Maskinsikkerhed med TIA-portalen

Nåede du ikke at deltage i vores webinar om Simatic Safety Integrated, så se det nu.

Få et indblik i, hvad Simatic Safety Integrated er – fra risikovurdering til implementering – når vi præsenterer mulighederne med integration af safety-funktioner i automationsløsninger med

afsæt i TIA-portalen. Få styr på sikkerheden og beskyt mennesker, maskiner og miljø.

Webinaret - varer ca. 45 minutter.

> **Du finder link til webinar, præsentation og relevante links her**

Sidder du der hjemme og har brug for en software i TIA-portalen ?

Her i disse dage vil der være Simatic brugere som har behov for, at arbejde fra

SINAMICS G: Controlling a speed axis with the "SINA_SPEED" block

Beitrag Betrifft Produkt(e)

A SINAMICS G120 drive is used as a speed axis and is controlled with a SIMATIC S7-1200 with the "SINA_SPEED" block.

A PROFINET-capable SINAMICS G120 drive is to be controlled via a SIMATIC S7-1200. The setpoint speed and a direction of rotation is to be specified.

Solution
This application example shows the PROFINET connection of a SINAMICS G120 to a SIMATIC S7-1200 with SINAMICS Startdrive. The drive is controlled with the "SINA_SPEED" block which can be downloaded directly from a standard library in the TIA Portal.

Note
The block "SINA_SPEED" is also used with a SIMATIC S7-1500 controller.

Documentation and Project
