# Siemens provides **comprehensive service agreements to protect your investment** in your medical scanners

## Worry-Free Maintenance

Maintaining the chiller connected to medical scanners should be the least of your worries. Our comprehensive, worry-free preventative maintenance program ensures that your medical chiller operates at peak performance. As industry experts, we can ensure that your chiller is maintained properly and operates long into the future.

Often, a chiller's problems go unnoticed until there is a malfunction, which can negatively impact scheduling, quality of care as well as patient and physician satisfaction. Additionally, it can have a large financial impact on your business since Medical scanners are very expensive and replacement parts can be costly. Having regular preventive maintenance performed on your chillers, which typically run 24/7 will help prevent expensive repairs and downtime and ensure your medical scanning equipment maintains proper temperatures. This avoids unexpected malfunctions, breakdowns and expensive repairs.

## Rely on the Experts

Most likely, having extra time on your hands is rare for you and your team. A Siemens Preventative Maintenance contract allows your staff to focus on other priorities. Siemens experts will take care of your medical chiller. You can rely on Siemens expert chiller maintenance technicians to spot potential problems before they happen.

## Comprehensive Maintenance

Our preventative maintenance contract covers all aspects of your medical chillers to ensure optimal performance. With extended coverage you can protect your medical scanners investment and your patients' well-being long into the future.
