

Hannover Messe 2019, Hall 9, Booth D35

Industrial PC for cost-optimized applications in the industrial environment

- **SIMATIC IPC527G: Platform for cost-optimized applications in the industrial environment**
- **High performance and flexibility, fast availability**
- **Protection of investment thanks to support of existing systems**

The new member of the Simatic Industrial PC family expands the basic IPC portfolio and is designed for cost-optimized applications in the industrial environment. The new Simatic IPC527G industrial PC has a compact design to save installation space. It is equipped with 6th generation Intel Core Desktop CPUs, a work memory with up to 32 gigabytes, and HDD or SSD mass storage.

The Simatic IPC527G is optionally equipped with either a powerful Intel Core i5 or Intel Pentium processor and has a wide range of interfaces and expansion possibilities – up to four PCI/PCIe slots, up to four COM, up to six USB, up to three Intel Gigabit Ethernet interfaces, one display port, and a VGA connector.

The Simatic IPC527G Box PC from the Simatic Industrial PC portfolio is characterized by high performance and flexibility. It is quickly available and offers through the pre-installation of Windows 7 and Windows 10 as well as legacy interfaces like: PCI, VGA, serial ports, internal USB connector a high degree of investment protection by its support of existing systems.

The new device offers a range of installation options – portrait, wall and desktop mounting. It is "run-in" tested for quick commissioning and certified for global use.

The new member of the Simatic Industrial PC family expands the basic IPC portfolio and is designed for cost-optimized applications in the industrial environment.

Siemens Digital Industries (DI) is an innovation leader in automation and digitalization. Closely collaborating with partners and customers, DI drives the digital transformation in the process and discrete industries. With its Digital Enterprise portfolio, DI provides companies of all sizes with an end-to-end set of products, solutions and services to integrate and digitalize the entire value chain. Optimized for the specific needs of each industry, DI's unique portfolio supports customers to achieve greater productivity and flexibility. DI is constantly adding innovations to its portfolio to integrate cutting-edge future technologies. Siemens Digital Industries has its global headquarters in Nuremberg, Germany, and has around 75,000 employees internationally.

Siemens AG (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 170 years. The company is active around the globe, focusing on the areas of power generation and distribution, intelligent infrastructure for buildings and distributed energy systems, and automation and digitalization in the process and manufacturing industries. Through the separately managed company Siemens Mobility, a leading supplier of smart mobility solutions for rail and road transport, Siemens is shaping the world market for passenger and freight services. Due to its majority stakes in the publicly listed companies Siemens Healthineers AG and Siemens Gamesa Renewable Energy, Siemens is also a world-leading supplier of medical technology and digital healthcare services as well as environmentally friendly solutions for onshore and offshore wind power generation. In fiscal 2018, which ended on September 30, 2018, Siemens generated revenue of €83.0 billion and net income of €6.1 billion. At the end of September 2018, the company had around 379,000 employees worldwide. Further information is available on the Internet at www.siemens.com.
