

Electrically-powered into the future

With the **VersiCharge IEC** charging unit, Siemens is offering a solution that makes smart cities around the world electrically mobile.

The VersiCharge IEC charging unit – fast, safe and efficient:

Smart energy consumption

Systematic safety

Flexible operation

Versatile use

- In the private or semi-public environment

Efficient energy consumption

- Preset of charging (2/4/6/8 hours)
- Benefit from economical off-peak tariffs

Rugged design

- Protection class IP 56 for outdoor applications
- Functional cable management

Systematic safety

- No need for additional RCCB type B thanks to integrated 6mA DC detection
- Optional access control with external RFID reader

Ease of handling

- Quick and easy installation
- Remote operation thanks to digital input/output function

Take a step into an energy efficient future. With the **VersiCharge IEC** you're ready for the mobility challenges of the future.
