

SIMARIS CREATE

## Simple, intuitive configuration of distribution boards

### Efficient project management

Panel builders don't have it easy. They need intelligent tools that make their work noticeably easier so that their services meet the industry's standards.

The new SIMARIS create configuration software makes your work easier, regardless of whether it's power distribution boards in office or commercial buildings, public buildings or in industry. The software immensely simplifies the planning, configuration and documentation of ALPHA DIN and ALPHA NF low-voltage energy distributors. With many practical functions such as the efficient 3-way configuration, automatic quotation calculation, immediate ordering at the touch of a button and centralized documentation.

The software guides you through the entire workflow.

#### Highlights

- **Three options for configuration start** (material list, circuit diagram, system view)
- **Online product catalog** for devices, accessories and spare parts
- Simple, secure **project collaboration in real time**
- **Automatic quotation calculation**
- **Order directly from the tool** to the electrical wholesaler or Siemens
- **Automatically generated documentation** including power loss data

# Configuration software for low-voltage power distribution boards

**SIMARIS create** provides you with a convenient introduction to the needs-based configuration of **ALPHA DIN** and **ALPHA NF distribution boards**. The software supports:

**ALPHA UNIVERSAL distribution board,**  
LF technology for currents from  
125 A to 800 A.

**ALPHA distribution board,**  
DIN technology for currents from  
160 A to 1250 A.

Get **SIMARIS create** and optimize your entire project management.

## Test SIMARIS create now!

The full version with all innovative functions is available free of charge.
