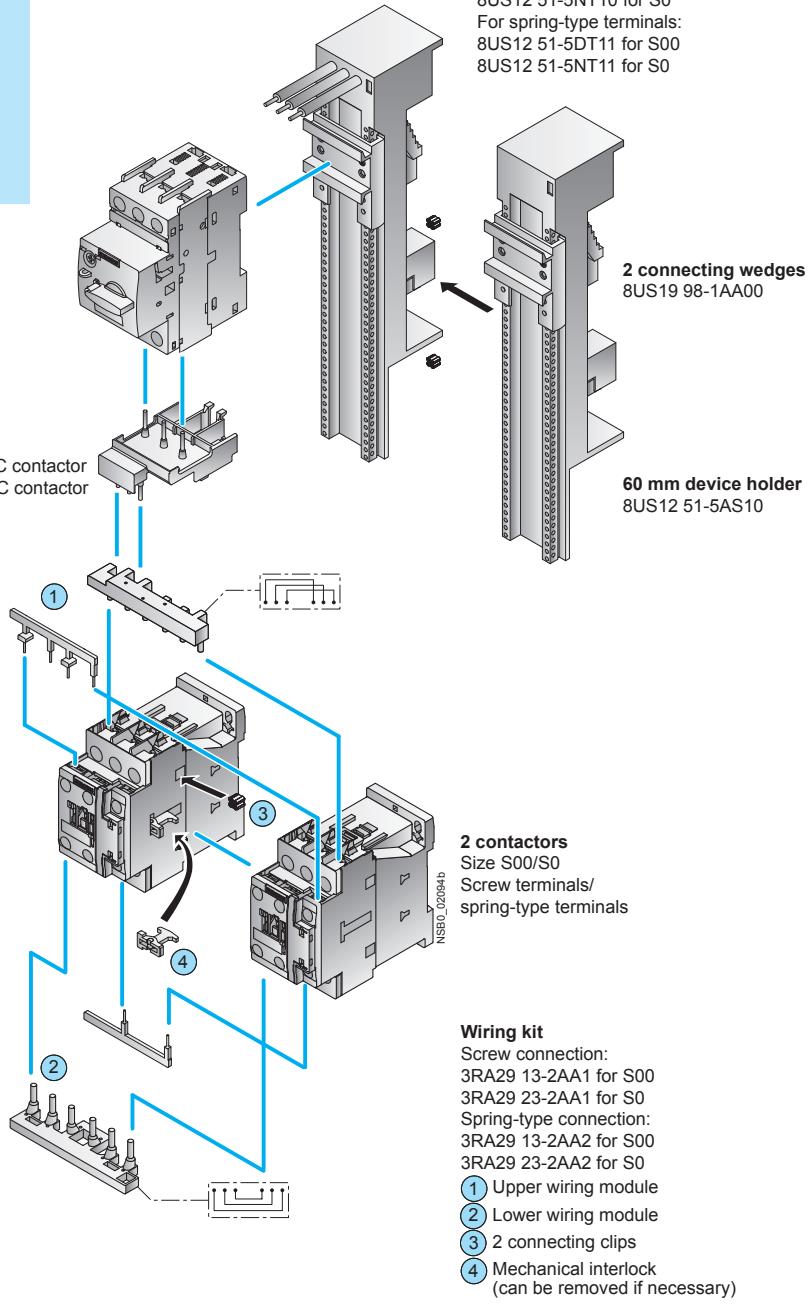

- 8US12 51-5NT11 for S0

### 2 connecting wedges

8US19 98-1AA00

### 60 mm device holder

8US12 51-5AS10

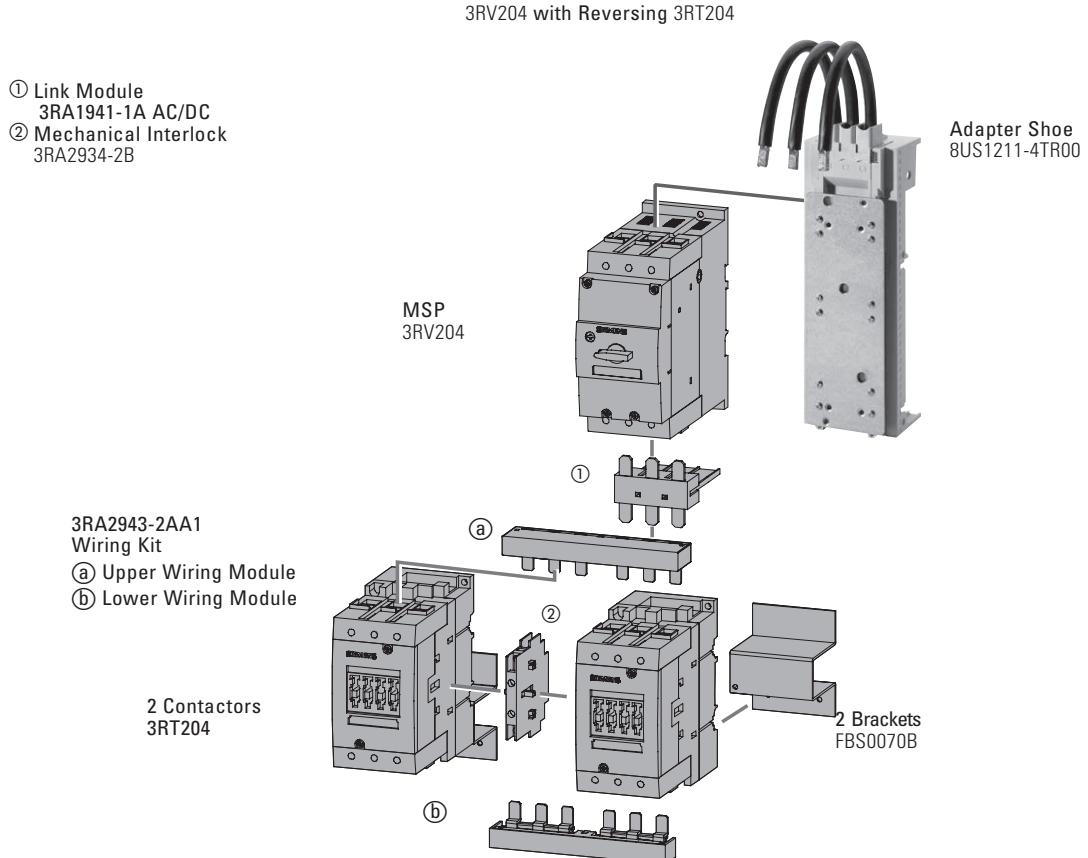

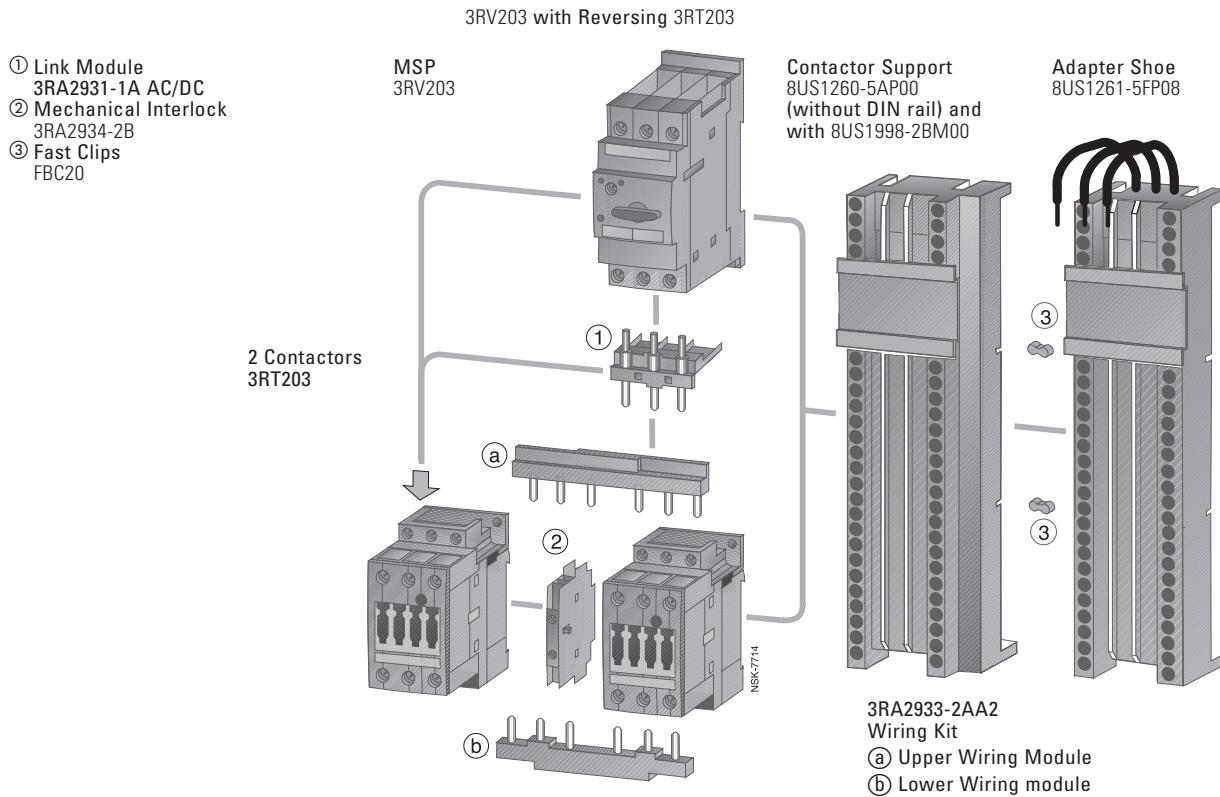

<sup>2)</sup>Additional 3RA29 11-1CA00 spacer  
for height compensation on AC contactors  
size S0 with spring-type terminals.

3RA22 motor starter for reversing duty and 60 mm standard mounting rail in size S00/S0  
(the version with screw connection is shown in the picture)

# SIRIUS 3RA Fast Bus Combination Starters and Group Installation Assemblies

## Selection

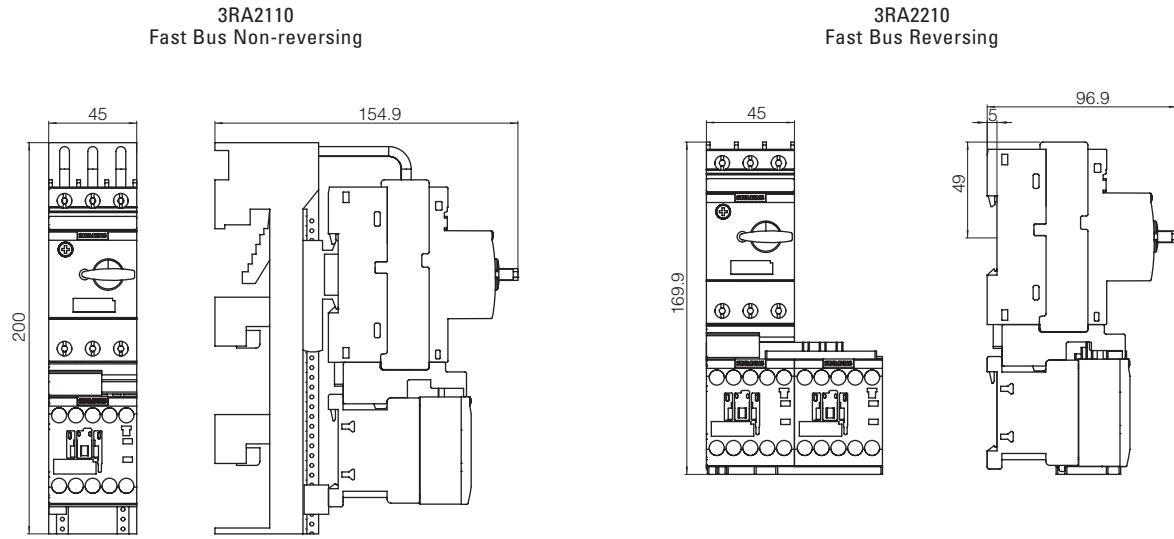

Required Components for Fast Bus Mounting

# SIRIUS 3RA Fast Bus Combination Starters and Group Installation Assemblies

## Dimensions

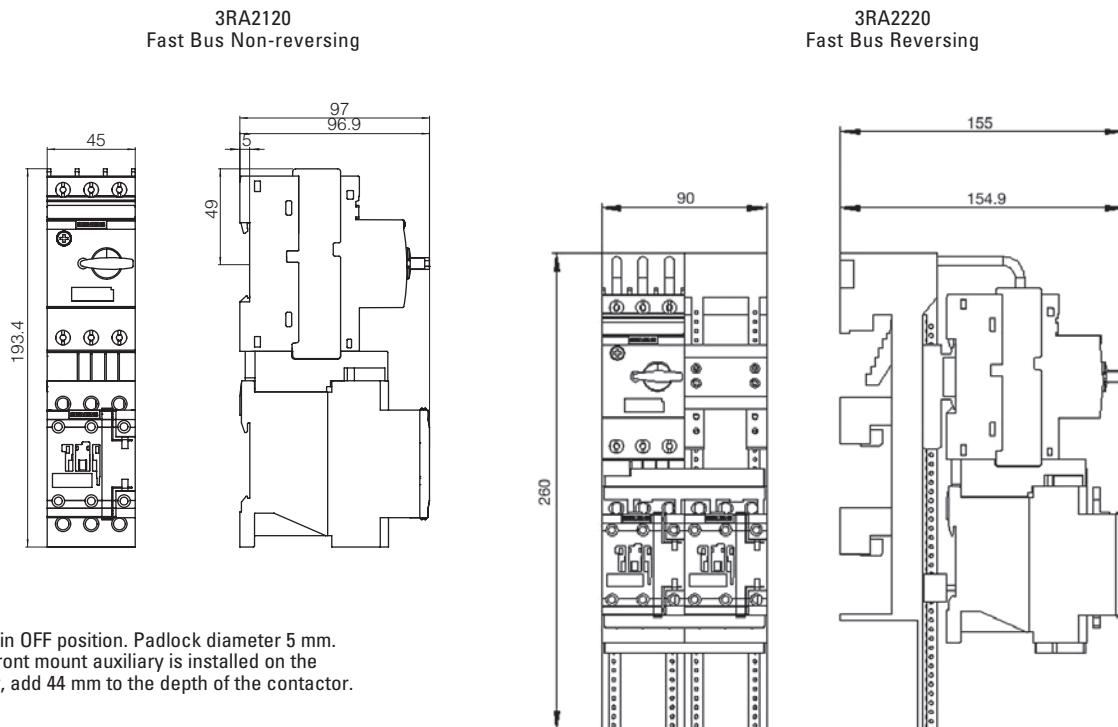

Dimensions, 3RV201 with 3RT201

5

- 1) Lockable in OFF position. Padlock diameter 5 mm.
- 2) When a front auxiliary is installed on the contactor, add 44 mm to the depth of the contactor.

Dimensions, 3RV202 with 3RT201

- 1) Lockable in OFF position. Padlock diameter 5 mm.
- 2) When a front mount auxiliary is installed on the contactor, add 44 mm to the depth of the contactor.

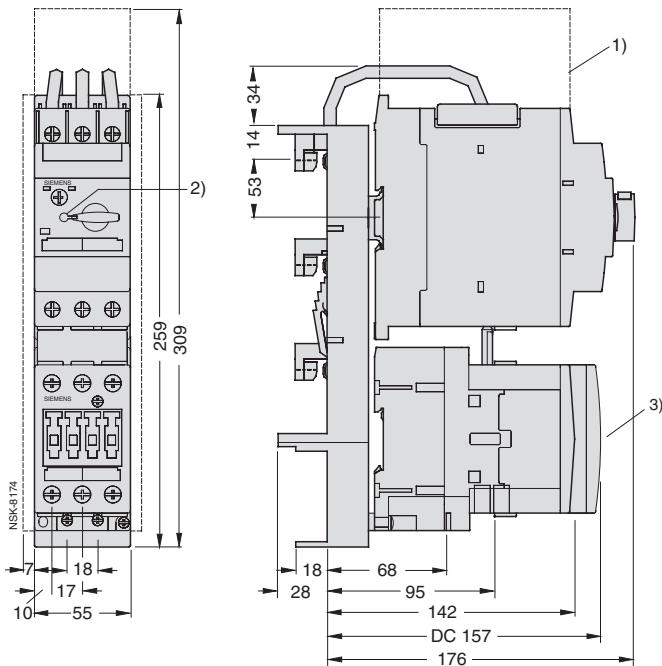

All dimensions shown in millimeters. For reference purposes only. Not to be used for design or construction purposes.

## SIRIUS 3RA Fast Bus Combination Starters and Group Installation Assemblies

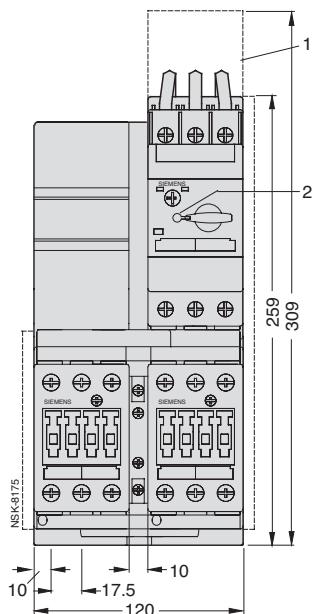

## Dimensions

3RV203 with 3RT203

3RA2130  
Fast Bus Non-reversing

3RA2230  
Fast Bus Reversing

Lateral clearance to grounded components minimum 6 mm.

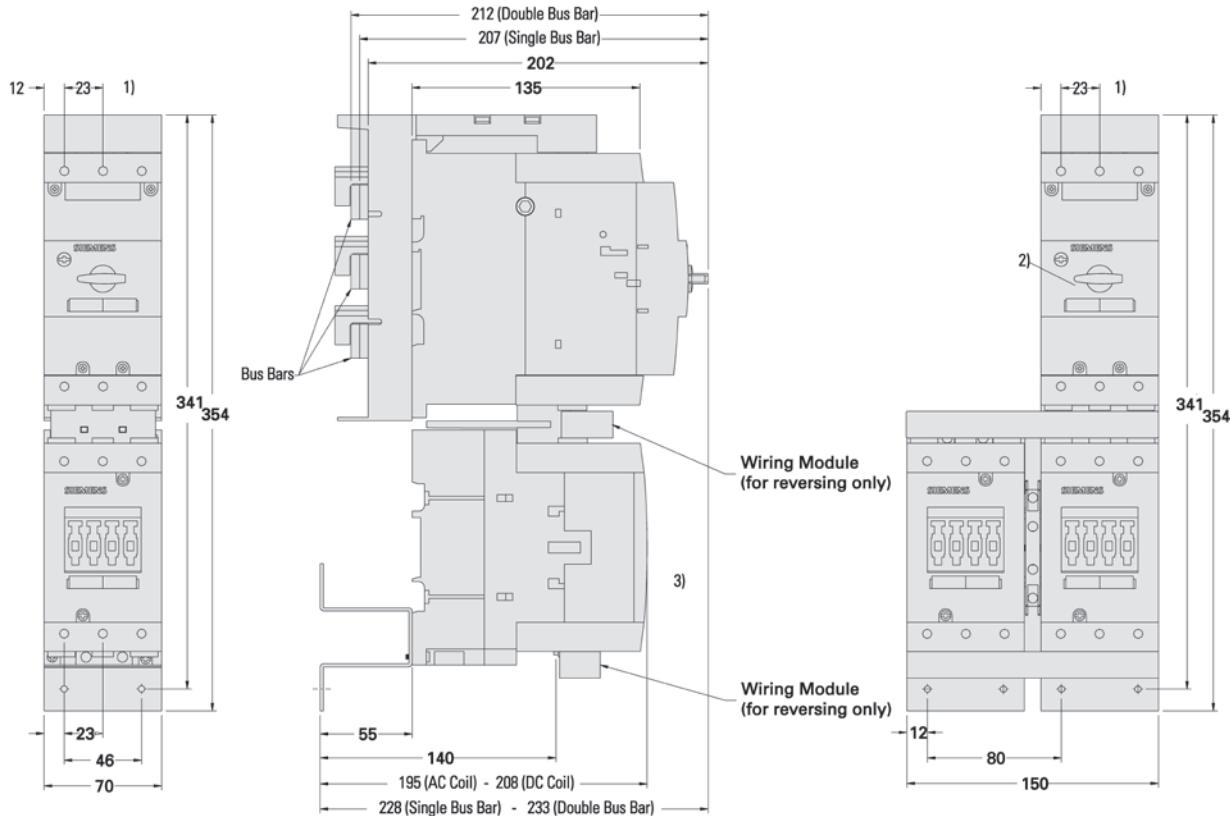

- 1) Arcing space
- 2) Lockable in OFF position with padlock diameter 5 mm.
- 3) When a front mount auxiliary is installed on the contactor, add 49 mm to the depth of the contactor.

All dimensions shown in millimeters. For reference purposes only. Not to be used for design or construction purposes.

# SIRIUS 3RA Fast Bus Combination Starters and Group Installation Assemblies

## Dimensions

3RV204 with 3RT204

Lateral clearance to grounded components minimum 6 mm.

- 1) Arcing space
- 2) Lockable in OFF position with padlock diameter 5 mm.
- 3) When a front mount auxiliary is installed on the contactor, add 49 mm to the depth of the contactor.

All dimensions shown in millimeters. For reference purposes only. Not to be used for design or construction purposes.
