Retrofit and modernization services for Factory Automation

[siemens.com/fa-migration](https://www.siemens.com/fa-migration)

Companies are often reluctant to modify automation systems that have worked well for years. Yet there are also significant risks to holding on to obsolete technology, because as the likelihood of errors and failures increases, the rising maintenance and troubleshooting costs reduce profitability. For long-term business success, it is also crucial to lay the foundations for the digital transformation in a timely manner. Only those who continually adapt their machines and plants to current requirements will remain competitive over the long term.

Standardized migration solutions from Siemens enable a smooth, reliable, and efficient transition to the latest automation technology. Flexible financing solutions offer the opportunity to make modernizations as needed while ensuring that they are always tailored to the available budget.

Your benefits at a glance

- Reliable modernization with a clearly defined implementation process – precisely tailored to your requirements, your timeline, and your budget
- State-of-the-art SIMATIC components and an extended spare parts supply prolong the service life of machinery
- Targeted increase in plant availability thanks to reduced machine downtimes
- Creation of the basis for Industrie 4.0
- Greater entrepreneurial freedom thanks to flexible payment plans or retrofit financing to protect liquidity and equity capital

Step by step to success

Siemens assists you in your migration project as an experienced partner offering proven products and solutions, decades of product and industry expertise, flexible financing models, and specialists who provide you with expert on-site support. In every case, a clear process ensures cost efficiency and success. Optimal preparations are made for your migration project, risks are consistently minimized, and a reliable fallback strategy protects ongoing operation.

Benefit from our comprehensive range of retrofit and migration offerings

		
Migration consulting and support Individual consultation and support for the migration of obsolete SIMATIC products and systems	Complete system modernization Complete modernization of your old SIMATIC system including tests and acceptance	Production machine retrofit Retrofit of the entire production machine including drives and motors
		
Application software migration Migration of the SIMATIC customer application to the planned target platform without functional expansion	Product upgrade service Preventive service to identify and replace obsolete SIMATIC components	Platform conversion support Individual support service for the successful conversion of third-party systems to SIMATIC systems

Budget-compliant modernizations with our financing models

	Payment plan Precisely tailored financing with monthly installments, with no large one-time investment
	Retrofit financing Siemens Financial Services takes over your machine at the residual book value and finances the modernization. You pay fixed rates for the use of the updated machine.
