## Siemens books first Smartron order

- **Eisenbahngesellschaft Potsdam (EGP) orders three Smartron locomotives**
- **New Smartron: One version, one contract, one price**
- **Delivery in early 2019**

Eisenbahngesellschaft Potsdam mbH (EGP) has ordered three Smartron locomotives from Siemens. The Smartron, the new locomotive from Siemens, is tailored for a specific transport function and combines the advantages of a standard product with the platform-proven technology of the Vectron. The Smartron is preconfigured for transporting freight in Germany and ensures customers cost-efficient operation with high operating reliability.

“In test runs, the locomotive’s technical parameters have proven convincing. It also scored points with its intuitive operation, uncomplicated ordering process and manageable delivery times,” says Mathias Tenisson, CEO of EGP.

“We premiered the Smartron in March. The fact that we’ve just received the first order from EGP shows that we have a compelling concept: The new Smartron offers our customers a powerful and reliable locomotive that is configured for defined operations, making it possible to set a simple purchase process. One standard version, one standard contract, one price – that’s the idea behind the Smartron,” says Sabrina Soussan, CEO of Siemens Mobility Division.

EGP decided on a financing solution from the Financial Services Division of Siemens (Siemens Financial Services).

The Smartron is based on proven components of the Vectron. Siemens is also showcasing the Smartron at the InnoTrans 2018, the international trade fair for

transport technology being held in Berlin on September 18-21. The company is again presenting its highlights in Hall 4.2 and in the outdoor exhibition area.

**Siemens AG** (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for 170 years. The company is active around the globe, focusing on the areas of electrification, automation and digitalization. One of the world's largest producers of energy-efficient, resource-saving technologies, Siemens is a leading supplier of efficient power generation and power transmission solutions and a pioneer in infrastructure solutions as well as automation, drive and software solutions for industry. With its publicly listed subsidiary Siemens Healthineers AG, the company is also a leading provider of medical imaging equipment – such as computed tomography and magnetic resonance imaging systems – and a leader in laboratory diagnostics as well as clinical IT. In fiscal 2017, which ended on September 30, 2017, Siemens generated revenue of €83.0 billion and net income of €6.2 billion. At the end of September 2017, the company had around 377,000 employees worldwide. Further information is available on the Internet at [www.siemens.com](http://www.siemens.com).
